Sanity and Solitude Bob Spencer,2012 The world is a mad place and the various vicissitudes of life appear to make it more so The inherent mutability in nature can swing from the serendipitous to surreal malignity within a matter of moments In this day and age events can be ephemeral or appear so prolonged we are left agonisingly to wonder if they will ever terminate at all To be lost in such a bewildering universe when it feels impossible to gather oneself to take stock of the changeability or to bear the interminable we feel impotent overwhelmed and wrongfully abused Sanity and Solitude is one man s ramble through these frightful absurdities and contradictions that appear to confront us at every turn To understand insanity one has to travel oneself to the very fringes of insanity itself for better or for worse We are the clouds that veil the midnight moon How restlessly they speed and gleam and quiver Streaking the darkness radiantly yet soon Night closes round and they are lost forever Percy Bysshe Shelley

Faith, God, And Modern Science Robert Haggard,2018-02-16 We the human race are creatures of faith We base the living of our lives on some set of beliefs that we take as the bottom line foundations to answer to the questions of why we are here and how to live successfully while we are here and hereafter Okay here is the basic question Did God create the universe pretty much as we see it today in seven calendar days as the scripture tells us If so did it all happen less than 7 000 years ago as creationist theologians scholars historians and scientists say it did Or as modern science has been telling us for years now did it all start with a big bang billions and billions of years ago and slowly evolve to its present state complete with modern man If that s true did God have anything to do with it What is there to make us think He is even there Evolutionist theory is at its heart atheistic It explains why there is no reason to believe in God Yet millions of people who would shudder at the idea that they are atheistic are nonetheless confused Modern culture is so steeped in the assumption of a universe billions of years old that many cannot be completely convicted of its falsehood They are stuck in the middle trying to embrace both a belief in God and accommodation of an idea virtually antithetical to God s existence and the truth of the scripture Sadly this conundrum infects a sizeable segment of the modern church not wanting to appear na ve in the face of the evidence Time then for a hard look at the evidence Did dinosaurs and dragons really become extinct sixty five million years ago or did they walk the earth as man s contemporaries until only several hundreds of years ago Do some still exist today History both biblical and secular plus many a modern witness says the answer to the latter is yes True science should be an

honest open minded inquiry into the world as it is That is what it claims to be The scripture of course gives the answer to where we came from In the beginning God created the heavens and the earth Does science refute that Perhaps more to the point does it not confirm it Where do you choose to place your faith In God and His holy scriptures or in man s scientific wisdom Keep in mind that both is not a viable answer Come on a journey of imagination How would we expect the universe to look any different than exactly the way it does if the biblical account of Creation and history is totally true as opposed to the modern scientific explanations of how it came to be what we see today

Last Ape Standing Chip Walter,2013-01-29 Over the past 150 years scientists have discovered evidence that at least twenty seven species of humans evolved on planet Earth These weren t simply variations on apes but upright walking humans who lived side by side competing cooperating sometimes even mating with our direct ancestors Why did the line of ancient humans who eventually evolved into us survive when the others were shown the evolutionary door Chip Walter draws on new scientific discoveries to tell the fascinating tale of how our survival was linked to our ancestors being born more prematurely than others having uniquely long and rich childhoods evolving a new kind of mind that made us resourceful and emotionally complex how our highly social nature increased our odds of survival and why we became self aware in ways that no other animal seems to be Last Ape Standing also profiles the mysterious others who evolved with us the Neanderthals of Europe the Hobbits of Indonesia the Denisovans of Siberia and the just discovered Red Deer Cave people of China who died off a mere eleven thousand years ago Last Ape Standing is evocative science writing at its best a witty engaging and accessible story that explores the evolutionary events that molded us into the remarkably unique creatures we are an investigation of why we do feel and think the things we do as a species and as people good and bad ingenious and cunning heroic and conflicted
