Property Taxation and the Finance of Education Richard Wadsworth Lindholm, 1974 **The Historical Reliance of Public Education Upon the Property Tax** Richard G. Salmon, 1983 *The Appropriate Role of Property Taxation in School Finance* Suzanne F. Isaacs, 1976 **The Property Tax, School Funding Dilemma** Daphne A. Kenyon, 2007 States experiencing taxpayer revolts among homeowners are tempted to reduce reliance on the property tax to fund schools But a more targeted approach can provide property tax relief and improve state funding for public education This policy focus report includes a comprehensive review of recent research on both property tax and school funding and summarizes case studies of seven states California Massachusetts Michigan New Hampshire New Jersey Ohio and Texas The majority of these states are heavily reliant on property tax revenues to fund schools While there is no one size fits all solution the report recommends addressing property taxes and school funding separately **Beneath the Property Taxes Financing Education** Timothy M. Mulvaney, 2023 Many states turn in sizable part to local property taxes to finance public education Political and academic discourse on the extent to which these taxes should serve in this role largely centers on second order issues such as the vices and virtues of local control the availability of mechanisms to redistribute property tax revenues across school districts and the overall stability of those revenues This Essay contends that such discourse would benefit from directing greater attention to the justice of the government's threshold choices about property law and policy that impact the property values against which property taxes are levied The Essay classifies these choices into three categories structural choices relating to infrastructure and land use financial choices relating to subsidies and exemptions and protective choices relating to forestalling natural and human induced adversities This taxonomy reveals that if the government made different choices surrounding the content of property rights those choices would produce different property values and thus different distributions of the property tax revenues that finance public education The Essay distills a series of norms circumstance sensitivity antidiscrimination and interconnectedness that can serve as a useful starting point for a justice inspired evaluation of these omnipresent choices about property that are inevitably linked to educational opportunity and delivery *Raising Money for Education* David H. Monk, Brian O. Brent, 1997-09-09 How can we create a funding system that's fair to every school and every taxpayer Or is this an impossible goal That's the issue Monk and Brent raise The authors offer an overview of the current trends in school funding sources They explain how the property tax system works They examine the elements necessary to fair taxation and explore tax reform options that could bring in more dollars for education Consider these pertinent questions about any proposed future public education tax Is the tax fair Does it generate money efficiently Is there a potential growth of the tax base Will this tax be a stable source of revenue for schools How hard will it be to administer this tax Will the public comply with this tax The authors offer real insights into the issues surrounding how we get and how we spend the money for our schools The book also looks at alternatives ways to raise funds such as taxes based on income sales

and lotteries It delivers thoughtful well researched information for anyone who s interested in the future of public education and how we will fund it *Public Finance and Public Policy* Jonathan Gruber,2005 Chapters include Income distribution and welfare programs State and local government expenditures and Health economics and private health insurance **Recent Advancements in Education Finance and Policy** Thomas Downes,Kieran M.
