Zeman,2002-05-28 This four part chronology presents the unfolding of the American West from 23 000 B C E to A D 2001 Not long ago the story of the American West was an uncomplicated tale Its theme was The Winning of the West and its plot simply followed Euro Americans as they galloped across the continent But throughout the last two decades historians like Scott C Zeman have begun to examine the story and separate the myths from the facts Today the history of the American West is about the land itself about conquest and colonization about migration and social change Its heroes are not only white men but also women and children and peoples of African Asian Native American and European descent In this up to date chronology readers can explore hundreds of political social and cultural plot points from the arrival of the continent s first migrants more than 20 000 years ago to the Wounded Knee Massacre in 1890 and from the completion of the trans Alaska pipeline in 1977 to the shootings at Columbine High School in 2000      *The Politics of Western Water* Stephen C. Sturgeon,2022-12-06 As the Democratic congressman from Colorado s Fourth District from 1949 to 1973 Wayne Aspinall was an advocate of natural resource development in general and reclamation projects in particular A political loner considered crusty and abrasive he carved a national reputation by helping secure the passage of key water legislation in the process clashing with colleagues and environmentalists alike Fiercely protective of western Colorado s water supply Aspinall

sought to secure prosperity for his district by protecting its share of Colorado River water through federal reclamation projects and he made this goal the centerpiece of his congressional career. He became chair of the House Interior Committee in 1959 and ruled it with an iron fist for more than a dozen years, a role that placed him in a key position to shape the nation's natural resource legislation at a time when the growing environmental movement was calling for a sharp change in policy. This full-length study of Aspinall's importance to reclamation in the West clarifies his role in influencing western water policy. By focusing on Aspinall's congressional career, Stephen Sturgeon provides a detailed account of the political machinations and personal foibles that shaped Aspinall's efforts to implement water reclamation legislation in support of Colorado's Western Slope along the way, shedding new light on familiar water controversies. Sturgeon meticulously traces the influences on Aspinall's thinking and the arc of his career, examining the congressman's involvement in the Colorado River Storage Project bill and his clash with conservationists over the proposed Echo Park Dam, recounting the fight over the Frying Pan Arkansas Project and his decision to support diverting water out of his own district and exploring the battles over the Central Arizona Project in which Aspinall fought not only environmentalists but also other members of Congress. Finally, he assesses the Aspinall legacy, including the still-disputed Animas-La Plata Project, and shows how his vision of progress shaped the history of western water development. *The Politics of Western Water* portrays Aspinall in human terms, not as a pork-barrel politician but as a representative who believed he was protecting his constituents' interests. It is an insightful account of the political, financial, and personal variables that affect the course by which water resource legislation is conceived, supported, and implemented, a book that is essential to understanding the history and future of water in the West. **Time** Briton

Samuel P. Hays, 1998-02-15 Samuel P. Hays is one of the most distinguished scholars in the field of environmental history and the leading thinker of its first generation. The range and quality of the scholarship collected here reflect his work as a teacher, scholar, and activist writing in environmental history and provide a powerful exclamation point to a long and distinguished career. The depth of Hays's research is evident on every page of this collection. He was not one who published just to publish; he wrote what was important and spoke to the heart of continuing debates about the environment from 1959, with the publication of *Conservation and the Gospel of Efficiency*, to the present day. As well as representing his best work from the past four decades, this collection includes four pieces published here for the first time. One of these, the opening essay, is Hays's autobiographical account of his encounters with many participants in environmental studies and those vigorously involved in contemporary environmental politics. Amid the entire series of environmental dramas that have engaged his attention, he has sought to establish the case that a perspective of change and evolution over time, the focus of the historian, can be of immense value in informing the ongoing debates over environmental affairs. This argument runs through this work. The Aeronauts Donald Dale Jackson, 1980 **America's**
