Twenty two classic science fiction stories spanning the first three decades of the Science Fiction Grand Master's career. Features *Super Toys*, *Last All Summer*, the short story that inspired the film *A.I. Artificial Intelligence*. Britain's most versatile and durable and consistently most interesting science fiction writer presents his own personal best of 22 splendid tales. To Aldiss, the human dimension has always been more important than hardware or fireworks, which is why his best stories have a timeless quality, weaving intelligence, emotion, and inventiveness. Kirkus Reviews starred review. Winner of the Hugo and Nebula Awards. Brian W. Aldiss was a science fiction author in competition with no one but himself. The New York Times Book Review. In this collection, he shows why, offering up twenty-two stories from the first three decades of his career, encompassing a stunning range of ideas, moods, and styles. In the title story, we find a man recently back from an expedition in space who lives 3,307.7 minutes in the future. A meteor shakes things up in a quiet English town in *The Saliva Tree*, an homage to H.G. Wells and which earned Aldiss the Nebula Award in 1965. A giant lizard-like alien comes to Earth in *Heresies of the Huge God*, and while some believe it is a monster, others worship it. A mother tries to connect with her son through the help of a robot intermediary in *Super Toys*. *Last All Summer*: Unhappy with the state of his life, a man ventures back in time to hunt dinosaurs. In *Poor Little Warrior*, robots have an existential crisis. In *Who Can Replace a Man*, men travel to Mars to take a picture of the planet's tallest volcano. In *The Difficulties in Photographing Nix Olympica*. Although the stories in this collection were originally published in the 1950s, 60s, 70s, and 80s, they remain just as gripping today. Each conveys a fascinating idea for readers to ponder, and together they make a perfect introduction to one of British science fiction's greatest authors. *Brian Aldiss* Michael R. Collings, 1986-01-01. A guide to Aldiss's fictional output from the 50s to the 80s. Brian W. Aldiss Paul Kincaid, 2022-07-12. Brian W. Aldiss wrote classic science fiction novels like *Report on Probability A* and *Hothouse*. *Billion Year Spree*, his groundbreaking study of the field, defined the very meaning of SF and delineated its history. Yet Aldiss's discomfort with being a guiding spirit of the British New Wave and his pursuit of mainstream success characterized a lifelong ambivalence toward the genre. Paul Kincaid explores the many contradictions that underlay the distinctive qualities of Aldiss's writing. Wartime experiences in Asia and the alienation that arose upon his return to the cold austerity of postwar Britain inspired themes and imagery that Aldiss drew upon throughout his career. He wrote of prolific nature, overwhelming humanity, believed war was madness, even though it provided him with the happiest period of his life, and found parallels in the static lives of Indian peasants and hidebound English society. As Kincaid shows, contradictions created tensions that fueled the metaphorical underpinnings of Aldiss's work and shaped not only his long

career but the evolution of postwar British science fiction Avian Architecture Peter Goodfellow, 2011-06-05 An illustrated guide to how birds design and build their nests Birds are the most consistently inventive builders and their nests set the bar for functional design in nature Avian Architecture describes how birds design engineer and build their nests deconstructing all types of nests found around the world using architectural blueprints and detailed descriptions of the construction processes and engineering techniques birds use This spectacularly illustrated book features 300 full color images and more than 35 case studies that profile key species worldwide Each chapter covers a different type of nest from tunnel nests and mound nests to floating nests hanging nests woven nests and even multiple nest avian cities Other kinds of avian construction such as bowers and harvest wells are also featured Avian Architecture includes intricate step by step sequences visual spreads on nest building materials and methods and insightful commentary by a leading expert Illustrates how birds around the world design engineer and build their nests Features architectural blueprints step by step sequences visual spreads on nest building materials and methods and expert commentary Includes 300 full color images Covers more than 100 bird species worldwide *Diagnostic and Futuristic Aspects of Oral Medicine and Radiology* S.
