Parallel Computing Roman Trobec, Marián Vajteršic, Peter Zinterhof, 2009-06-18 The use of parallel programming and architectures is essential for simulating and solving problems in

modern computational practice There has been rapid progress in microprocessor architecture interconnection technology and software development which are influencing directly the rapid growth of parallel and distributed computing However in order to make these benefits usable in practice this development must be accompanied by progress in the design analysis and application aspects of parallel algorithms In particular new approaches from parallel numerics are important for solving complex computational problems on parallel and or distributed systems The contributions to this book are focused on topics most concerned in the trends of today's parallel computing These range from parallel algorithmics programming tools network computing to future parallel computing Particular attention is paid to parallel numerics linear algebra differential equations numerical integration number theory and their applications in computer simulations which together form the kernel of the monograph We expect that the book will be of interest to scientists working on parallel computing doctoral students teachers engineers and mathematicians dealing with numerical applications and computer simulations of natural phenomena

the error can be estimated is it possible to do something to reduce it The contributions in this book cover many aspects of the subject the main topics being error estimates and error control in numerical linear algebra algorithms closely related to the concept of condition numbers interval arithmetic and adaptivity for continuous models *Multilevel Modeling* Steven P. Reise, Naihua Duan, 2003-01-30 This book appeals to researchers who work with nested data structures or repeated measures data including biomed health researchers clinical intervention researchers and developmental educational psychologists Also some potential as a grad lvl tex
