Mathematical Correspondences and Critical Editions Maria Teresa Borgato, Erwin Neuenschwander, Irène Passeron, 2019-03-22. Mathematical correspondence offers a rich heritage for the history of mathematics and science as well as cultural history and other areas. It naturally covers a vast range of topics and not only of a scientific nature; it includes letters between mathematicians but also between mathematicians and politicians, publishers and men or women of culture. Wallis, Leibniz, the Bernoullis, D'Alembert, Condorcet, Lagrange, Gauss, Hermite, Betti, Cremona, Poincaré and van der Waerden are undoubtedly authors of great interest and their letters are valuable documents, but the correspondence of less well-known authors too can often make an equally important contribution to our understanding of developments in the history of science. Mathematical correspondences also play an important role in the editions of collected works contributing to the reconstruction of scientific biographies as well as the genesis of scientific ideas and in the correct dating and interpretation of scientific writings. This volume is based on the symposium *Mathematical Correspondences and Critical Editions* held at the 6th International Conference of the ESHS in Lisbon, Portugal, in 2014. In the context of the more than fifteen major and minor editions of mathematical correspondences and collected works presented in detail, the volume discusses issues such as: History and prospects of past and ongoing edition projects; Critical aspects of past editions; The complementary role of printed and digital editions; Integral and partial editions of correspondence; Reproduction techniques for manuscripts, images and formulae; and the editorial challenges and opportunities presented by digital technology. **Index N. 1**, Tables et index : Recherches sur Diderot et sur l'Encyclopédie : numéro 11 à numéro 20 Anne-Marie Chouillet, Sylviane

Albertan-Coppola, 1996. **Evolutionism in Eighteenth-century French Thought** Mary Efrosini Gregory, 2008. This book examines how eighteenth-century French theorists (Maillet, Montesquieu, La Mettrie, Buffon, Maupertuis, Diderot, Rousseau and Voltaire) addressed evolutionism. Each thinker laid down a building block that would eventually open the door to the mutability of species and a departure from the long-held belief that the chain of beings is fixed. This book describes

how the philosophes established a triune relationship among contemporary scientific discoveries random creationism propelled by the motive and conscious properties of matter and the notion of the chain of being along with its corollaries plenitude and continuity Also addressed is the contemporary debate over whether apes could ever be taught to speak as well as the issue of race and the family of man **Recherches sur Diderot et sur l'Encyclopédie**, 1996 *History of Linguistics* 2005 Douglas A. Kibbee, 2007-11-28 As each period in the history of the language sciences has chosen to focus on different key questions the study of that history promises to open our eyes to the variety of interesting questions that can be asked and answered taking off the blinders of contemporary preoccupations September 15 2005 linguists from twenty five countries gathered at the University of Illinois at Urbana Champaign to share their passion for the history of their discipline This volume is a distillation of many fine contributions from that conference shedding light on the many different approaches to the study of language Stranded Encyclopedias, 1700-2000 Linn Holmberg, Maria Simonsen, 2021-02-17 In *Stranded Encyclopedias 1700-2000 Exploring Unfinished Unpublished Unsuccessful Encyclopedic Projects* fourteen scholars turn to the archives to challenge the way the history of modern encyclopedism has long been told Rather than emphasizing successful publications and famous compilers they explore encyclopedic enterprises that somehow failed With a combined attention to script print and digital cultures the volume highlights the many challenges facing those who have pursued complete knowledge in the past three hundred years By introducing the concepts of stranded and strandedness it also provides an analytical framework for approaching aspects often overlooked in histories of encyclopedias books and learning the unpublished the unfinished the incomplete the unsuccessfully disseminated and the no longer updated By examining these aspects in a new and original way this book will be of value to anyone interested in the history of encyclopedism and lexicography the history of knowledge language and ideas and the history of books writing translating and publishing Chapters 1 and 4 are available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com) Diderot and Lessing as Exemplars of a Post-Spinozist Mentality Louise Crowther, 2010 Renowned as the chief challenger of traditional views of morality man's freedom and religion from 1650-1750 Benedict de Spinoza 1632-77 spread alarm and confusion throughout Europe through his writings Theologians and rulers desperately sought to ban the spread of Spinozist ideas and in the post-Spinozist climate eighteenth century thinkers often exasperated and perplexed attempted to cope with the fallout from this intellectual explosion The philosophical radicalism of Denis Diderot 1713-84 a French philosophe and Gotthold Ephraim Lessing 1729-81 a German philosopher well exemplifies the post-Spinozist mentality that permeated eighteenth century thinking As they grapple with the loss of intellectual moral and theological certainties Diderot and Lessing re-work post-Spinozist ideas and in many instances elucidate even more radical ideas than Spinoza himself had envisaged Tables et index Anne-Marie Chouillet, Annie Becq, 2002 The Man Who Flattened the Earth Mary Terrall, 2006-05-05 Self-styled adventurer literary wit philosopher and statesman of science Pierre Louis Moreau de

Maupertuis 1698 1759 stood at the center of Enlightenment science and culture Offering an elegant and accessible portrait of this remarkable man Mary Terrall uses the story of Maupertuis's life self-fashioning and scientific works to explore what it meant to do science and to be a man of science in eighteenth century Europe Beginning his scientific career as a mathematician in Paris Maupertuis entered the public eye with a much discussed expedition to Lapland which confirmed Newton's calculation that the earth was flattened at the poles He also made significant and often intentionally controversial contributions to physics life science navigation astronomy and metaphysics Called to Berlin by Frederick the Great Maupertuis moved to Prussia to preside over the Academy of Sciences there Equally at home in salons caf's scientific academies and royal courts Maupertuis used his social connections and his printed works to enhance a carefully constructed reputation as both a man of letters and a man of science His social and institutional affiliations in turn affected how Maupertuis formulated his ideas how he presented them to his contemporaries and the reactions they provoked Terrall not only illuminates the life and work of a colorful and important Enlightenment figure but also uses his story to delve into many wider issues including the development of scientific institutions the impact of print culture on science and the interactions of science and government Smart and highly readable Maupertuis will appeal to anyone interested in eighteenth century science and culture Terrall's work is scholarship in the best sense Her explanations of arcane 18th century French physics mathematics astronomy and biology are among the most lucid available in any language Virginia Dawson American Historical Review Winner of the 2003 Pfizer Award from the History of Science Society

Reading 1759 Shaun Regan, 2012-10-26

Reading 1759 investigates the literary culture of a remarkable year in British and French history writing and ideas Familiar to many as the British year of victories during the Seven Years War 1759 was also an important year in the histories of fiction philosophy ethics and aesthetics Reading 1759 is the first book to examine together the range of works written and published during this crucial year Offering broad coverage of the year's work in writing these essays examine key works by Johnson Voltaire Sterne Adam Smith Edward Young Sarah Fielding and Christopher Smart along with such group projects as the Encyclopédie and the literary review journals of the mid eighteenth century Organized around a cluster of key topics the volume reflects the concerns most important to writers themselves in 1759 This was a year of the new and the modern as writers addressed current issues of empire and ethical conduct forged new forms of creative expression and grappled with the nature of originality itself Texts written and published in 1759 confronted the history of Western colonialism the problem of prostitution in a civilized society and the limitations of linguistic expression Philosophical issues were also important in 1759 not least the thorny question of causation while in France state censorship challenged the Encyclopédie the central Enlightenment project Taking into its purview such texts and intellectual developments Reading 1759 puts the literary culture of this singular and singularly important year on the scholarly map In the process the volume also provides a self-reflective contribution to the growing body of annualized studies that focus on the literary output of specific years New

Essays on Diderot James Fowler, 2011-03-24 The great eighteenth century French thinker Denis Diderot 1713-84 once compared himself to a weathervane by which he meant that his mind was in constant motion In an extraordinarily diverse career he produced novels plays art criticism works of philosophy and poetics and also reflected on music and opera Perhaps most famously he ensured the publication of the Encyclopédie which has often been credited with hastening the onset of the French Revolution Known as one of the three greatest philosophes of the Enlightenment Diderot rejected the Christian ideas in which he had been raised Instead he became an atheist and a determinist His radical questioning of received ideas and established religion led to a brief imprisonment and for that reason no doubt some of his subsequent works were written for posterity This collection of essays celebrates the life and work of this extraordinary figure as we approach the tercentenary of his birth

Adopting the Melody of Term: An Emotional Symphony within **Recherches Sur Diderot Et Sur Lencyclopédie**

In a world consumed by monitors and the ceaseless chatter of instant interaction, the melodic splendor and mental symphony produced by the prepared word often diminish in to the back ground, eclipsed by the persistent noise and interruptions that permeate our lives. Nevertheless, located within the pages of **Recherches Sur Diderot Et Sur Lencyclopédie** an enchanting fictional value brimming with raw thoughts, lies an immersive symphony waiting to be embraced. Constructed by a masterful composer of language, this fascinating masterpiece conducts viewers on an emotional trip, well unraveling the hidden melodies and profound influence resonating within each cautiously constructed phrase. Within the depths of the poignant review, we can explore the book is key harmonies, analyze their enthralling publishing fashion, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
