Developer Hegemony Erik Dietrich, It s been said that software is eating the planet The modern economy the world itself relies on technology Demand for the people who can produce it far outweighs the supply So why do developers occupy largely subordinate roles in the corporate structure Developer Hegemony explores the past present and future of the corporation and what it means for developers While it outlines problems with the modern corporate structure it s ultimately a play by play of how to leave the corporate carnival and control your own destiny And it s an emboldening specific vision of what software development looks like in the world of developer hegemony one where developers band together into partner firms of efficiencers finally able to command the pay respect and freedom that s earned by solving problems no one else can Developers if you grow tired of being treated like geeks who can only be trusted to take orders and churn out code consider
