This is the first time this historically important literary phenomenon which stands behind the enormous modern development of science fiction has been studied thoroughly and accurately. The heart of the book is a series of descriptions of all 1,835 stories published during this period plus bibliographic information. Supplementing this are many useful features: detailed histories of each of the magazines; an issue-by-issue roster of contents; a technical analysis of the art work; brief authors' biographies; poetry and letter indexes; a theme and motif index of approximately 30,000 entries; and general indexes. *Science Fiction: The Gernsback Years* is not only indispensable for reference librarians, collectors, readers, and scholars interested in science fiction; it is also of importance to the study of popular culture during the Great Depression in the United States. Most of its data, which are largely based on rare and almost unobtainable sources, are not available elsewhere. **New York Magazine**, 1990-06-18 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea. [Official Wisconsin School Library List](#), 1962 **Imagining Mars** Robert Crossley, 2011-01-03 Mars in the human imagination from the invention of the telescope to the present. For centuries the planet Mars has captivated astronomers and inspired writers of all genres. Whether imagined as the symbol of the bloody god of war, the cradle of an alien species, or a possible new home for human civilization, our closest planetary neighbor has played a central role in how we think about ourselves in the universe. From Galileo to Kim Stanley Robinson, Robert Crossley traces the history of our fascination with the red planet as it has evolved in literature, both fictional and scientific. Crossley focuses specifically on the interplay between scientific discovery and literary invention, exploring how writers throughout the ages have tried to assimilate or resist new planetary knowledge. Covering texts from the 1600s to the present, from the obscure to the classic, Crossley shows how writing about Mars has reflected the desires and social controversies of each era. This astute and elegant study is perfect for science fiction
