Saga Of The Nerve Growth Factor:

The Saga of the Nerve Growth Factor Rita Levi-Montalcini, 1997 This volume is a collection of articles written by Nobel Laureate Rita Levi Montalcini and published from 1942 to 1995 Studies described in the first part set the stage for the discovery of a protein molecule which became known as the Nerve Growth Factor NGF described in detail in the second part The NGF synthesized in minute amounts in all vertebrate tissues plays an essential role in the differentiation and survival of several nerve cell populations in the peripheral and central nervous system The discovery of the NGF was defined by the Nobel Foundation as a milestone in developmental neurobiology and the author was awarded in 1986 with this prestigious award Studies pursued in subsequent years and still in progress have unveiled other fundamental properties of the NGF described in the third part of this volume

Women Scientists Magdolna Hargittai, 2015-03-04 Magdolna Hargittai uses over fifteen years of in depth conversation with female physicists chemists biomedical researchers and other scientists to form cohesive ideas on the state of the modern female scientist The compilation based on sixty conversations examines unique challenges that women with serious scientific aspirations face In addition to addressing challenges and the unjustifiable underrepresentation of women at the higher levels of academia Hargittai takes a balanced approach by discussing how some of the most successful of these women have managed to obtain professional success and personal happiness Women Scientists portrays scientists from different backgrounds different geographical regions eighteen countries from four continents and leaders from a variety of professional backgrounds including eight Nobel laureate women The book is divided into three sections Husband and Wife Teams Women at the Top and In High Positions Hargittai uses her own experience to introduce her first section on the lives of prominent scientific couples and addresses the joys and disadvantages of husband and wife teams The second section is a comprehensive exploration of the struggles and triumphs of women at the top Hargittai introduces women from countries where relatively little has been written about female scientists The final section focuses on women scientists involved with science administration and leadership Hargittai's biographical sketches role models for budding scientists The book is a much needed account of female presence and influence in the sciences

Rita Levi-Montalcini: Pioneer and Ambassador of Science Francesca Valente, My experience in childhood and adolescence of the subordinate role played by the female in a society run entirely by men had convinced me that I was not cut out to be a wife Rita Levi Montalcini Self assured from an early age Rita knew that she was cut out for a number of other roles and the difference she could make in the lives of others Prevailing over her father's traditional values Rita attended medical school and continued to study the development of the nervous system after graduating But as a Jew in fascist Italy her work came to a halt with discriminatory race laws and again later when she was forced into hiding from the Nazis In a makeshift lab built from black market items Rita continued her research in a small space she shared with her family Rita's courage to accept a fellowship in the United States when she didn't speak the language was repaid when her six

month stay stretched into thirty three years When at seventy seven years old she and Stanley Cohen won the Nobel Prize for their discovery of nerve growth factor now used in search of cures for Alzheimer s and Parkinson s diseases Rita felt like her life was just beginning Over the next two decades she spoke around the globe as an ambassador for science and humanitarianism and accomplished more than most do during an entire lifetime *Autonomic Neuroimmunology* John Bienenstock,M. Blennerhassett,E. Goetzl,2003-02-13 While it may appear that the nervous and immune systems exist as two separate entities groundbreaking observations have positively identified anatomic connections between elements of the nervous system and cells of adaptive immunity Building on this research *Autonomic Neuroimmunology* presents a scientific discussion of the current understanding of these vital neuroimmunological interactions and their implications for normal psychology and disease states Contributors document the cell biological mechanisms for the neuropeptide activation of mast cells and analyze how one or more adrenergic and peptidergic messengers modulate immunity They also explain the pathways by which cholinergic factors may suppress immunological inflammation The potential implications of organ system selective neuroimmunology for host defense and diseases are thoroughly discussed for the skin the intestines the bladder and the lungs With modern neuroimmunology now firmly established as a scientific discipline this volume supports this promising science as a pathway to novel diagnostic and therapeutic techniques for diseases of the neural immune and endocrine systems

Cholinergic Involvement in Neurodegenerative Diseases A. Claudio Cuello,2025-05-09 *Cholinergic Involvement in Neurodegenerative Diseases* Volume 211 reviews cholinergic function in the brain as it relates to Neurodegenerative disorders Coverage includes Alzheimer s dementia Down Syndrome Parkinson s Huntington s ALS and more In addition the anatomy of the cholinergic system is described as well as the distribution and function of receptors Discusses the cholinergic system as it relates to neurodegenerative diseases Encompasses broad comprehensive content on dementia Alzheimer s Parkinson s Huntington s ALS and more Covers anatomy and the distribution function of receptors

Neurotoxin Modeling of Brain Disorders — Life-long Outcomes in Behavioral Teratology Richard M. Kostrzewa,Trevor Archer,2016-07-13 This book is authored by leading experts who made major discoveries in neuroteratology research focused on modeling human neural developmental disorders Individual chapters address ADHD attention deficit hyperactivity disorder Lesch Nyhan disease psychoses and schizophrenia autism and models of Parkinson s Disease and tardive dyskinesia The effects of perinatal stress and agonist insults on life long outcomes are addressed as well as the overall effects of perinatal neurotoxins on development of specific neural phenotypic systems The book provides a unique compendium on how perinatal insults of various types can produce effects in brain that persist throughout the life span Researchers can derive insight into experimental approaches in this research field clinicians can develop insights into the influences of the many noxious and seemingly innocuous substances that might influence brain development in children

A to Z of Biologists, Updated Edition Lisa Yount,2019-10-01 Praise for the previous edition the coverage of women races

and international history in general make it a good source for exploring the many faces of biologists American Reference Books Annual useful School Library Journal Recommended Choice A to Z of Biologists Updated Edition uses the device of biography to put a human face on science a method that adds immediacy for the high school student who might have an interest in pursuing a career in biology This comprehensive survey features more than 150 entries and 50 black and white photographs Each profile focuses on a biologist s research and contributions to the field and their effect on scientists whose work followed Their lives and personalities are also discussed through incidents quotations and photographs The profiles are culturally inclusive and span a range of biologists from ancient times to the present day The entries on women and minority biologists especially articulate the obstacles that these biologists overcame in the process of reaching their goals This title is an ideal resource for students and general readers interested in the history of biology or the personal and professional lives of significant biologists People covered include Rachel Louise Carson 1907 1964 Paul Ehrlich 1854 1915 Dian Fossey 1932 1985 Galen c 130 c 201 Alexander von Humboldt 1769 1859 Shibasaburo Kitasato 1852 1931 Severo Ochoa 1905 1993 Linus Carl Pauling 1901 1994 Rosalyn Sussman Yalow 1921 2011 Lap Chee Tsui 1950 present Pamela Silver 1952 present

Protein Phosphorylation in Human Health Cai Huang,2012-09-06 15 chapters on protein phosphorylation and human health written by expert scientists Covers most important research hot points such as Akt AMPK and mTOR Bridges the basic protein phosphorylation pathways with human health and diseases Detailed and comprehensive text with excellent figure illustration **Signal Transduction and Smooth Muscle** Mohamed Trebak,Scott Earley,2018-08-06 All hollow organs such as blood vessels the gastrointestinal tract airways male and female reproductive systems and the urinary bladder are primarily composed of smooth muscle Such organs regulate flow propulsion and mixing of luminal contents and storage by the contraction and relaxation of smooth muscle cells Smooth muscle cells respond to numerous inputs including pressure shear stress intrinsic and extrinsic innervation hormones and other circulating molecules as well as autocrine and paracrine factors This book is a review of smooth muscle cell regulation in the cardiovascular reproductive GI and other organ systems with emphasis on calcium and receptor signaling Key selling features Focuses on smooth muscles of different types Describes ion channel signaling mechanisms Reviews calcium and receptor signaling Includes novel cutting edge methodologies Summarizes studies of mice with genetically encoding sensors in smooth muscle Chapter 9 of this book is freely available as a downloadable Open Access PDF under a CC BY 4 0 license https://s3.us-west-2.amazonaws.com/tandfbis-rt/files/docs/OpenAccess/Chapters/9781498774222_oachapter9.pdf **A to Z of Biologists** Lisa Yount,2014-05-14 Profiles more than 150 scientists from around the world who made important contributions to the field of biology including Claude Bernard Alexander Fleming Mary Claire King Ronald Ross and Tetsuko Takabe **Signal Transduction** Ijsbrand M. Kramer,2015-10-23 A reference on cellular signaling processes the third edition of Signal Transduction continues in the tradition of previous editions in providing a historical overview of how the concept of stimulus response coupling arose in the

early twentieth century and shaped our current understanding of the action of hormones cytokines neurotransmitters growth factors and adhesion molecules In a new chapter an introduction to signal transduction the book provides a concise overview of receptor mechanisms from receptor ligand interactions to post translational modifications operational in the process of bringing about cellular changes The phosphorylation process from bacteria to men is discussed in detail Signal transduction third edition further elaborates on diverse signaling cascades within particular contexts such as muscle contraction innate and adaptive immunity glucose metabolism regulation of appetite oncogenic transformation and cell fate decision during development or in stem cell niches The subjects have been enriched with descriptions of the relevant anatomical histological physiological or pathological condition In depth insight into a subject central to cell biology and fundamental to biomedicine including the search for novel therapeutic interventions Essential signaling events embedded in rich physiological and pathological contexts Extensive conceptual colour artwork to assist with comprehension of key topics Special emphasis on how molecular structure determines protein function and subcellular localization Employment of unambiguous protein names symbols in agreement with leading protein and gene databases allowing the learner to extend his her exploration on the web
