Safe Handling of Foods Jeffrey M. Farber, Ewen C. Todd, 2000-03-03 A discussion of all aspects of safe food handling encompassing the production of all varieties of foods by the processing and foodservice industries where risk factors are likely to occur and what can be done to prepare food safely It examines categories of foods places where food is served and groups of food consumers The text also lists sources of food safety information available on the Internet

Food Safety Management Patricia Desmarchelier, 2013-11-01 Preparing food in the home or food services is frequently the last link in the food chain before food is consumed and in essence it entails catering cooking and serving of food Safe food handling at this point is critical in preventing foodborne illness and also in maintaining the food safety measures undertaken by other supply chain participants up to this point Challenges in managing food safety are related to many factors such as diversity of foods prepared within a facility or at a food event the multi ingredient or component nature of the food extremes in volume of foods handled and size of the operation wide ranges of food worker education and communication levels and high employment turnover and overriding socioeconomic factors enabling the practice of safe food handling worldwide All of these factors have to be considered in managing food safety in this sector
