

Inductive Reasoning

Inductive reasoning is the act of making generalized conclusions based off of specific scenarios.

Examples:

- Determining when you should leave for work based on traffic patterns
- Rolling out a new accounting process based on the way users interact with the software
- Deciding on incentive plans based on an employee survey
- Changing a meeting time or format based on participant energy levels

VS

Deductive Reasoning

Deductive reasoning is the act of backing up a generalized statement with specific scenarios.

Examples:

- Developing a marketing plan that will be effective for a specific audience
- Designing the floor plan and layout of a shop to maximize sales
- Determining the most efficient ways to communicate with clients
- Planning out a budget to get the highest output from your investments
