knowledge the writer has of his subject the more arduous is the effort to express his thoughts in such simplicity as will make it understandable to those who have little or no knowledge of the subject he treats This is doubly so when the subject is one like sailing an art whose language is wholly technical and almost totally divorced from the common expressions of life It is impossible to translate sea language into land language nor is it possible to explain the conditions and operations of the art without employing sea terms In this work I have endeavored to avoid as far as is possible the employment of intricate or obscure technical language and where it is used have endeavored to explain the meaning and define the application This book is intended for the use of persons who are supposed to be altogether ignorant of the art of sailing It is a primer and therefore is almost absurdly simple and profuse in explanatory details But my experience as a teacher has taught me that such books cannot be too simple and that in order to be understandable they must be loaded with explanations of explanations until nothing is left to explain To those who know this will seem unnecessary but it must be remembered that many who will learn from this book have not only never handled a sailing boat but have never seen one before and have but extremely crude notions of how the canvas and helm are employed to drive and direct them In regard to the glossary The definitions given are those that define the terms as used in sailing or navigating small craft and may have a different meaning when applied to larger vessels It is very difficult to exactly define many nautical terms as they are words in action and consequently present different phases as they are differently employed In many cases only one who is a trained seaman can comprehend their exact purport or understand their significant application h Special Remarks The first question before you start to learn to sail is Do you know how to swim If you don t you have no business in a sailing boat in fact you have no business on the water No parent should allow his boy or girl to have a sailboat until they have learned to swim It is not difficult to learn to swim any child can be taught that art in ten days and it should be a compulsory course in all our schools If people knew how to swim nine tenths of the drowning accidents that do happen would not Every summer a large number of young people are drowned in this country through the overturning of boats or by falling overboard Had these persons been taught to swim the majority of them would not have been drowned A person who can swim has confidence If suddenly thrown in the water he or she retain their presence of mind but if unable to swim they become panic stricken and are not only drowned but in their struggles frequently drown others Another custom prolific of accident on the water is the overloading of boats The green hand should be warned against this practice Never take a lot of people out in a boat particularly a sailboat especially do not take out women and children or men who are not familiar with boats Another thing never play the fool in a boat A man who with others in a boat plays such tricks as rocking or trying to carry large sail in a breeze climbing a mast or any other silly stunt is a fool and is not fit to be trusted with any sort of a craft
