Committee on Ways and Means, 1893 **Dadaism** Dietmar Elger, 2004 In 1916 a meeting of artists writers migr s and opposition figures took place in the Cabaret Voltaire in Zurich Under the shadow of the First World War this was the starting point for the dissemination of the artistic and literary style known as Dadaism **Current Literature**, 1889 **Transactions** Iron and Steel Institute, 1908 Current Literature Edward Jewitt Wheeler, Frank Crane, 1889 *Can Europe Survive?* David Marsh, 2025-10-14 A bold new account of Europe s plight as it faces political fracture economic stagnation and external challenges from the U S China and Russia Today Europe finds itself in a fast changing polarised world dominated by Chinese American rivalry The European Union and its surrounding nonmember states despite initial successes after the fall of the Berlin Wall have failed to implement a strategy for success in the twenty first century Britain s exit from the Union has weakened both sides and Russia s invasion of Ukraine has thrown these shortcomings into sharp relief How should states across the continent position themselves in the decades to come Drawing on unpublished archives and interviews with over 150 leading figures David Marsh investigates Europe s present crisis from the march of populism Franco German malaise and the breakdown of relations with Putin s Russia Fault lines are emerging in the monetary union while the fight against climate change has impacted growth Facing its gravest test since the Second World War Europe must find fresh reserves of resilience and seek out renewed international partnerships to ensure success The Chatter of the Visible Patrizia C. McBride, 2016-03-22 The Chatter of the Visible examines the paradoxical narrative features of the photomontage aesthetics of artists associated with Dada Constructivism and the New Objectivity While montage strategies have commonly been associated with the purposeful interruption of and challenge to narrative consistency and continuity McBride offers an historicized reappraisal of 1920s and 1930s German photomontage work to show that its peculiar mimicry was less a rejection of narrative and more an extension or permutation of it a means for thinking in narrative textures exceeding constraints imposed by flat print media especially the novel and other literary genres McBride s contribution to the conversation around Weimar era montage is in her situation of the form of the work as a discursive practice in its own right which affords humans a new way to negotiate temporality as a particular mode of thinking that productively relates the particular to the universal or as a culturally specific form of cognition *Animals of the Alpine Front* Don Zancanella, 2024-08-20 From a remote village between Italy and the Austro Hungarian Empire unrolls the intimate story of Teresa and Carlo two young people whose paths cross and recross as they are first impelled by parents then forced by sweeping world events to leave their childhood homes for lives they never imagined Having left her mother and cherished

dog Allucio in Ulfano Teresa works as a domestic servant in a large villa in Trento She survives the Great War in the occupied city by banding together in a makeshift family with the other servants of the owners who have fled to escape the occupation Carlo an American still new to Italy and who speaks barely passable Italian is just finding his footing in Trento when he is dragged from bed at his boarding school along with his classmates and conscripted by the invading Austrian army In a comical twist of fate Carlo's childhood near the Colorado gold mines motivates his captors to place him with a company of miners tasked with digging entrenchments and bunkers and building a massive fortress out of stone and ice even as blizzards rage and artillery shells fall from the sky Out of sheer loneliness Carlo writes letters to Teresa the girl he met only once in Trento After the war Carlo returns to Trento and reconnects with Teresa Times are unsettled as soldiers and those who fled the war flood back to the city and signs of the impending Influenza epidemic appear With so much chaos tradition gives way to new ideas so neither worries about the consequences of their growing attachment However the same independence that has them dreaming of a future that didn't exist when they were children may pull them apart forever

Red Saxony James Retallack,2017-04-15 Red Saxony throws new light on the reciprocal relationship between political modernization and authoritarianism in Germany over the span of six decades Election battles were fought so fiercely in Imperial Germany because they reflected two kinds of democratization Social democratization could not be stopped but political democratization was opposed by many members of the German bourgeoisie Frightened by the electoral success of the Social Democrats after 1871 anti democrats deployed many strategies that flew in the face of electoral fairness They battled socialists liberals and Jews at election time but they also strove to rewrite the electoral rules of the game Using a regional lens to rethink older assumptions about Germany's changing political culture this volume focuses as much on contemporary Germans' perceptions of electoral fairness as on their experiences of voting It devotes special attention to various semi democratic voting systems whereby a general and equal suffrage for the Reichstag was combined with limited and unequal ones for local and regional parliaments For the first time democratization at all three tiers of governance and their reciprocal effects are considered together Although the bourgeois face of German authoritarianism was nowhere more evident than in the Kingdom of Saxony Red Saxony illustrates how other Germans grew to fear the spectre of democracy Certainly twists and turns lay ahead yet that fear made it easier for Hitler and the Nazis to win elections in the 1920s and to entomb German democracy in 1933

Switching Kinetics and Charge Transport in Organic Ferroelectrics Tim Cornelissen,2020-08-26 The continued digitalization of our society means that more and more things are getting connected electronically Since currently used inorganic electronics are not well suited for these new applications because of

costs and environmental issues organic electronics can play an important role here These essentially plastic materials are cheap to produce and relatively easy to recycle Unfortunately their poor performance has so far hindered widespread application beyond displays One key component of any electronic device is the memory For organic electronics several technologies are being investigated that could serve as memories One of these are the ferroelectrics materials that have a spontaneous electrical polarization that can be reversed with an electric field This bistable polarization which shows hysteresis makes these materials excellent candidates for use as memories This thesis focuses on a specific type of organic ferroelectric the supramolecular discotics These materials consist of disk like molecules that form columns in which all dipolar groups are aligned giving a macroscopic ferroelectric polarization Of particular interest are the benzenetricarboxamides BTA which are used as a model system for the whole class of discotic ferroelectrics BTA uses a core shell architecture which allows for easy modification of the molecular structure and thereby the ferroelectric properties To gain a deeper understanding of the switching processes in this organic ferroelectric BTA both microscopic and analytical modeling are used This is supported by experimental data obtained through electrical characterization The microscopic model reduces the material to a collection of dipoles and uses electrostatics to calculate the probability that these dipoles flip These flipping rates are the input for a kinetic Monte Carlo simulation kMC which simulates the behavior of the dipoles over time With this model we simulated three different switching processes on experimental time and length scales hysteresis loops spontaneous depolarization and switching transients The results of these simulations showed a good agreement with experiments and we can rationalize the obtained parameter dependencies in the framework of thermally activated nucleation limited switching TA NLS The microscopic character of the model allows for a unique insight into the nucleation process of the polarization switching We found that nucleation happens at different locations for field driven polarization switching as compared to spontaneous polarization switching Field driven nucleation happens at the contacts whereas spontaneous depolarization starts at defects This means that retention times in disordered ferroelectrics could be improved by reducing the disorder without affecting the coercive field Detailed analysis of the nucleation process also revealed a critical nucleation volume that decreases with applied field which explains the Merz like field dependence of the switching time observed in experiments In parallel to these microscopic simulations we developed an analytical framework based on the theory of TA NLS This framework is mainly focused on describing the switching transients of disordered ferroelectrics It can be combined with concepts of the Preisach model which considers a non ideal ferroelectric as a collection of ideal hysterons We were able to relate these hysterons and the distribution in their up and down switching fields to the microscopic structure of the material and use the combined models to explain experimentally observed dispersive switching kinetics Whereas ferroelectrics on their own could potentially serve as memories the readout of ferroelectric memories becomes easier if they are combined with semiconductors We have introduced several molecular materials following the same design principle of a

core shell structure which uniquely combine ferroelectricity and semiconductivity in one material The experimental IV curves of these materials could be described using an asymmetric Marcus hopping model and show their potential as memories The combination of modeling and experimental work in this thesis thereby provides an increased understanding of organic ferroelectrics which is crucial for their application as memories **The Tax Collector and the Pharisee Peter**

Tan-Gatue,2022-02-04 The idea of justification by faith is noticeably illustrated in narrative form in the parable of the tax collector and the Pharisee Luke 18 9 14 Did Luke the evangelist copy or import this idea from the apostle Paul Or is there a better likelihood that Luke derived the theme from the teachings of Jesus himself The answers to these questions have implications on the likely origin of this central Christian theme and the connection between Jesus and Paul In The Tax Collector and the Pharisee Peter Tan Gatue builds a plausible case that this notion of justification by faith comes from material sources that already exist in the Jesus tradition Through biblical exegesis critical use of authenticity criteria and contributions in ancient and current historical cultural studies this work challenges the idea that justification is a Pauline innovation and also affirms the intrinsic authenticity of the Lukan parable Kurt Schwitters Megan R. Luke,2014-02-14 German artist Kurt Schwitters 1887 1948 is best known for his pioneering work in fusing collage and abstraction the two most transformative innovations of twentieth century art Considered the father of installation art Schwitters was also a theorist a Dadaist and a writer whose influence extends from Robert Rauschenberg and Eva Hesse to Thomas Hirschhorn But while his early experiments in collage and installation from the interwar period have garnered much critical acclaim his later work has generally been ignored In the first book to fill this gap Megan R Luke tells the fascinating even moving story of the work produced by the aging isolated artist under the Nazi regime and during his years in exile Combining new biographical material with archival research Luke surveys Schwitters s experiments in shaping space and the development of his Merzbau describing his haphazard studios in Scandinavia and the United Kingdom and the smaller quieter pieces he created there She makes a case for the enormous relevance of Schwitters s aesthetic concerns to contemporary artists arguing that his later work provides a guide to new narratives about modernism in the visual arts These pieces she shows were born of artistic exchange and shaped by his rootless life after exile and they offer a new way of thinking about the history of art that privileges itinerancy over identity and the critical power of humorous inversion over unambiguous communication Packed with images Kurt Schwitters completes the narrative of an artist who remains a considerable force today **Myself and My Aims** Kurt Schwitters,2021-03-10 Kurt Schwitters was a major protagonist in the histories of modern art and literature whose response to the contradictions of modern life rivals that of Marcel Duchamp in its importance for artists working today His celebrated Merz pictures collaged and assembled from the scrap materials of popular culture and the debris of the studio such as newspaper clippings wood cardboard fabric and paint reflect a lifelong interest in collection fragmentation and abstraction techniques he also applied to language and graphic design As the first anthology in English of the critical and

theoretical writings of this influential artist *Myself and My Aims* makes the case for Schwitters as one of the most creative thinkers of his generation Including material that has never before been published this volume presents the full range of his prolific writing on the art and attitudes of his time joining existing translations of his children s stories poetry and fiction to give new readers unprecedented access to his literary imagination With an accessible introduction by Megan R Luke and elegant English translations by Timothy Grundy this book will prove an exceptional resource for artists scholars and enthusiasts of his art **The Étude** ,1889 Includes music Barrel and Box and Packages ,1913
