## **Salmon Aquaculture:**

**Becoming Salmon** Marianne E. Lien, 2015-06-30 *Becoming Salmon* is the first ethnographic account of salmon aquaculture the most recent turn in the human history of animal domestication As fish are enrolled in new regimes of marine domestication traditional distinctions between fish and animals are reconfigured recasting farmed fish as sentient beings capable of feeling pain and subject to animal welfare legislation Drawing on ethnographic fieldwork in Norway and Australia the author traces farmed Atlantic salmon through contemporary industrial practices and shows how salmon are bred to be hungry globally mobile and alien in their watersheds of origin Attentive to the economic context of industrial food production as well as the mundane practices of caring for fish it offers novel perspectives on domestication human animal relations and food production Provided by publisher *The Economics of Salmon Aquaculture* Frank Asche, Trond Bjørndal, 2011-03-01 First published in 1990 *The Economics of Salmon Aquaculture* was the first book to systematically analyse the salmon aquaculture industry from both a market and production perspective Since publication of the first edition of this book the salmon aquaculture industry has grown at a phenomenal rate with salmon now being consumed in more than 100 countries worldwide This second edition of a very popular and successful book brings the reader right up to date with all the major current issues pertaining to salmon aquaculture Commencing with an overview of the production process in aquaculture the following chapters provide in depth coverage of the sources of the world's supply of salmon the growth in productivity technological changes environmental issues markets market structure and competitiveness lessons that can be learnt from the culture of other species optimal harvesting techniques production planning and investment in salmon farms Written by Frank Asche and Trond Bjørndal two of the world's leading experts in the economics of aquaculture this second edition of *The Economics of Salmon Aquaculture* provides the salmon aquaculture industry with an essential reference work including a wealth of commercially important information This book is also a valuable resource for upper level students and professionals in aquaculture and economics and libraries in all universities and research establishments where these subjects are studied and taught should have copies of this important book on their shelves *Salmon Aquaculture* Knut Heen, Robert L. Monahan, Fred Utter, 1993-12-14 A comprehensive guide to the responsible development of salmon aquaculture to the mutual benefits of all resources and individuals affected by this industry Geographic distribution approaches to problems of rearing in open and closed marine systems techniques dealing with transportation and feeding consequences of environmental factors on aquaculture and regulations and economic considerations are among the issues discussed *Evaluation of Closed-containment Technologies for Saltwater Salmon Aquaculture* Edward Michael Pakenham Chadwick, G. Jay Parsons, Boumy Sayavong, 2010 **Cage Aquaculture** Food and Agriculture Organization of the United Nations, 2007-01-01 This document contains nine FAO commissioned papers on cage aquaculture including a global overview one country review for China and seven regional reviews for Asia excluding China northern Europe the Mediterranean sub-Saharan Africa Latin

America and the Caribbean northern America and Oceania The content of the papers is based on the broad experience and sound knowledge of the authors with advice and help received from many experts and reviewers around the globe The papers were presented to a distinguished audience of some 300 participants from over 25 countries during the FAO Special Session on Cage Aquaculture Regional Reviews and Global Overview at the Asian Fisheries Society AFS Second International Symposium on Cage Aquaculture in Asia CAA2 held in Hangzhou China from 3 to 8 July 2006 *Aquaculture* United States. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Fisheries and Wildlife Conservation and the Environment,1977 **Aquaculture, Innovation and Social Transformation** Keith Culver,David Castle,2008-09-15 Keith Culver and David Castle Introduction Aquaculture is at the leading edge of a surprisingly polarized debate about the way we produce our food According to the United Nations Food and Agriculture Organization aquaculture production has increased 8.8% per year since 1970 far surpassing productivity gains in terrestrial meat production at 2.8% in the same period FAO 2007 Like the green revolution before it the blue revolution in aquaculture promises rapidly increased productivity through technology driven intensification of aquaculture animal and plant production Costa Pierce 2002 The Economist 2003 Proponents of further aquaculture development emphasize aquaculture's ancient origins and potential to contribute to global food security during an unprecedented collapse in global fisheries World Fish Center Meyers and Worm 2003 Worm et al 2006 For them technology driven intensification is an ordinary and unremarkable extension of past practice Opponents counter with images of marine and freshwater environments devastated by intensive aquaculture practices producing unsustainable and unhealthy food products They view the promised revolution as a scam nothing more than clever marketing by profit hungry shareholders looking for ways to distract the public from the real harms done by aquaculture The stark contrast between proponents and opponents of modern aquaculture recalls decades of disputes about intensive terrestrial plant and animal agriculture disputes whose vigor shows that the debate is about much more than food production Ruse and Castle 2002 **Responsible Marine Aquaculture** Robert R. Stickney,James P. McVey,2002-01-01 With the expansion of the world aquaculture industry there has been increasing concern over sustainability and environmental impact This book addresses this topical issue concentrating on marine aquaculture **The Outlook for Salmon Aquaculture Products in World Markets**,1984 **Sustainable Fish Farming** Helge Reinertsen,Herborg Haaland,1995-06-01 The aim of the symposium on which this text is based was to discuss the current practices of the fish farming industry and search for sustainable directions for future development Topics covered include resources for fish food in aquaculture genetics and environment and aquaculture interaction **Environmental Effects of Marine Finfish Aquaculture** Barry Hargrave,2005-08-24 Environmental risks associated with large scale marine finfish cage aquaculture cast doubt on the sustainability of the industry This book divides the topic into its broad parts Eutrophication Sedimentation and Benthic Impacts Changes in Trophic Structure and Function and Managing Environmental Risks and goes further to analyze methods

and models currently used to measure near and far field environmental effects of finfish mariculture and and their implications for management      Aquaculture and the Environment Barbara Sladonja,2011-12-22 Aquaculture is the art science and business of cultivating aquatic animals and plants in fresh or marine waters It is the extension of fishing resulted from the fact that harvests of wild sources of fish and other aquatic species cannot keep up with the increased demand of a growing human population Expansion of aquaculture can result with less care for the environment The first pre requisite to sustainable aquaculture is clean wate but bad management of aquatic species production can alter or even destroy existing wild habitat increase local pollution levels or negatively impact local species Aquatic managers are aware of this and together with scientists are looking for modern and more effective solutions to many issues regarding fish farming This book presents recent research results on the interaction between aquaculture and environment and includes several case studies all over the world with the aim of improving and performing sustainable aquaculture      **Protecting Wild Atlantic Salmon from Impacts of Salmon Aquaculture** Gareth Porter,2003      **Governability of Fisheries and Aquaculture: Theory and Applications** Maarten Bavinck,Ratana Chuenpagdee,Svein Jentoft,Jan Kooiman,2013-04-10 Following from Fish for Life Interactive Governance for Fisheries Kooiman et al 2005 which presents an interdisciplinary and intersectoral approach to the governance of capture and aquaculture fisheries this volume pursues what interactive governance theory and the governability perspective contribute to the resolution of key fisheries problems these include overfishing unemployment and poverty food insecurity and social injustice Since these problems are varied and can be felt among governments resource users and communities globally the diagnosis must be holistic and take account of principles institutions and operational conditions The authors argue that wicked problems and institutional limitations are inherent to each setting and must be included in the analysis The volume thereby offers a new lens and a systematic approach for analysing the nature of problems and challenges concerning the governance of fisheries explores where these problems are situated and how potential solutions may be found It now seems clear that the crisis in the world s fisheries is a much larger and more complex problem than many had imagined Yet examining it through the lens of governability may offer the best hope for alleviating it as well as alleviating similar crises in other social systems James R McGoodwin Professor Emeritus University of Colorado

**Differentiating and defining 'exposed' and 'offshore' aquaculture and implications for aquaculture operation, management, costs, and policy** Tyler Sclodnick, Kevin Gerald Heasman, Bela H. Buck,2025-02-17 Ocean based aquaculture has typically occurred in protected coastal environments however the industry and been expanding into offshore locations over the past few decades The term offshore has been used to broadly define any aquaculture facility that either is spatially far from shore or exposed to high energy environments even though these are different situations In most cases however offshore is not used in its primary sense namely the distance from the coastline A definition for offshore in the context of aquaculture has not been clearly defined and continues to lead to ambiguity and confusion among industry

participants support industries academics and regulators Recent advances in the sector and a growing need to produce seafood from offshore environments creates a necessity for research and analysis to define and characterize the environments currently described as offshore and create a framework for industry members to understand and describe ocean environments effectively The research topic seeks to create a framework for describing aquaculture environments in the context of distance from shore and ocean energy as well as explore how these two parameters impact aquaculture technology operations regulation and economics Submissions should add to the understanding of offshore or open ocean aquaculture farms specifically in the context of the environment in which they operate A focus will be on creating definitions for the terms offshore open ocean and high energy in the context of marine farming such that these terms can be used more effectively in the future
