Studies on Reduplication Bernhard Hurch, 2011-12-22 For several reasons mostly inherent to the different developments of generative grammar an increasing number of publications have dealt with reduplication in the past 20 years Reduplication lends itself perfectly as a test field for theories that opt for a non segmental organization of phonology and morphology As it happens frequently then the discussion centers around a rather small set of data for which alternative analysis are offered and which themselves are intended to contribute to the foundation of new theoretical developments The present volume which goes back to a conference on reduplication at the University of Graz Austria offers a broader approach to reduplication not only from different theoretical viewpoints but especially for its phenomenology Across theories a number of highly qualified authors deal with formal and functional perspectives with typological properties with semantics comparative issues the role of reduplication in language acquisition the acquisition of reduplicative systems sign languages creoles and pidgins general grammatical and cognitive principles the picture is completed by a series of language or language family specific studies as on Uto Aztecan Salish Tupi Guarani Moroccan and Cairene Arabic various African languages Chinese Turkish Indo European languages from India etc The overall scope of the conference was to contribute to a new level of discussion of the

phenomenon across theories and across specializations and interests Update on Contributor s addresses PDF **Clusivity** Elena Filimonova,2005-01-01 This book presents a collection of papers on clusivity a newly coined term for the inclusive exclusive distinction Clusivity is a widespread feature familiar from descriptive grammars and frequently figuring in typological schemes and diachronic scenarios However no comprehensive exploration of it has been available so far This book is intended to make the first step towards a better understanding of the inclusive exclusive opposition by documenting the current linguistic knowledge on the topic The issues discussed include the categorial and paradigmatic status of the opposition its geographical distribution realization in free vs bound pronouns inclusive imperatives clusivity in the 2nd person honorific uses of the distinction etc These case studies are complemented by the analysis of the opposition in American Sign Language as opposed to spoken languages In depth areal and family surveys of clusivity consider this opposition in Austronesian Tibeto Burman central western South American Turkic languages and in Mosetenan and Shuswap

Phonological Representation and Phonetic Phasing Wolfgang Kehrein,2013-02-06 The monograph contains two case studies dealing with the phonetics and phonology of affricates and laryngeals from a survey of 281 languages The empirical findings go counter to a number of assumptions in the literature e g 1 affricates are exclusively stops from the perspective of phonology 2 laryngeals are properties of the prosodic domains onset nucleus and coda 3 phonetic strategies affrication laryngeal phasing serve to make phonological specifications acoustically more salient Theoretical discussions include questions of phonological representation featural contours prosodic licensing etc and the phonology phonetics interface

Terry

Thompson, Steven M. Egesdal, 2008-01-01 The rich storytelling traditions of Salish speaking peoples in the Pacific Northwest of North America are showcased in this anthology of story legend song and oratory From the Bitterroot Mountains to the Pacific Ocean Salish speaking communities such as the Bella Coola Shuswap Tillamook Quinault Colville Okanagan Coeur d Alene and Flathead have always been guided and inspired by the stories of previous generations Many of the most influential and powerful of those tales appear in this volume Salish Myths and Legends features an array of Trickster stories centered on Coyote Mink and other memorable characters as well as stories of the frightening Basket Ogress accounts of otherworldly journeys classic epic cycles such as South Wind s Journeys and the Bluejay Cycle tales of such legendary animals as Beaver and Lady Louse from the beginning of time and stories that explain why things are the way they are The anthology also includes humorous traditional tales speeches and fascinating stories of encounters with whites including Circling Raven and the Jesuits Translated by leading scholars working in close collaboration with Salish storytellers these stories are certain to entertain and provoke vividly testifying to the enduring power of storytelling in Native communities **Reduplication**

Sharon Inkelas, Cheryl Zoll, 2005-02-24 This groundbreaking new study takes a novel approach to reduplication a phenomenon whereby languages use repetition to create new words Sharon Inkelas and Cheryl Zoll argue that the driving force in reduplication is identity at the morphosyntactic not the phonological level and present a new model of reduplication Morphological Doubling Theory that derives the full range of reduplication patterns This approach shifts the focus away from the relatively small number of cases of phonological overapplication and underapplication which have played a major role in earlier studies to the larger class of cases where base and reduplicant diverge phonologically The authors conclude by arguing for a theoretical shift in phonology which entails more attention to word structure As well as presenting the authors pioneering work this book also provides a much needed overview of reduplication the study of which has become one of the most contentious in modern phonological theory **Copies Versus Cognates in Bound Morphology** Lars

Johanson, Martine Robbeets, 2012-07-05 Copies versus Cognates in Bound Morphology puts genealogical and areal explanation for shared morphology in a balanced perspective Lars Johanson and Martine Robbeets provide nothing less than the foundations for a new perspective on diachronic linguistics between genealogical and areal linguistics

Anthropological Linguistics, 2001 Parts of Speech Umberto Ansaldi, Jan Don, Roland Pfau, 2010-09-15 Parts of Speech are a central aspect of linguistic theory and analysis Though a long established tradition in Western linguistics and philosophy has assumed the validity of Parts of Speech in the study of language there are still many questions left unanswered For example should Parts of Speech be treated as descriptive tools or are they to be considered universal constructs Is it possible to come up with cross linguistically valid formal categories or are categories of language structure ultimately language specific Should they be defined semantically syntactically or otherwise Do non Indo European languages reveal novel aspects of categorical assignment This volume attempts to answer these and other fundamental questions for

linguistic theory and its methodology by offering a range of contributions that spans diverse theoretical persuasions and contributes to our understanding of Parts of Speech with analyses of new data sets These articles were originally published in Studies in Language 32 3 2008 **Santa Barbara Papers in Linguistics** ,2002
