Felder, 2003 Comprehensive and riveting this important volume on women's history surveys the revolutionary changes in the social economic and political status of women during the twentieth century From the battles of suffragists and labor activists such as Carrie Chapman Catt and Rose Schneiderman to the provocative ideas of Betty Friedan here are the women of vision and courage who fought for equality and freedom But here too are the unexpected medical and technological discoveries that removed a woman's destiny from the restrictions of biology the electric washing machine anesthesia for childbirth sulfa drugs to stop post partum deaths the birth control pill and more This lively and provocative history covers groundbreaking legislation and Supreme Court rulings yet it doesn't neglect the often conflicting cultural forces from Emily Post and Barbie to the founding of the La Leche League and Ellen DeGeneres's sitcom that have shaped women's lives in today's world Book jacket **Spaceflight in the Shuttle Era and Beyond** Valerie Neal, 2017-06-27 An exploration of the changing conceptions of the Space Shuttle program and a call for a new vision of spaceflight The thirty years of Space Shuttle flights saw contrary changes in American visions of space Valerie Neal who has spent much of her career examining the Space Shuttle program uses this iconic vehicle to question over four decades worth of thinking about and struggling with the meaning of human spaceflight She examines the ideas images and icons that emerged as NASA Congress journalists and others sought to communicate rationales for or critiques of the Space Shuttle missions At times concurrently the Space Shuttle was billed as delivery truck and orbiting science lab near Earth station and space explorer costly disaster and pinnacle of engineering success The book's multidisciplinary approach reveals these competing depictions to examine the meaning of the spaceflight enterprise Given the end of the Space Shuttle flights in 2011 Neal makes an appeal to reframe spaceflight once again to propel humanity forward Neal may be the one person who knows the space shuttle program better than the astronauts who flew this iconic vehicle Her book casts new light on the program exploring its cultural significance through a thoughtful analysis As one who lived this history I gained much from her broader perspective and deep insights Kathryn D Sullivan retired NASA astronaut and former Administrator of the National Oceanic and Atmospheric Administration A much needed look at how to create a

cultural narrative for human spaceflight that resonates with millennials rather than the Apollo generation Quite valuable
Marcia Smith Editor SpacePolicyOnline com **Gender and the Race for Space** Erinn McComb, 2025-06-10 The American astronaut image was informed by early Cold War ideals of masculinity that helped mold a distinctly American anti communist masculinity which appeared on the surface anyway to resolve not only an American crisis of masculinity but helped win the Cold War on an ideological and popular level This American image focused on strict gender binaries of man as the protector controlling technology and containing communism while woman was the passive actor with spaceflight technology left behind in the home waiting for the return of the astronaut husband Allowing women to fly into space would have represented a lack of individual control with spaceflight technology **Women in Aviation and Space** Sandra H. Flowers, 1990

NASA's First Space Shuttle Astronaut Selection David J. Shayler, Colin Burgess, 2020-07-10 Unofficially they called themselves the TFNG or the Thirty Five New Guys Officially they were NASA's Group 8 astronauts selected in January 1978 to train for orbital missions aboard the Space Shuttle Prior to this time only pilots or scientists trained as pilots had been assigned to fly on America's spacecraft but with the advent of the innovative winged spacecraft the door was finally opened to non pilots including women and minorities In all 15 of those selected were categorised as Pilot Astronauts while the other 20 would train under the new designation of Mission Specialist Altogether the Group 8 astronauts would be launched on a total of 103 space missions some flying only once while others flew into orbit as many as five times Sadly four of their number would perish in the Challenger tragedy in January 1986 In their latest collaborative effort the authors bring to life the amazing story behind the selection of the first group of Space Shuttle astronauts examining their varied backgrounds and many accomplishments in a fresh and accessible way through deep research and revealing interviews Throughout its remarkable 30 year history as the workhorse of NASA's human spaceflight exploration twice halted through tragedy the Shuttle fleet performed with magnificence So too did these 35 men and women swept up in the dynamic thrust and ongoing development of America's Space Shuttle program This book on the Group 8 Astronauts the TFNGs is an excellent summation of the individuals first selected for the new Space Shuttle Program It provides insight into what it took to first get the Space Shuttle flying For any space enthusiast it is a must read Robert L Crippen PLT on STS 1 As a reader I had many moments where long lost memories of the triumph and tragedy of the space shuttle program were brilliantly reawakened at the turn of a page Loved it This is a must have book for every space enthusiast's library TFNG Mission Specialist Astronaut Richard Mike Mullane author of *Riding Rockets The Outrageous Tales of a Space Shuttle Astronaut* Many of the anecdotes in the book brought back memories of challenges opportunities and a team of men and women who were committed not just to the space program but to one another I've gone back to it several times as a reference source TFNG Steve Hawley 5 time Space Shuttle Mission Specialist Astronaut The TFNG book is incredible and amazingly thorough The detail in the book is awesome It is my go to book for any of the details I've forgotten TFNG Dr Rhea Seddon 3 time Space Shuttle Mission Specialist

Astronaut I can't believe how detailed and complete it is FANTASTIC work TFNG Robert L Hoot Gibson 5 time Space Shuttle Pilot Commander and former Chief of the NASA Astronaut Office Integrating Women into the Astronaut Corps Amy E. Foster, 2011-12-01 Why Amy E Foster asks did it take two decades after the Soviet Union launched its first female cosmonaut for the United States to send its first female astronaut into space In answering this question Foster recounts the complicated history of integrating women into NASA's astronaut corps NASA selected its first six female astronauts in 1978 Foster examines the political technological and cultural challenges that the agency had to overcome to usher in this new era in spaceflight She shows how NASA had long developed progressive hiring policies but was limited in executing them by a national agenda to beat the Soviets to the moon budget constraints and cultural ideas about women's roles in America Lively writing and compelling stories including personal interviews with America's first women astronauts propel Foster's account Through extensive archival research Foster also examines NASA's directives about sexual discrimination the technological issues in integrating women into the corps and the popular media's discussion of women in space Foster puts together a truly original study of the experiences not only of early women astronauts but also of the managers and engineers who helped launch them into space In documenting these events Foster offers a broader understanding of the difficulties in sexually integrating any workplace even when the organization approaches the situation with as positive an outlook and as strong a motivation as did NASA Apollo in the Age of Aquarius Neil M. Maher, 2017-03-27 In summer 1969 astronauts landed on the moon and hippie hordes descended on Woodstock two era defining events that are not entirely coincidental Neil M Maher shows how NASA's celestial aspirations were tethered to terrestrial concerns of the time the civil rights struggle the antiwar movement environmentalism feminism and the culture wars
