Radiological Defense Armed Forces Special Weapons Project (U.S.),1948 **May. [A Novel.]** Mrs. Oliphant (Margaret),1875 *On Having an Own Child* Karin Lesnik-Oberstein,2018-04-24 How are ideas of genetics blood the family and relatedness created and consumed This is the first book ever to consider in depth why people want children and specifically why people want children produced by reproductive technologies such as IVF ICSI etc As the book demonstrates even books ostensibly devoted to the topic of why people want children and the reasons for using reproductive technologies tend to start with the assumption that this is either simply a biological drive to reproduce or a socially instilled desire This book uses psychoanalysis not to provide an answer in its own right but as an analytic tool to probe more deeply the problems of these assumptions The idea that reproductive technologies simply supply an own child is questioned in this volume in terms of asking how and why reproductive technologies are seen to create this ownness Given that it is the idea of an own child that underpins and justifies the whole use of reproductive technologies this book is a crucial and wholly original intervention in this complex and highly topical area
