A Buddha Land in This World Lajos Brons,2022 In the early twentieth century Uchiyama Gud Seno o Gir Lin Qiuwu and others advocated a Buddhism that was radical in two respects Firstly they adopted a more or less naturalist stance with respect to Buddhist doctrine and related matters rejecting karma or other supernatural beliefs And secondly they held political and economic views that were radically anti hegemonic anti capitalist and revolutionary Taking the idea of such a radical Buddhism seriously A Buddha Land in This World Philosophy Utopia and Radical Buddhism asks whether it is possible to develop a philosophy that is simultaneously naturalist anti capitalist Buddhist and consistent Rather than a study of radical Buddhism then this book is an attempt to radicalize it The foundations of this radicalized radical Buddhism are provided by a realist interpretation of Yog c ra elucidated and elaborated with some help from thinkers in the broader Tiantai Tendai

tradition and American philosophers Donald Davidson and W V O Quine A key implication of this foundation is that only this world and only this life are real from which it follows that if Buddhism aims to alleviate suffering it has to do so in this world and in this life Twentieth century radical Buddhists as well as some engaged Buddhists came to a similar conclusion often expressed in their aim to realize a Buddha land in this world Building on this foundation but also on Mah y na moral philosophy this book argues for an ethics and social philosophy based on a definition of evil as that what is or should be expected to cause death or suffering On that ground capitalism should be rejected indeed but utopianism must be treated with caution as well which raises questions about what it means from a radicalized radical Buddhist perspective to aim for a Buddha land in this world Lajos Brons is a Dutch philosopher and social scientist living in Japan After receiving a PhD from the University of Groningen in the Netherlands for a dissertation on an aspect of the history and philosophy of the social sciences he gradually moved further and further into philosophical territory Currently Lajos is teaching logic ethics and philosophy at a university in Tokyo His research interests are divided over two broad areas in philosophy one is in the overlap of meta ethics and social political philosophy the other is in the intersection of philosophy of language metaphysics and epistemology Research in the former focuses on the relations between death suffering and compassion Research in the latter concerns the relations between language thought and reality and is heavily influenced by the philosophies of Donald Davidson and W V O Quine and by Buddhist philosophy More information about publications and research interests as well as Lajos s blog can be found at www.lajosbrons.net

Japanese Religions, 2003 *Discourse and Ideology in Medieval Japanese Buddhism* Richard K. Payne, Taigen Dan Leighton, 2006-04-18 The medieval period of Japanese religious history is commonly known as one in which there was a radical transformation of the religious culture This book suggests an alternate approach to understanding the dynamics of that transformation One main topic of analysis focuses on what Buddhism its practices and doctrines its traditions and institutions meant for medieval Japanese peoples themselves This is

achieved by using the notions of discourse and ideology and juxtaposing various topics on shared linguistic practices and discursive worlds of medieval Japanese Buddhism Collating contributions from outstanding scholars in the field of Buddhist Studies the editors have created an important work that builds on preliminary work on rethinking the importance and meaning of Kamakura Buddhism published recently in English and adds greatly to the debate **Young Man Shinran** Takamichi Takahatake, 2006-01-01 The Japanese Pure Land master Shinran 1173-1262 was a product of his age His angst in the period of the decay of the Dharma his subsequent search for spiritual liberation and his ultimate discovery of the path of the nembutsu could not have occurred isolated from the social temper of his time any more than his religious thought could have developed beyond the fabric of traditional Japanese Buddhist teachings and practices This study concentrates on the relationship between Shinran's experiences in the first half of his life and his historical and social environment Both the boldness and subtlety of his ideas begin to emerge in this examination moving beyond the hagiographical limitations often characteristic of research into the Shin tradition Numerous Shinran studies have been bound by the limitations of either purely historical or religious philosophical analysis But these two approaches have rarely been combined and since Shinran's early life and his cultural environment together constitute not only the basis but also the matrix of his mature thought and practice such a combination reveals both the power of his ideas and the cultural factors that stimulated their development
