The Merovingian Kingdoms, 450-751 Ian N. Wood, 1994 The centuries immediately following the collapse of Roman rule in what is now France are an extraordinarily tangled time that is frequently dismissed as no more than a chaotic prelude to Charlemagne and the Carolingian Dynasty Ian Wood's aim is to demonstrate that there was more to Merovingian France than fratricidal kinglets murderous queens corrupt bishops and otherworldly monastic saints *The Merovingian Kingdoms 450-751* Ian Wood, 2008 **From Roman Provinces to Medieval Kingdoms** Thomas F.X. Noble, 2006-04-07 This is a prestigious collection of revisionist thinking on the key question of how did the middle ages begin Including a wealth of material on the origins of the Barbarian people and their tribes and a clear introduction to each section this is an invaluable student reference *Hagiography and the History of Latin Christendom, 500-1500*, 2019-12-02 Hagiography and the History of Latin Christendom 500 1500 shows the historical value of texts celebrating saints both the most abundant medieval source material and among the most difficult to use Hagiographical sources present many challenges they are usually anonymous often hard to date full of topoi and unstable Moreover they are generally not what we would consider factually accurate The volume's twenty one contributions draw on a range of disciplines and employ a variety of innovative methods to address these challenges and reach new discoveries about the medieval world that extend well beyond the study of sanctity They show the rich potential of hagiography to enhance our knowledge of that world and some of the ways to unlock it Contributors are Ellen Arnold Helen Birkett Edina Bozoky Emma Campbell Adrian Cornell du Houx David Defries Albrecht Diem Cynthia Hahn Samantha Kahn Herrick J K Kitchen Jamie Kreiner Klaus Krüner Mathew Kuefler Katherine J Lewis Giovanni Paolo Maggioni Charles M. The Lost Treasure of the Knights Templar Steven Sora, 1999-02-01 A compelling argument that connects the lost treasure of the Knights Templar to the mysterious money pit on Oak Island Nova Scotia that has baffled treasure hunters for two centuries Fascinating occult detective work linking the Cathars the Scottish Masons and Renne le Chateau to the elusive treasure pit on Oak Island Draws on new evidence recently unearthed in Italy France and Scotland to provide a compelling solution to one of the world's most enduring mysteries When the Order of Knights Templar was ruthlessly dissolved in 1307 by King Philip the Fair of France it possessed immense wealth and political power yet none of the treasure the Templars amassed has ever been found Their treasure is rumored to contain artifacts of spiritual significance retrieved by the order during the Crusades including the genealogies of David and Jesus and documents that trace these bloodlines into the royal bloodlines of Merovingian France Placing a Scottish presence in the New World a century before Columbus Steven Sora paints a credible scenario that the Sinclair clan of Scotland transported the wealth of the Templars entrusted to them as the Masonic heirs of the order to a remote island off the shores of present day Nova Scotia The mysterious money pit there is commonly believed to have been built before 1497 and has guarded its secret contents tenaciously despite two centuries of determined efforts to unearth it All of these efforts one even financed by American president Franklin Delano Roosevelt have failed thanks to an elaborate system of booby traps false beaches hidden drains and other hazards of remarkable ingenuity and technological complexity

R. Dark, 2016-10-06 Since the end of the Cold War analysts of international politics have given much greater attention to issues of change It has become

increasingly clear to specialists from many fields that any understanding of large scale political change must encompass far longer timescales than has been usual in the study of world politics and must incorporate multi disciplinary perspectives This book evaluates and draws on relevant theoretical approaches from other disciplines such as sociology economics geography history anthropology and archaeology as well as evolutionary theory and the mathematical study of complexity Using an epistemological framework Dark sets out a theory of long term world political change the theory of Macrodynamics This is then applied to historical anthropological and archaeological data to explain the changing forms of political organization from the earliest human societies to the late twentieth century The resulting analysis is a reinterpretation of the processes of global political change in the past and present This in turn opens new areas of enquiry in the study of international relations and has profound implications for how we understand the changing world of today

The Dangers of Ritual Philippe Buc,2021-07-13 Central to current understandings of medieval history is the

concept of political ritual encompassing events from coronations to funerals entries into cities civic games banquets hunting acts of submission or commendation and more Ritual asks Philippe Buc In The Dangers of Ritual he boldly argues that the concept shouldn't be so central after all Modern day scholars gently seduced by twentieth century theories of ritual often misinterpret medieval documents that ostensibly describe such events in part because they fail to appreciate the intentions behind them The book begins with four case studies whose arrangement backward from texts on tenth century kingship to fourth century representations of Christian martyrdom allows for the line of development to be peeled back layer by layer It then turns to an analysis of the formation of the intellectual traditions that contemporary historians have employed to interpret medieval documents Tracing the emergence of the concept of ritual from the Reformation to the mid twentieth century Buc highlights the continuities yet also the profound transformations between the early medieval understandings and our own social scientific models Medieval historians will find this book an indispensable resource for its insights into methodological issues crucial to their discipline As Buc demonstrates only rigorous attention to the contexts within which authors worked can allow us to reconstruct from medieval documents how rituals might have functioned Ultimately he argues too swift an application of contemporary models to highly complex textual artifacts blinds us to the specificities of early medieval European political culture

Encyclopedia of Barbarian Europe Michael Frassetto, 2003-05-23 The first comprehensive reference work devoted exclusively to this dark but critical period in the history of Western civilization In the Encyclopedia of Barbarian Europe medieval expert Michael Frassetto amasses the evidence for the defense and prosecution of this little understood transition era in the history of Western civilization Covering nearly 1 000 years of history from the late ancient period through the first centuries of the Middle Ages this concise but thorough reference work examines the key figures places events and ideas of barbarian Europe This title chronicles the ancient Visigoths the rule of Benedict and the sacking of Rome The easy to access alphabetical entries and essays offer more than a mere chronicling of kings and battles and explore the social and cultural history of the era with special attention played to the role of women

The Early Medieval World Michael Frassetto, 2013-03-14 This book examines a pivotal period in ancient human history the fall of the Roman Empire and the birth of a new European civilization in the early Middle Ages The Early Medieval World From the Fall of Rome to the Time of Charlemagne addresses the social and material culture of this critical period in the evolution of Western society covering the social political cultural and religious history of the Mediterranean world and northern Europe The two volume set explains how invading and migrating barbarian tribes spurred by raiding Huns from the steppes of Central Asia contributed to the fall of the Western Roman Empire and documents how the blending of Greco Roman Germanic and Christian cultures birthed a new civilization in Western Europe creating the Christian Church and the modern nation state A Z entries discuss political transformation changing religious practices in daily life sculpture and the arts material culture and social structure and provide biographies of important men and women in the transitional period of late

antiquity The work will be extremely helpful to students learning about the factors that contributed to the decline of the Roman Empire an important and common topic in world history curricula Dynasties of the World John Morby, 2014-09-18 This title has tables giving years of rule and family relationships in the male line unless otherwise indicated for the reigning families of the world from Horus Aha first pharaoh of Egypt to Abdallah present king of Saudi Arabia Included in the tables are data regarding regencies and co regencies abdications and depositions interregna and dynastic unions mandates and protectorates canonizations and beatifications and the end of monarchic rule through conquest or overthrow Notes provide information on chronological problems and uncertainties non Western dating systems and names and titles bibliographies document the research and guide the reader to additional information *Visions of Community in the Post-Roman World* Walter Pohl, Clemens Gantner, Richard Payne, 2016-03-03 This volume looks at visions of community in a comparative perspective from Late Antiquity to the dawning of the age of crusades It addresses the question of why and how distinctive new political cultures developed after the disintegration of the Roman World and to what degree their differences had already emerged in the first post Roman centuries The Latin West Orthodox Byzantium and its Slavic periphery and the Islamic world each retained different parts of the Graeco Roman heritage while introducing new elements For instance ethnicity became a legitimizing element of rulership in the West remained a structural element of the imperial periphery in Byzantium and contributed to the inner dynamic of Islamic states without becoming a resource of political integration Similarly the political role of religion also differed between the emerging post Roman worlds It is surprising that little systematic research has been done in these fields so far The 32 contributions to the volume explore this new line of research and look at different aspects of the process with leading western Medievalists Byzantinists and Islamicists covering a wide range of pertinent topics At a closer look some of the apparent differences between the West and the Islamic world seem less distinctive and the inner variety of all post Roman societies becomes more marked At the same time new variations in the discourse of community and the practice of power emerge Anybody interested in the development of the post Roman Mediterranean but also in the relationship between the Islamic World and the West will gain new insights from these studies on the political role of ethnicity and religion in the post Roman Mediterranean *Transformations of Romanness* Walter Pohl, Clemens Gantner, Cinzia Grifoni, Marianne Pollheimer-Mohaupt, 2018-07-09 Roman identity is one of the most interesting cases of social identity because in the course of time it could mean so many different things for instance Greek speaking subjects of the Byzantine empire inhabitants of the city of Rome autonomous civic or regional groups Latin speakers under barbarian rule in the West or increasingly representatives of the Church of Rome Eventually the Christian dimension of Roman identity gained ground The shifting concepts of Romanness represent a methodological challenge for studies of ethnicity because depending on its uses Roman identity may be regarded as ethnic in a broad sense but under most criteria it is not Romanness is indeed a test case how an established and prestigious social identity can acquire many different shades

of meaning which we would class as civic political imperial ethnic cultural legal religious regional or as status groups This book offers comprehensive overviews of the meaning of Romanness in most former Roman provinces complemented by a number of comparative and thematic studies A similarly wide ranging overview has not been available so far
