

SOCIAL JUSTICE PRINCIPLES.

What is social justice?

Social justice is the promotion of human rights and the removal of inequality.

It acknowledges that external factors impact health.

The social justice principles include:

- Equity
- Diversity
- Supportive environments

EQUITY.

Equity is provision of resources to the disadvantaged to ensure equal and fair health for all population groups.

This results in priority population groups receiving additional funding as they have poorer health outcomes than other Australians.

Example:

The government initiative - 'Close the Gap' campaign provides funding and additional support to Indigenous Australians to ensure that their health outcomes are the same as non-Indigenous Australians. In particular, the campaign focuses on 'closing the gap' in life expectancy for the ATSI population.

DIVERSITY.

Diversity refers to the differences that exist between individuals and people groups.

It accepts cultural, religious and other differences to acknowledge the needs for all members of society.

Example:

Translation services are available to culturally diverse and linguistic people to ensure that they receive the same access to health services and facilities.

SUPPORTIVE ENVIRONMENTS.

Supportive environments are environments where people live, work and play that promote and support health.

Example:

Having 'no-smoking areas' in public places supports healthy choices to minimise smoking. It is a way to encourage individuals to quit smoking by creating a stigma of the risky behaviour not being socially acceptable.

David Miller

Principles Of Social Justice:

Principles of Social Justice David Miller,1999-10-11 The meaning of social justice remains obscure and existing theories put forward by political philosophers to explain it have failed to capture the way people think about issues of social justice This text develops a new theory The Principles of New Ethics II Wang Haiming,2020-10-29 From Descartes to Spinoza Western philosophers have attempted to propose an axiomatic systemization of ethics However without consensus on the contents and objects of ethics the system remains incomplete This fourvolume set presents a model that highlights a Chinese philosopher s insights on ethics after a 22 year study Three essential components of ethics are examined metaethics normative ethics and virtue ethics This volume is the fi rst part of the discussion on normative ethics The author sets out to discuss morality and shows how the reasoning behind it can be both good and bad for human society from various perspectives A system of an ultimate standard of morality is introduced and it is shown that where there are confl icts between different moral norms that cannot be compromised people undoubtedly sacrifi ce less important moral norms to follow more fundamental and important moral norms or principles The ultimate standard of morality is also the ultimate value standard for the evaluation of the goodness or badness of state institutions Justice is the fundamental value standard to measure state institutions Equality is the most important justice The Chinese version of this set sold more than 60 000 copies and has exerted tremendous infl uence on the academic scene in the People s Republic The English version will be an essential read for students and scholars of ethics and philosophy in general Empowerment Evaluation Principles in Practice David M. Fetterman,Abraham Wandersman,2005-01-01 What principles should guide an empowerment evaluation And how can these principles actually be put into practice One of the primary tasks in an empowerment evaluation EE is to increase the capacity of program stakeholders to plan implement and evaluate their own programs This book presents the most current formulation of the 10 principles of EE and provides professionals and students with the tools to put these principles into practice Through case studies of diverse evaluation projects including community health foundation initiatives school district programs and a 15 million corporate program aimed at bridging the digital divide the founder and leading proponents of EE clarify key concepts and discuss important lessons learned Coverage includes how to balance program improvement efforts with accountability requirements how EE can be used to guide standards based work how to use EE in a learning organization the differences among empowerment collaborative and participatory evaluation and much more
