Language, Education, and Ideology Timothy Reagan, 2002-11-30 Language educators in general and foreign language educators in particular need to be aware of and sensitive to issues related to the interface and nexus of language education and ideology This work places foreign language education in its social context as well as applying critical pedagogy

to the foreign language classroom to help educators become more aware of the social political historical and economic contexts in which they work and which effect the classroom setting Research and scholarship in critical pedagogy is impressive extensive and powerful and has had significant impact on nearly every aspect of contemporary educational scholarship One area in which critical theory and critical pedagogy have been slow to have a noticeable effect however is that of language education especially foreign language education Further while a number of important works address issues of critical literacy there are no general works presenting critical perspectives on language and language issues targeting classroom teachers and other educators This work offers a broad and comprehensive overview of language and linguistic issues that emerge in the classroom context from a critical philosophical perspective The central focus is on the nexus of issues of language education and ideology as the title suggests and specific topics covered will include language and power linguistic purism the marginalization of second language education in the United States the phenomenon of ideological monolingualism in the United States the hierarchy of the less commonly taught languages both in terms of its etiology and the ideological and hegemonic functions this hierarchy serves nonmainstream language varieties in school settings issues of linguistic legitimacy in the classroom context the politics and ideological context of bilingual education in the United States language policy both as a tool for oppression and as a means of empowerment and finally the need for critical language awareness on the part of all educators

On Teaching Foreign Languages Marcela Ruiz-Funes, 2002-10-30 The author reports on a qualitative action research project on theories and practices in foreign language education The goal of the study was to relate the knowledge of foreign language teaching learning and acquisition gained through research to the beliefs and experiences of expert foreign language teachers The four participating teachers represent real teachers who distinguish themselves from their peers for their excellence in teaching foreign languages and their success in serving as clinical teachers Four theoretical issues are discussed in detail the proficiency movement the role of input teaching language in context and class participation motivation and discipline These aspects were selected because 1 they pose major challenges to foreign language interns and 2 they play an essential role in the learning acquisition process of second language students The major contribution of this study is the integration of the theoretical and practical dimensions The practical aspect is presented by the expert foreign language teachers who describe in their own words how and explain why they implement a given foreign language theory in their classrooms This integration provides foreign language teachers with a realistic view of foreign language education and establishes a dialogue between the university and the school communities A significant number of excerpts from discussion interview sessions conducted with the teachers are included

Ellis, 2008-03-29 This cutting edge volume describes the implications of Cognitive Linguistics for the study of second language acquisition SLA The first two sections identify theoretical and empirical strands of Cognitive Linguistics presenting them as a coherent whole The third

section discusses the relevance of Cognitive Linguistics to SLA and defines a research agenda linking these fields with implications for language instruction Its comprehensive range and tutorial style chapters make this handbook a valuable resource for students and researchers alike **American Book Publishing Record** ,2003 **Choice** ,2003 *TALK in Multilingual Classrooms* Erwin Maria Gierlinger, Marion Döll, Gudrun Isolde Keplinger, 2023 This volume presents a variety of concepts practices and experiences in the field of content learning through the additional language s of learners in a migration society It contains reflections on the complex interplay between the unifying characteristics of monolingual and multilingual programmes and their often diverging local and contextual interpretations and implementations In addition it describes how migration pedagogy has become a catalyst for discussing the ideological and power aspects of language learning and how a hegemony critical attitude needs to become an integral part of classroom language learning and communicating In this context the deliberate development of Teachers Awareness of Language Knowledge TALK through a variety of supportive measures is considered to be of central pedagogical importance Principles and practical applications of TALK for the classroom are discussed and evaluated *Forum* ,1991 **Cognitive and Educational Psychology for TESOL** Andrzej Cirocki, Bimali Indrarathne, Sharon McCulloch, 2024-08-19 This volume has been written specifically with TESOL teacher educators practitioners and classrooms in mind It is divided into three sections cognitive aspects of language learning individual differences and language learning difficulties and challenging behaviours Structured in this way it enables TESOL teacher educators and practitioners to better understand how language learners process and retain new information improving their overall ability to learn and remember In addition to supporting TESOL teacher educators and practitioners in promoting effective language learning this volume explains individual differences among language learners and the importance of developing learners emotional social and behavioural skills while addressing learning difficulties disorders disabilities and challenging behaviours whenever required The individual chapters are written in an accessible style to enable readers to explore various psychological concepts in their pedagogical practice by engaging in reflective teaching through action research This volume is a vital resource for pre and in service language teachers and will encourage language teacher educators to reassess their existing practices Chapter 2 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com **Resources in Education** ,2001-10 *Second Language Acquisition Theory and Pedagogy* Fred R. Eckman, Jean Mileham, Rita Rutkowski Weber, Diane Highland, Peter W. Lee, 2013-10-08 A volume on second language acquisition theory and pedagogy is at the same time a mark of progress and a bit of an anomaly The progress is shown by the fact that the two disciplines have established themselves as areas of study not only distinct from each other but also different from linguistic theory This was not always the case at least not in the United States The anomaly results from the fact that this book deals with the relationship between L2 theory and pedagogy despite the conclusion that there is currently no widely accepted theory of SLA Grouped into five sections the papers in this volume

consider questions about L2 theory and pedagogy at the macro level from the standpoint of the L2 setting consider input in terms of factors which are internal to the learner examine the question of external factors affecting the input such as the issue of whether points of grammar can be explicitly taught deal with questions of certain complex linguistic behaviors and the various external and social variables that influence learners and discuss issues surrounding the teaching of pronunciation factors that affect a non native accent

A Transdisciplinary Approach to International Teaching Assistants Stephen Daniel Looney, Shereen Bhalla, 2019-09-26 North American universities depend on international teaching assistants ITAs as a substantial part of the teaching labor force which has led to the idea of an ITA problem a deficiency model which is framed as a divergence between ITAs linguistic competence and undergraduates and their parents expectations This outdated positioning of ITAs as deficient diminishes the invaluable role they play within the academy This book argues instead for an approach to ITA which recognizes them as multilingual skilled migrant professionals who participate in and are discursively constructed through various participant frameworks modalities and activities The chapters in this volume offer state of the art research into ITA using a variety of methods and approaches and as such constitute a transdisciplinary perspective which argues for the importance of dialogue between research and practice
