The Viva Natura Field Guide to the Amphibians, Reptiles, Birds, and Mammals of Western Mexico is the first publication of its kind written about the fauna of this region. The purpose of the field guide is to introduce the reader to the wealth of amphibians, reptiles, birds, and mammals of Western Mexico and help identify them in the field. This guide contains the vast majority of the conspicuous animals of the region. In this second edition, there are 230 species in this guide and a total of 440 full color photos. The guide is extremely easy to use. The book is completely bilingual, English and Spanish. The book commences with a brief introduction to the study area, its geography, climate, and ecosystems. Chapters dedicated to the four groups of fauna: amphibians, reptiles, birds, and mammals, follow. Each chapter begins with an introduction followed by photographic plates that depict conspicuous species of the study area. All photos were taken by the author himself and, with few exceptions, show animals in their natural habitat under completely natural conditions. Each species is described by both its common and scientific names and also by a set of icons that illustrate the species characteristics, such as its habits, diet, preferred habitat, protection status, etc. Color bands on the outer edge of each species plate indicate one of the three principal habitat types: Ocean Coast and Islands, Freshwater,

Forest and Gardens where this particular species can be observed most frequently Silhouette thumbs on the plates edges portray a typical member of each group of fauna making browsing the guide more efficient The final chapter of the book is dedicated to the conservation issues inside the study area The book is supported by a companion website where additional texts photos and also videos and sounds can be found *HowExpert Guide to Bioactive Terrariums for Reptiles*
