My Life And Work19:

My Life and Work Edmund Knowles Muspratt,1917 **Incidents of My Life and Life Work of 84 Years** Jacob Baker,1911 **Think Red** Larry Stoess,2021-09-27 Have you ever wondered what the church would look like if Christians began to take the words of Jesus seriously the words some Bibles print in red What if Jesus actually meant for us to do the things he said What if those who believe in Jesus really did value the things he valued Would the church look different Would your neighborhood stay the same In **Think Red** Larry Stoess takes a close look at the values the vision and the mission of Jesus and then holds up a mirror for us to see if our communities look anything like Jesus If we dare look in the mirror we may be inspired to leave behind our obsession with consumer based religion and follow the way of Jesus Those who do will be set free to imagine creative and whimsical expressions of community *The Myth of the Natural Laboratory* Adrian Young,2025-12-31 Outsiders have construed Pitcairn and Norfolk Islands as isolated natural laboratories since the nineteenth century The islands inhabitants descended from the eighteenth century mutineers of the British naval vessel *Bounty* and their partners from Tahiti Tubuai Huahine and Raiatea have long been idealized by investigators as incomparable research subjects uniquely suited for the study of racial cultural and linguistic hybridity But how did these two Pacific islands come to be seen as natural experiments in the first place How was that idea shaped and contested in encounters between knowledge makers and the people they studied And how can we dismantle the myth of the Pacific Island as human laboratory today *The Myth of the Natural Laboratory* answers these questions by tracing two centuries of interest in both of these communities Across chapters on sailors colonial administrators anthropologists historians and linguists it critically historicizes the trope of the island as laboratory and argues for more critical examination of colonial science's reliance on Indigenous subjects Over time Pitcairn and Norfolk Islanders became on a per capita basis among the most studied people on earth often subject to dozens of investigations across their lifetimes to the point that they were sometimes accused by their investigators of being more expert in fieldwork than the fieldworkers who came to study them They inflected the ways investigations proceeded on both islands and leveraged the interest in their communities to stake their own claims and produce their own counternarratives Almost without exception researchers failed to acquire or produce the knowledge they sought This book suggests that far from becoming ideal natural experiments producing easily accessible knowledge both islands ultimately became sites of epistemic derangement places where attempts to produce knowledge were halted redirected or reconfigured Bringing recent conversations on imperial anxiety to bear on questions of science and empire Adrian Young studies these fractures and failures to produce knowledge showing the ways colonial paranoid and colonial histories deranged studies practices categories and assumptions *The Quotable Henry Ford* Michele Wehrwein Albion,2013-03-05 An illuminating collection of quotes offering new insights on Henry Ford's sweeping achievements as one of America's greatest industrialists **Tolstoy's Diaries Volume 1: 1847-1894** Reginald F Christian,Leo Tolstoy,2015-01-29 An important and long overdue
