African Security in the Anthropocene Hussein Solomon,Jude Cocodia,2023-03-11 Much has been written on security in Africa its democratic deficit poor civil military relations and myriad conflicts but these are often treated in isolation from one another This book takes a different approach as it links all of these issues to the dynamics of the Anthropocene Penned by African scholars on the continent and in the diaspora it examines the different challenges not as separate entities but as outcomes of the Anthropocene Age In this geological epoch humans have become a global force unfortunately not necessarily for good The interaction between humans and the climate the effects of waste the impact of pollution on marine and terrestrial ecosystems the loss of biodiversity and the change in the chemical composition of the soil oceans and atmosphere are key identifiers of the age of the Anthropocene This has fueled conflict and instability from the vast swathes of the Sahel to Somalia Responding to these issues of insecurity without understanding their inter connectedness and how this relates to the environment can only result in failure From this perspective the current structures in place are inadequate for the task of confronting insecurity at the state and continental levels as represented by the African Union What is needed is a radical reevaluation of Africa s security architecture and approach to security This necessitates pooling sovereignty on a continental and global level It necessitates less state centric responses that include civil society and the business community as equal partners of states in order to collectively confront insecurity in the age of the Anthropocene The authors are academics policy makers and military veterans who have worked in building capacity on the African continent The book is comprehensive in scope strong on theory pragmatic in policy and

reflects experience from the field The authors approach makes the book easy interesting and intriguing States, Scarcity, and Civil Strife in the Developing World Colin H. Kahl, 2006 Over the past several decades civil and ethnic wars have undermined prospects for economic and political development destabilized entire regions of the globe and left millions dead States Scarcity and Civil Strife in the Developing World argues that demographic and environmental stress the interactions among rapid population growth environmental degradation inequality and emerging scarcities of vital natural resources represents one important source of turmoil in today s world Kahl contends that this type of stress places enormous strains on both societies and governments in poor countries increasing their vulnerability to armed conflict He identifies two pathways whereby this process unfolds state failure and state exploitation State failure conflicts occur when population growth environmental degradation and resource inequality weaken the capacity legitimacy and cohesion of governments thereby expanding the opportunities and incentives for rebellion and intergroup violence State exploitation conflicts in contrast occur when political leaders themselves capitalize on the opportunities arising from population pressures natural resource scarcities and related social grievances to instigate violence that serves their parochial interests Drawing on a wide array of social science theory this book argues that demographically and environmentally induced conflicts are most likely to occur in countries that are deeply split along ethnic religious regional or class lines and which have highly exclusive and discriminatory political systems The empirical portion of the book evaluates the theoretical argument through in depth case studies of civil strife in the Philippines Kenya and numerous other countries The book concludes with an analysis of the challenges demographic and environmental change will pose to international security in the decades ahead

The Handbook of Cross-Border Ethnic and Religious Affinities Charity Butcher,2019-04-16 Increasingly ethnic and religious variables are taken into account to explain conflict and relations between nations However ethnic and religious groups exist beyond the confines of frontiers In Africa for example hundreds of ethnic groups were divided by colonial borders and many retained kinship connections to their brethren in other countries thus creating cross border ethnic religious affinity Such cross border connections affect a variety of foreign policy

from diplomacy to the use of force An internal problem can spread to other states or external actors can become involved in domestic disputes due to such factors Therefore data on cross border connections are essential to measure and assess their actual or potential effects on foreign policy or conflict This unique resource serves both qualitative and quantitative researchers For ease of use it is divided in sections for each region of world with the entries organized by pairs of contiguous countries Each entry for a pair of countries briefly discusses the ethnic and religious groups that are common to both countries and the historical and current connections between these groups The entries are organized based on the Correlates of War country codes which are widely used by researchers and allow for country pairs to be organized geographically within each section to facilitate easy use of the data
