I. Ebbe,2013-05-13 Comparative and International Criminal Justice Systems Policing Judiciary and Corrections Third Edition examines the history dynamics structure organization and processes in the criminal justice systems in a number of selected countries Designed for courses in comparative criminal justice systems comparative criminology and international criminal law it explores systems in the United States Ireland Israel Argentina Sierra Leone China Russia and Poland A descriptive and quantitative analysis of criminal justice processes this text goes beyond a mere analysis of individual systems Instead the book compares these criminal justice models with each other and contrasts them with United Nations conventions World Courts of Justice International Court of Justice International Military Tribunal International Criminal Tribunal International Criminal Court Understanding these comparisons is crucial for a proper grasp of transnational crimes The book shows how the national criminal justice systems and the United Nations judicial systems complement each other when adjudicating transnational crimes in the international community It analyzes the nature of crime and criminal law explores basic theories of crime and discusses the various sources of international law It also examines the inherent pitfalls in comparing international crime rates and discusses terrorism and its control Unique to this edition is a thorough unbiased study of the Islamic justice system Each chapter focuses on a select region and includes crime data and arrest prosecution and conviction rates where appropriate This allows readers looking for information on the criminal justice systems of any part of the world to easily find the relevant section A sound approach to understanding the laws of various nations and international criminal and humanitarian laws this volume provides sage insight into the sociological explanations of criminal law and crime *Learning To Be Modern* Byron Marshall,2018-03-08 Emphasizing the political discourse and conflict that have surrounded Japanese education this book focuses on the three main issues of central versus local control elitism versus equality and nationalism versus universalism *An Introduction to Japanese Society* Yoshio Sugimoto,2020-11-12 Taking a sociological approach this text provides a sophisticated highly readable introduction to Japanese society **Cultural and Social Division in Contemporary Japan** Yoshikazu Shiobara,Kohei Kawabata,Joel Matthews,2019-07-30 The recent manifestation of exclusionism in Japan has emerged at a time of intensified neoliberal economic policies increased cross border migration brought on by globalization the elevated threat of global terrorism heightened tensions between East Asian states over historical and territorial conflicts and a backlash by Japanese conservatives over perceived historical apologism The social and political environment for minorities in Japan has shifted drastically since the 1990s yet many studies of Japan still tend to view Japan through the dominant discourses of ethnic homogeneity *tanitsu minzoku shakai* and middle class society *so churyu shakai* which positions the exclusion of minorities as

an exceptional phenomenon While exclusionism has been recognized as a serious threat to minority groups it has not often been considered a representative issue for the whole of Japanese society This tendency will persist until the discourses of tanitsu minzoku shakai and so churyu shakai are systematically debunked and Japan is widely recognized as both multiethnic and socio economically stratified Today as with most advanced capitalist countries serious social divides occasioned by the impacts of globalization and neoliberalism have destabilized Japanese society This book explores not only how Japanese society is diversified and unequal but also how diversity and inequality have caused people to divide into separate realities from which conflict and violence have emerged It empirically examines the current situation while considering the historical development of exclusionism from the interdisciplinary viewpoints of history policy studies cultural studies sociology and cultural anthropology In addition to analyzing the realities of division and exclusionism the authors propose theoretical alternatives to overcome such cultural and social divides

The Oxford Encyclopedia of Women in World History

Bonnie G. Smith, 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated womens daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune womens and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high school students and general readers alike

Japanese Corrections

Elmer Hubert Johnson, 1996 Criminologist Johnson is one of the few westerners to have access to Japanese prisons His account pivots on the characteristics of the major elements how personnel carry out their responsibilities and why duties and activities are carried out in a particular way He explores cultural reasons for the low number of convicted criminals going to prison and attributes the low degree of prison violence to the industrial operations of adult prisons and the education vocational training and counseling in juvenile prisons Annotation copyright by

Book News Inc Portland OR Criminalization and Prisoners in Japan Elmer Hubert Johnson, 1997 In his second book to

deal with Japanese corrections Elmer H Johnson explores the cultural heritage and structure of the criminal justice administration that underlies Japan's reluctance to use imprisonment which he first examined in Japanese Corrections Managing Convicted Offenders in an Orderly Society Here Johnson introduces the concept of criminalization its implications and its two versions that differentiate four of the six cohorts who have entered prison in increasing numbers in recent decades yakuza Japanese mafia adult traffic offenders women drug offenders and juvenile drug and traffic offenders Foreigners and elderly inmates the other two cohorts elude criminalization as groups but also have become prisoners in greater numbers for other reasons

Disaffected Democracies Susan J. Pharr, Robert D. Putnam, 2018-06-05 It is a notable irony that as democracy replaces other forms of governing throughout the world citizens of the most established and prosperous democracies the United States and Canada Western European nations and Japan increasingly report dissatisfaction and frustration with their governments Here some of the most influential political scientists at work today examine why this is so in a volume unique in both its publication of original data and its conclusion that low public confidence in democratic leaders and institutions is a function of actual performance changing expectations and the role of information The culmination of research projects directed by Robert Putnam through the Trilateral Commission and the American Academy of Arts and Sciences these papers present new data that allow more direct comparisons across national borders and more detailed pictures of trends within countries than previously possible They show that citizen disaffection in the Trilateral democracies is not the result of frayed social fabric economic insecurity the end of the Cold War or public cynicism Rather the contributors conclude the trouble lies with governments and politics themselves The sources of the problem include governments diminished capacity to act in an interdependent world and a decline in institutional performance in combination with new public expectations and uses of information that have altered the criteria by which people judge their governments Although the authors diverge in approach ideological affinity and interpretation they adhere to a unified framework and confine themselves to the last quarter of the twentieth century This focus together with the wealth of original research results and the uniform strength of the individual chapters sets the volume above other efforts to address the important and increasingly international question of public dissatisfaction with democratic governance This book will have obvious appeal for a broad audience of political scientists politicians policy wonks and that still sizable group of politically minded citizens on both sides of the Atlantic and Pacific

A Path Toward Gender Equality Yoshie Kobayashi, 2004-04-23 The first study of state feminism in a non western nation state this volume focuses on the activities and roles of the Women's Bureau of the Ministry of Labor in post World War II Japan While state feminism theory possesses a strong capability to examine state society relationships in terms of feminist policymaking it tends to neglect a state's activity in improving women's status and rights in non western nations where the feminist movements are apathetic or antagonistic to the state and where the state also creates a vertical relationship with feminist groups
