Reality Fundamental Topics In Metaphysics:

Reality Peter Loftson, 2010-10-27 In *Reality Fundamental Topics in Metaphysics* Peter Loftson argues for a conception of metaphysics as the most general or comprehensive method of inquiry Working from a broadly analytic and naturalist perspective he confronts positions that claim metaphysics to be impossible as advanced in ancient Kantian post Kantian and contemporary philosophy showing them to be unsuccessful He draws the topics of his selective investigation of metaphysics partly from the work of Kant whom he conceives as a primary guide to what metaphysical enquiry seeks to know Loftson provides accounts of basic categories of what is real and outlines major historical metaphysical systems He then goes on to explore aspects of existence essence substance universals space time causality mind freedom and other topics This important contribution to metaphysics offers both sustained arguments on all aspects of the subject and important insights into the major metaphysical systems from the history of philosophy

Reality Peter Loftson, 2001 In this compelling work Peter Loftson provides an accessible exploration of the major topics in metaphysics He considers problems such as essence existence substance purpose space time mind causality God freedom and the possibilities of immortality In addition he looks at the major historical metaphysical systems and defends the metaphysical project as a whole The book offers both historical and contemporary perspectives and includes Loftson's lucid arguments in which he propounds a naturalist and common sense view of the world Loftson defends the ineliminability and the logical or categorical mutual irreducibility of individual substances he advocates an empiricist view of space but a rationalist view of time and he presents a treatment of possible worlds that limits them to cases with only actual members In a special contribution he explores the idea of metaphysical luck which leads to puzzling and significant results Replete with historical references explanations of terminology and directional signposts the book provides an excellent companion to metaphysical studies filling a gap for scholars and specialists in this field

First Philosophy III: God, Mind, and Freedom Andrew Bailey, 2004-08-06 *First Philosophy* God Mind and Freedom brings together classic and ground breaking readings on metaphysics the philosophy of mind and the philosophy of religion Mindful of the intrinsic difficulty of much of the material the editor has provided comprehensive introductions both to the central topics and to each individual selection By providing a detailed discussion of the historical and intellectual background to each piece he aims to enable readers to approach the material without unnecessary barriers to understanding In an introductory chapter the editor provides a brief introduction to the nature of philosophical enquiry to the nature of argument and to the process of reading and writing within the academic discipline of philosophy

Reality Making Mark Jago, 2016-02-12 What makes up reality and how What kinds of entity are fundamental to reality and how do dependent entities depend on the fundamental ones How does one entity metaphysically ground another These questions are central to contemporary metaphysics The papers in this collection written by a new generation of metaphysicians address these and related questions They investigate the metaphysical concepts of grounding and fundamentality and the relationship between

the fundamental and all the other parts of reality Together these papers represent the cutting edge of a central topic in contemporary metaphysics Chasing Reality Mario Bunge, Professor Mario Bunge, 2006-01-01 Dealing with the controversies over the reality of the external world this work offers a defense of realism a critique of various forms of contemporary anti realism and a sketch of the author s version of realism namely hylorealism It examines the main varieties of antirealism and argues that all of these in fact hinder scientific research The New Yearbook for Phenomenology and Phenomenological Philosophy Burt Hopkins, John Drummond, 2021-09-20 Volume XVIII Special Issue Gian Carlo Rota and The End of Objectivity 2019 Aim and Scope The New Yearbook for Phenomenology and Phenomenological Philosophy provides an annual international forum for phenomenological research in the spirit of Husserl s groundbreaking work and the extension of this work by such figures as Scheler Heidegger Sartre Levinas Merleau Ponty and Gadamer Contributors Gabriele Baratelli Stefania Centrone Giovanna C Cifoletti Jean Marie Coquard Steven Crowell Deborah De Rosa Daniele De Santis Nicolas de Warren Agnese Di Riccio Aur lien Djian Yuval Dolev Mirja Hartimo Burt C Hopkins Talia Leven Ah Hyun Moon Luis Niel Fabrizio Palombi Mario Ariel Gonz lez Porta Gian Carlo Rota Michael Roubach Franco Trabattoni and Michele Vagnetti Submissions Manuscripts prepared for blind review should be submitted to the Editors burt crowell hopkins univ lille3 fr and drummond fordham edu electronically via e mail attachments *The Atheist's Primer* Malcolm Murray, 2010-04-06 The Atheist s Primer is a concise but wide ranging introduction to a variety of arguments concepts and issues pertaining to belief in God In lucid and engaging prose Malcom Murray offers a penetrating yet fair minded critique of the traditional arguments for the existence of God He then explores a number of other important issues relevant to religious belief such as the problem of suffering and the relationship between religion and morality in each case arguing that atheism is preferable to theism The book will appeal to both students and professionals in the philosophy of religion as well as general audiences interested in the topic Three Plays of Maureen Hunter Hunter, Maureen, 2003 Book is clean and tight No writing in text Like New **An Essay on Ontology** Joseph Kaipayil, 2008 Columbia Companion to Twentieth-Century Philosophies Constantin V. branches of philosophy science and theology In examining the nature of reality metaphysicians delve into topics like the nature of objects and their properties the concept of identity and change the structure of time and space and the possibility of alternate realities The scope of metaphysical inquiry is vast One of the primary areas it addresses is ontology which concerns the study of being and existence Ontological questions include inquiries into the types of entities that exist whether abstract entities like numbers or concepts exist independently of human thought and whether the universe is fundamentally composed of matter or something more fundamental like energy or consciousness

Freedom, Nature, and World Peter Loftson, 2008-01-31 Freedom Nature and World is a collection of essays by Peter Loftson which examine issues posed by a broadly naturalistic view of the world which Loftson defends while also exploring some of the challenges it confronts Papers on freedom Kant Christianity Homer the history of analytic philosophy the place of humanity in nature and other topics are brought together within a synoptically naturalistic purview All the essays rest on and in some cases extend that synoptic perspective which seeks to encompass both a scientific understanding of humankind in the natural world and the complexities of free rational agency within our cultural and historical settings Published in English

Mystery 101 Richard H. Jones, 2018-02-15 Offering readers much to ponder Richard H Jones approaches the big questions of philosophy such as the nature of reality consciousness free will the existence of God and the meaning of life not by weighing the merits of leading arguments in these debates but instead by questioning the extent to which we are even in a position to answer such questions in the first place Regardless of continuous technical and even groundbreaking advances in knowledge there will always be gaps in what we can fully understand Distinguishing true mysteries from problems yet to be solved but within the scope of our intellectual grasp Jones provides a penetrating and high level overview of the scope and limits of scientific and philosophical inquiry

Making Things Up Karen Bennett, 2017-05-19 A certain kind of talk is ubiquitous among both philosophers and so called ordinary people talk of one phenomenon generating or giving rise to another or talk of one phenomenon being based in or constructed from another For example your computer screen is built of atoms in a complex configuration and the picture on the screen is based in the local illumination of various individual pixels Karen Bennett calls the family of relations invoked by such talk building relations Grounding is one currently popular such relation so too are composition property realization and controversially causation In chapters 2 and 3 Bennett argues that despite their differences building relations form an interestingly unified family and characterizes what all building relations have in

common In chapter 4 she argues that it s a mistake to think there is a strict divide between causal and noncausal determination Chapters 5 and 6 turn to the connections between building and fundamentality Bennett argues at length that both absolute and relative fundamentality are best understood in terms of building and that to say that one thing is more fundamental than another is to say no more than that certain patterns of building obtain In chapter 7 Bennett argues that facts about what builds what must be themselves built if a builds b there is something in virtue of which that is the case She also argues that the answer is a itself Finally in chapter 8 she defends an assumption that runs throughout the rest of the book namely that there indeed are nonfundamental built entities Doing so involves substantive discussion about the scope of Ockham s Razor Bennett argues that some nonfundamentalia are among the proper subject matter of metaphysics and thus that metaphysics is not best understood as the study of the fundamental nature of reality
