Reconnecting Youth & Community, 1996 **Rebuild America** Scott Myers-Lipton, 2015-12-03. In Obama's America, public works is once again a part of the national dialogue. Today it is offered as a solution to the economic downturn and to the public infrastructure crisis. This timely book examines the reasons for the economic crisis facing Main Street and connects them to why the nation has structurally deficient bridges, weak levees, poorly maintained dams, and dilapidated schools. The book goes on to analyse the history of US public works, updating lessons from the New Deal to understand the most effective way to organise a modern US civic works project based on a civic works pilot project for the Gulf Coast. One chapter features new contributions by Howard Zinn, Angela Glover Blackwell, and other leading scholars and thinkers weighing in on how an US civic works project might solve our economic infrastructure and environmental crises.

Community Engagement in Post-Disaster Recovery Graham Marsh, Iftekhar Ahmed, Martin Mulligan, Jenny Donovan, Steve Barton, 2017-09-11. Community Engagement in Post Disaster Recovery reflects a wide array of practical experiences in working with disaster-affected communities internationally. It demonstrates that widely held assumptions about the benefits of community consultation and engagement in disaster recovery work need to be examined more critically because poorly conceived and hastily implemented community engagement strategies have sometimes exacerbated divisions within affected communities and/or resulted in ineffective use of aid funding. It is equally demonstrated that well-crafted, creative, and thoughtful programming is possible. The wide collection of case studies of practical experience from around the world is presented to help establish ways of working with communities experiencing great challenges. The book offers practical suggestions on how to give more substance to the rhetoric of community consultation and engagement in these areas of work. It suggests the need to work with a dynamic understanding of community formation that is particularly relevant when people experience unforeseen challenges and traumatic experiences. This title interrogates the concept of community through an extensive review of the literature and explores the ways of working with communities in transition and particularly in their recovery phases through an array of case studies in a range of socioeconomic and political contexts. Focused on the concept of community in post-disaster recovery solutions, an aspect which has received little critical interrogation in the literature, this book will be a valuable resource to students and scholars.
