career planning **Careers Without Borders** Cristina Reis, Yehuda Baruch, 2013-05-02 Careers without Borders analyzes the challenges, debates and developments in global careers using a critical management perspective. Starting in the early nineties, the flow of information became more fluid and with this, managers and professionals started operating across borders, crossing different contexts in greater numbers than ever before. In this edited collection, contributors from around the world examine how context, culture and social relations of power all impact on how professionals interact with new structural and ideological frameworks. Issues such as regulation and law, policies, history, identities and inequalities are explored. The book covers a wide range of countries including USA, China, Brazil, Ghana and Hungary, offering strong theoretical analyses as well as practical implications. This book aims to help students and managers understand the career issues involved when they do business in other countries. It will appeal to students on human resource management or international business courses.

Labour-Market Flexibility and Individual Careers Simone R. Kirpal, 2011-01-12 With labour markets across the world and even in social democratic Europe in a state of unprecedented flux, this exhaustive study addresses the problem of how to balance job market demands, personal career interests and private life. This becomes a central issue for millions of employees. So how do modern work and employment arrangements restructure individual careers and what is required of individuals in order to manage career transitions successfully over time? This is one of very few in-depth empirical studies to analyze how labour market trends, organisational change and the subjective work orientations of individuals interact. The author's detailed assessment is based on a comparison of the structural contexts, work orientations and employment histories of nurses and ICT technicians in Germany and the UK. These two core service occupations, as well as the national contexts of the two European nations, have quite different working environments and vocational traditions. Nursing is an institutionalized semi-profession with clear criteria of qualification and career continuity, while information and communication technology (ICT) is a new, evolving field with varied skill backgrounds and high job mobility. To arrive at an understanding of how individual career trajectories are changing, this book closely examines the interplay of labour market demands, employees' work and career orientations and the development of their skills. It records the ways in which employees adapt to increased labour market flexibility, which on the one hand induces discontinuities of careers, employment and work, and on the other, generates new skill requirements and learning expectations as well as unforeseen opportunities.

Modernising medical careers Great Britain: Parliament: House of Commons: Health Committee, 2007-11-14 Modernising medical Careers Vol 2 Written Evidence **The Air Force Comptroller**, 1985 *The Routledge Handbook of Contemporary Inequalities and the Life Course* Magda Nico, Gary Pollock, 2021-12-30 Drawing upon perspectives from across the globe and employing an interdisciplinary life course approach, this handbook explores the production and reproduction of different types of inequality across a variety of social contexts. Inequalities are not static, easily measurable and essentially quantifiable circumstances of life. They are processes which impact on individuals throughout the life course, interacting with

each other accumulating attenuating reproducing or distorting themselves along the way The chapters in this handbook examine various types of inequality such as economic gender racial and ethnic inequalities and analyse how these inequalities manifest themselves within different aspects of society including health education and the family at multiple levels and dimensions The handbook also tackles the global COVID 19 pandemic and its striking impact on the production and intensification of inequalities The interdisciplinary life course approach utilised in this handbook combines quantitative and qualitative methods to bridge the gap between theory and practice and offer strategies and principles for identifying and tackling issues of inequality This book will be indispensable for students and researchers as well as activists and policy makers interested in understanding and eradicating the processes of production reproduction and perpetuation of inequalities
