Philpot, 2017-01-26 This book offers a comprehensive analysis of character focalization in ten contemporary realistic children's novels The author argues that character focalization defined as the location of fictional world perception in the mind of a character is a prominent textual structure in these novels He demonstrates how significant meanings are conveyed in a variety of forms related to characters personal and interpersonal experiences Through close analysis of each text moreover he exposes distinctive perceptual psychological and social psychological patterns in the opening chapters of each novel which are thereafter developed by the principles of continuation augmentation and reconfiguration This book will appeal to scholars teachers and students in the fields of narrative studies stylistics children's literature scholarship linguistics and education Hearings, Reports and Prints of the Senate Committee on Interior and Insular Affairs United States. physical proximity and similar natural environments develop so differently Desert Cities examines the environmental circumstances that led to the starkly divergent growth of these two cities Michael Logan traces this significant imbalance to two main factors water resources and cultural differences Both cities began as agricultural communities Phoenix had the advantage of a larger water supply the Salt River which has four and one half times the volume of Tucson s Santa Cruz River Because Phoenix had a larger river it received federal assistance in the early twentieth century for the Salt River project which provided water storage facilities Tucson received no federal aid Moreover a significant cultural difference existed Tucson though it became a U S possession in 1853 always had a sizable Hispanic population Phoenix was settled in the 1870s by Anglo pioneers who brought their visions of landscape development and commerce with them By examining the factors of watershed culture ethnicity terrain political favoritism economic development and history Desert Cities offers a comprehensive evaluation that illuminates the causes of growth disparity in two major southwestern cities and provides a model for the study of bi city resource competition *Report of the Special Committee of the United States Senate on the Irrigation and Reclamation of Arid Lands. ...* United States.
