Cyber Crime and Cyber Terrorism Tim Owen, 2025-06-16 This book examines the cyber terrorist offender through social and biological theories It critiques how traditional criminology theory falls short when applied to cyber terrorism Using a four fold lens it takes into analytical consideration a cluster of psychological social genetic and neurological variables It uses multiple examples to show how this approach can be applied to selected aspects of cyber terrorism including definitions of terrorism per se forms of cyber terrorism examples of counter terrorism and attempts to combat cyber terrorism and the possible motivations for cyber terrorism This Genetic Social approach seeks to build bridges between the biological and social sciences providing an ontologically flexible more integrationalist conceptualisation of the phenomena of cyber terrorism It includes a chapter explaining how the post Covid era has changed the playing field in a way that advantages cyber terrorists and it also discusses a blueprint for a potential predictive model of cyber terrorism The Routledge Handbook of European Criminology Sophie Body-Gendrot, Mike Hough, Klara Kerezsi, René Lévy, Sonja Snacken, 2013-08-15 This new book brings together some of the leading criminologists across Europe to showcase the best of European criminology This Handbook aims to reflect the range and depth of current work in Europe and to counterbalance the impact of the sometimes insular and ethnocentric Anglo American criminological tradition The end product is a collection of twenty

eight chapters illustrating a truly comparative and interdisciplinary European criminology The editors have assembled a cast of leading voices to reflect on differences and commonalities elaborate on theoretically grounded comparisons and reflect on emerging themes in criminology in Europe After the editors introduction the book is organised in three parts five chapters offering historical theoretical and policy oriented overviews of European issues in crime and crime control seven chapters looking at different dimensions of crime in Europe includingcrime trends state crime gender and crime and urban safety fifteen chapters examining the variety of institutional responses exploring issues such as policing juvenile justice punishment green crime and the role of the victim This book gives some indication of the richness and scope of the emerging comparative European criminology and will be required reading for anyone who wants to understand trends in crime and its control across Europe It will also be a valuable teaching resource especially at postgraduate level as well as an important reference point for researchers and scholars of criminology across Europe Gender, Crime and Criminal Justice Sandra Walklate, 2013-01-11 This book provides a lucid and highly acclaimed introduction to gender issues in crime and criminal justice central to any understanding of crime and criminal justice policy and practice This second edition has been updated to take full account of recent developments particularly in the areas of policing crime prevention restorative justice and legislation relating to sexual offences and the nature and impact of crime on women in particular the Sexual Offences Act 2003 Gender Crime and Criminal Justice is divided into three main sections. The first considers different ways of theorising about gender and the relative impact of this on thinking about crime and criminal victimisation the second considers some of the evidence in relation to people s gendered experiences of crime and criminal victimisation the third considers how those working within the criminal justice system and the policies that are put in place work to sustain or change those experiences of crime and criminal victimisation in relation to gender **Security: Welfare, Crime And Society** Cochrane, Allan, Talbot, Deborah, 2008-10-01 Why is the concept of security so important in modern society Why do people and governments invest so much in the pursuit of different forms of security How do we make sense of the changing nature of the relationship between security and insecurity This book focuses on the concept of security as an idea an ideal and a practice and explores the ways in which it can shed light on the relationship between welfare and crime and the ambiguities that arise from them The authors investigate these issues by examining particular areas of social life and policy development with a focus that ranges from global to local and neighbourhood concerns The book is integrated with engaging activities such as case studies review and reflection sections Adopting an inter disciplinary approach to explore criminological and social policy perspectives the chapters reflect the increasingly blurred area between social and crime control policy and the way in which it is managed The contributors delve into the consequences and implications of policies and practices aimed at creating security which can all too often have the opposite effect Security is key reading for students in criminology social policy and social justice Crime, Genes, Neuroscience and Cyberspace Tim Owen, 2017-09-18 This book applies Owen's unique genetic social

framework to the study of crime and criminal behaviour with an emphasis on cybercrime Moving beyond challenges which confront contemporary criminological theorizing such as the stagnation of critical criminology the relativistic nihilism of the cultural turn posthumanism and virtual criminology the author codifies and applies the latest version of the framework to the study of crime both in and out of cyberspace Drawing upon evolutionary psychology behavioural genetics and the philosophy of Heidegger he introduces new terms such as Neuro Agency and notions of Embodied Cognition into criminological theorizing Adopting a soft compatibilist approach to free will and Realist ontology Owen's meta theoretical focus provides a new direction for criminological theorizing in particular in the direction of the conceptualization and prediction of cyber violence Exciting and timely this book will appeal to scholars and advanced students of criminology law sociology social policy psychology philosophy policing and forensic investigation Criminological Theory T. Owen, 2014-04-29 In an age of rapid advances in behavioural genetics this book applies a unique genetic social framework to the study of crime and criminal behaviour Drawing upon evidence from evolutionary psychology and behavioural genetics it offers an up to date and balanced account of the mutuality between genes and environment Green Cultural Criminology Avi Brisman, Nigel South, 2014-06-05 Over the last two decades green criminology has emerged as a unique area of study bringing together criminologists and sociologists from a wide range of research backgrounds and varying theoretical orientations It spans the micro to the macro from individual level environmental crimes and victimization to business corporate violations and state transgressions There have been few attempts however to explicitly or implicitly integrate cultural criminology into green criminology or vice versa This book moves towards articulating a green cultural criminological perspective Brisman and South examine existing overlapping research and offer a platform to support future excursions by green criminologists into cultural criminology s concern with media images and representations consumerism and consumption and resistance At the same time they offer an invitation to cultural criminologists to adopt a green view of the consumption landscape and the growth and depictions of environmental harms Green Cultural Criminology is aimed at students academics criminologists and sociologists with an interest in green criminology and cultural criminology two of the most exciting new areas in criminology today
