Bonhoeffer's Intellectual Formation Peter Frick, 2018-03-14 The authors of this volume discuss specific philosophical and theological ideas in view of Bonhoeffer's intellectual formation As such all the studies converge on the thought of Bonhoeffer as a whole in order to illuminate the growth and maturation of his theology Contributors to this volume include Barry Harvey Wayne Floyd Peter Frick Geoffrey Kelly Wolf Krücke Andreas Pangritz Stephen Plant Martin Rumscheidt Christine Tietz Ralf W stenberg and Josiah Young

Studies of the Paris Manuscripts Lixin Han, 2020-02-22 This book is devoted to the studies of Karl Marx's Paris Manuscripts and presents a new interpretation of early Marx arguing that his transition to maturity can be found in these manuscripts and specifically in Comments on James Mill which was drafted between the First Manuscript and the Second Manuscript In Comments on James Mill Marx succeeds in transferring his theoretical framework from the isolated individual to the society and establishes his basic goal i.e. to explicate the nature of humans and society from the perspective of external economic relations marking the advent of historical materialism This study reopens the possibility of interpreting the Paris Manuscripts from the perspective of Hegel According to the author it was during the Paris Manuscripts period that Marx shifted his theoretical foundations from

Feuerbach to Hegel On the basis of Hegel's alienation concept Marx constructs a new form of alienation theory with alienation of intercourse at its core The theoretical challenge tackled by this book is to restore the authority of alienation theory and strengthen the position of the Paris Manuscripts in the history of Marx thought so as to rearrange the traditional landscape of research on early Marx thought This interpretation proposed and published for the first time in the world could compete with the theses of Louis Althusser and Hiromatsu Wataru which consider *Die deutsche Ideologie* to be the turning point of Marx Further it represents a significant contribution by a Chinese scholar to the international research on Marx

The Dialectics of Liberty Chris Matthew Sciabarra, Edward W. Younkins, Roger E. Bissell, 2019-06-04 This collection of essays explores the ways in which the defense of liberty can be bolstered by use of a dialectical method that is a mode of analysis devoted to grasping the full context of philosophical cultural and social factors requisite to the sustenance of human freedom Its strength lies in the variety of disciplines and perspectives represented by contributors who apply explicitly dialectical tools to a classical liberal libertarian analysis of social and cultural issues In its conjoining of a dialectical method typically associated with the socialist left to a defense of individual liberty typically associated with the libertarian right this anthology challenges contemporary attitudes on both ends of the political spectrum Though this conjunction of dialectics and liberty has been explored before in several works including a trilogy of books written by one of our coeditors Chris Matthew Sciabarra this volume will be the first one of its kind to bring together accomplished scholars in political science economics philosophy aesthetics psychology law history education and rhetoric

Politics as Radical Creation Christopher Holman, 2013-01-01 Politics as Radical Creation examines the meaning of democratic practice through the critical social theory of the Frankfurt School It provides an understanding of democratic politics as a potentially performative good in itself undertaken not just to the extent that it seeks to achieve a certain extrinsic goal but also in that it functions as a medium for the expression of creative human impulses Christopher Holman develops this potential model through a critical examination of the political philosophies of Herbert Marcuse and Hannah Arendt Holman argues that while Arendt and Marcuse's respective theorizations each ultimately restrict the potential scope of creative human expression their juxtaposition which has not been previously explored results in a more comprehensive theory of democratic existence one that is uniquely able to affirm the creative capacities of the human being Yielding important theoretical results that will interest scholars of each theorist and of theories of democracy more generally Politics as Radical Creation provides a valuable means for rethinking the nature of contemporary democratic practice

The Self and Its Body in Hegel's Phenomenology of Spirit John Russon, 2001-01-01 A major criticism of Hegel's philosophy is that it fails to comprehend the experience of the body In this book John Russon shows that there is in fact a philosophy of embodiment implicit in Hegel's *Phenomenology of Spirit* Russon argues that Hegel has not only taken account of the body but has done so in a way that integrates both modern work on embodiment and the approach to the body found in ancient Greek philosophy Although Russon approaches Hegel's

Phenomenology from a contemporary standpoint he places both this standpoint and Hegel's work within a classical tradition Using the Aristotelian terms of nature and habit Russon refers to the classical distinction between biological nature and a cultural second nature It is this second nature that constitutes in Russon's reading of Hegel the true embodiment of human intersubjectivity The development of spirit as mapped out by Hegel is interpreted here as a process by which the self establishes for itself an embodiment in a set of social and political institutions in which it can recognize and satisfy its rational needs Russon concludes by arguing that self expression and self interpretation are the ultimate needs of the human spirit and that it is the degree to which these needs are satisfied that is the ultimate measure of the adequacy of the institutions that embody human life This link with classicism in itself a serious contribution to the history of philosophy provides an excellent point of access into the Hegelian system Russon's work which will prove interesting reading for any Hegel scholar provides a solid and reliable introduction to the study of Hegel **Marcuse** Jacob McNulty,2024-11-14

Herbert Marcuse 1898 1979 is known to many as a leading figure of 1960s counterculture and a Guru of the New Left However the deeper philosophical background to Marcuse's thought is often forgotten especially his significant engagement with German idealism ancient philosophy and a broad spectrum of problems and issues from the philosophical tradition This much needed book introduces and assesses Marcuse's philosophy and is ideal for those coming to his work for the first time Jacob McNulty covers the following topics Marcuse's life and the background to his thought including his formative period as a student of Husserl and Heidegger and as a philosopher in Horkheimer's Institute Marcuse's recasting of metaphysics in light of Marxian and Freudian thought Marcuse and German idealism especially the role of Kant and Hegel Marcuse's philosophy of human nature his use of the late Freud's ideas of Eros and Thanatos Marcuse as a critic of state and monopoly capitalism Meaning propaganda and ideology the political implications of language and also the centrality of free speech Marcuse's aesthetics Marcuse's legacy and his relationship to contemporary analytical philosophy especially analytic critical theory An outstanding and engaging introduction to a central figure in twentieth century radical thought Marcuse is essential reading for those in philosophy and related disciplines including political theory sociology and media and communication studies **Art, Alienation, and the Humanities** Charles Reitz,2000-02-03 Illustrates how Marcuse's theory sheds new light on current debates in both education and society involving issues of multiculturalism postmodernism civic education the culture wars critical thinking and critical literacy *Encyclopedia of the Romantic Era, 1760-1850* Christopher John Murray,2013-05-13 In 850 analytical articles this two volume set explores the developments that influenced the profound changes in thought and sensibility during the second half of the eighteenth century and the first half of the nineteenth century The Encyclopedia provides readers with a clear detailed and accurate reference source on the literature thought music and art of the period demonstrating the rich interplay of international influences and cross currents at work and to explore the many issues raised by the very concepts of Romantic and Romanticism *The Doctrine of Being in Hegel's*

Science of Logic Mehmet Tabak, 2017-06-06 This book provides an accessible and thorough analysis of The Doctrine of Being the first part of Hegel's Science of Logic Though it received much scholarly attention in the past interpreters of this text have generally refrained from examining it in a sufficiently detailed manner Through a rigorous and critical reading of Hegel's speculative arguments Mehmet Tabak illustrates that Hegel meant his logic to be both a presuppositionless analysis and development of the basic categories of thought on the one hand and a post Kantian ontology on the other However the analysis of the text demonstrates that Hegel fails to deliver such logic This volume promises to be an indispensable guide to those who wish to understand the first book of Science of Logic **Critical Theory to Structuralism** David

Ingram, 2014-09-11 Philosophy in the middle of the 20th Century between 1920 and 1968 responded to the cataclysmic events of the time Thinkers on the Right turned to authoritarian forms of nationalism in search of stable forms of collective identity will and purpose Thinkers on the Left promoted egalitarian forms of humanism under the banner of international communism Others saw these opposed tendencies as converging in the extinction of the individual and sought to retrieve the ideals of the Enlightenment in ways that critically acknowledged the contradictions of a liberal democracy racked by class cultural and racial conflict Key figures and movements discussed in this volume include Schmitt Adorno and the Frankfurt School Arendt Benjamin Bataille French Marxism Black Existentialism Saussure and Structuralism Levi Strauss Lacan and Late Pragmatism These individuals and schools of thought responded to this modernity crisis in different ways but largely focused on what they perceived to be liberal democracy's betrayal of its own rationalist ideals of freedom equality and fraternity *From Marx to Hegel and Back* Victoria Fareld, Hannes Kuch, 2020-01-09 The relation between Hegel and Marx

is among the most interpreted in the history of philosophy Given the contemporary renaissance of Marx and Marxist theories how should we re read the Hegel Marx connection today What place does Hegel have in contemporary critical thinking Most schools of Marxism regard Marx's inversion of Hegel's dialectics as a progressive development leaving behind Hegel's idealism by transforming it into a materialist critique of political economy Other Marxist approaches argue that the mature Marx completely broke with Hegel By contrast this book offers a wide ranging and innovative understanding of Hegel as an empirically informed theorist of the social political and economic world It proposes a movement from Marx to Hegel and back by exploring the intersections where the two thinkers can be read as mutually complementing or even reinforcing one another With a particular focus on essential concepts like recognition love revolution freedom and the idea of critique this new intervention into Hegelian and Marxian philosophy unifies the ethical content of Hegel's philosophy with the power of Marx's social and economic critique of the contemporary world
