**Michael Patten, Guy McCaskie, Philip
Unitt**

Salton Sea:

The Salton Sea Karl Anderson, 2011 The Salton Sea was an accident of man created when heavy rainfall caused the Rio Colorado to swell and breach an Imperial Valley dike in 1905 For two years water flowed into the Salton Sink and ancient Lake Cahuilla Today the sea is 227 feet below sea level covers approximately 376 square miles and is California's largest lake During the early 1900s it became an important bird and waterfowl refuge When many species of fish were introduced the Salton Sea also became popular for boating fishing hunting and camping activities Motels yacht clubs and marinas developed around Salton City and North Shore During recent decades the sea has become polluted from agricultural runoff creating a doubtful future for the Salton Sea However it remains a sanctuary for anyone who enjoys bird watching desert landscapes or beautiful farmlands

The Settler Sea Traci Brynne Voyles, 2021-11 2022 Choice Outstanding Academic Title 2022 WHA Caughey Western History Prize for the most distinguished book on the American West Can a sea be a settler What if it is a sea that exists only in the form of incongruous head scratching contradictions a wetland in a desert a wildlife refuge that poisons birds a body of water in which fish suffocate Traci Brynne Voyles's history of the Salton Sea examines how settler colonialism restructures physical environments in ways that further Indigenous dispossession racial capitalism and degradation of the natural world In other words The Settler Sea asks how settler colonialism entraps nature to do settlers work for them The Salton Sea Southern California's largest inland body of water occupies the space between the lush agricultural farmland of the Imperial Valley and the austere desert called America's Sahara The sea sits near the boundary between the United States and Mexico and lies at the often contested intersections of the sovereign lands of the Torres Martinez Desert Cahuilla and the state of California Created in 1905 when overflow from the Colorado River combined with a poorly constructed irrigation system to cause the whole river to flow into the desert this human maintained body of water has been considered a looming environmental disaster The Salton Sea's very precariousness the way it sits uncomfortably between worlds existing always in the interstices of human and natural influences between desert and wetland between the skyward pull of the sun and the constant inflow of polluted water is both a symptom and symbol of the larger precariousness of settler relationships to the environment in the West and beyond Voyles provides an innovative exploration of the Salton Sea looking to the ways the sea its origins and its role in human life have been vital to the people who call this region home
