Valuing Land Tenure Rights Food and Agriculture Organization of the United Nations, 2018-10-05 The Food and Agriculture Organization of the United Nations FAO has developed a series of Technical Guides to elaborate and provide more detailed guidance on thematic areas contained within the Guidelines As part of this series this Technical Guide covers the issues associated with the identification and valuation of tenure rights for different purposes and provides

guidance on how to ensure that valuations are undertaken in a fair reliable and transparent manner that comply with international norms It explains why valuations are important where and when they should be used and by whom It is not intended to be a valuation textbook instead it seeks to raise the level of awareness of valuation issues and procedures among those involved in land policy and administration and those affected by land tenure decisions Though this Technical Guide focuses on land it provides useful guidance that may be applied to fisheries forests and other natural resources It is directed primarily towards developing countries and countries in transition where there is less awareness of the valuation profession and institutions Legitimate tenure rights involving customary or informal tenure systems may be less clear and not formalized by law or regulations *Sustainable Food Futures* Jessica Duncan, Megan Bailey, 2017-08-04 Securing sustainable food for everyone is one of the world's most pressing challenges but research policy and programmes remain fragmented and effective solutions have been slow to emerge This book takes on these challenges by proposing a range of solutions that can advance pathways towards sustainable food futures Complete with recipes this book is structured so that readers are taken in a logical progression through discussions of solutions highlighting the need to recognise the importance of place and the importance of participation and to challenge dominant descriptions of markets through to re-designing food systems The solutions presented in this book are based on real world cases but discussions remain deliberately broad to encourage thinking in new ways Cases are drawn from Africa Asia Europe and North and South America The book is of relevance to those interested in sustainable food futures and can serve as a supplementary textbook for a wide range of courses in food studies and related disciplines **Accountant Student and Accountants' Journal**, 1908

Parliamentary Papers Great Britain. Parliament. House of Commons,1901 1st, 2d Report of [the] Commissioners
Great Britain. Commissions. Local taxation,1899 *Report[s, Minutes of Evidence, and Index]* Great Britain. Royal
Commission on Local Taxation,1899 Power / Knowledge / Land Laura German,2022-10-10 The 2008 outcry over the
global land grab made headlines around the world leading to a sustained interest in the dynamics and fate of customary land
among both academics and development practitioners In *Power Knowledge Land* author Laura German profiles the
consolidation of a global knowledge regime surrounding land and its governance within international development circles in
the decade following this outcry and the growing enrollment of previously antagonistic actors within it Drawing theoretical
insights on the inseparability of power and knowledge German reveals the dynamics of knowledge practices that have
enabled the longstanding project of commodifying customary land and the more contemporary interests in acquiring and
financializing it to be advanced and legitimated by capturing the energies of socially progressive forces By bringing theories
of change from the emergent land governance orthodoxy into dialogue with the ethnographic evidence from across the
African continent and beyond concepts masquerading as universal and self evident truths are provincialized and their role in
commodifying customary land and entrenching colonial futurities put on display In doing so the volume brings wider
academic debates surrounding productive forms of power into the heart of the land grab debate while enhancing their
accessibility to a wider audience *Power Knowledge Land* takes current scholarly debates surrounding land grabs beyond
their theoretical moorings in critical agrarian studies political economy and globalization into contemporary debates
surrounding the politics of knowledge from theories of coloniality to ontological anthropology thereby enabling new dynamics
of the phenomenon to be revealed The book deploys a pioneering epistemology integrating deconstructionist approaches to
reveal the tactics truth claims and ontological assumptions of global knowledge brokers with systematic qualitative reviews
and comparative study to contrast these dominant constructs with the evidence and reveal alternative ways of knowing land
and practicing security from the ethnographic literature This helps to reveal the Western and modernist biases in the
narratives that have been advanced about women custom and security revealing how the coloniality of knowledge works to
grease the wheels of land takings by advancing highly provincialized constructs aligned with western interests as universal
truths Creating a system to record tenure rights and first registration Food and Agriculture Organization of the United
Nations,2018-10-05 Increasingly attention is being paid to recording tenure rights that are not yet recorded for example in
cases where customary rights have recently been given legal recognition where new legally recognized rights have been

created based on informal rights or where new fisheries rights forest rights and water rights have been created or given legal recognition In such cases there is often a need to also create a new recording system with a specific focus such as for recording forest use rights fisheries shares or water use rights or to have the recording done at an appropriate level of government or by a self governing community This guide is about extending the recording or registration of tenure rights to people who currently are not served by systems to record their rights It provides practical advice on ways to introduce a new system to record tenure rights and for the recording of rights for the first time by the state a process that is sometimes called first registration
