Numerical linear algebra with applications [Anonymus AC11153555], 1994 Guaranteed Accuracy in Numerical Linear Algebra S.K. Godunov, A.G. Antonov, O.P. Kiriljuk, V.I. Kostin, 1993-06-30 There exists a vast literature on numerical methods of linear algebra In our bibliography list which is by far not complete we included some monographs on the subject 46 15 32 39 11 21 The present book is devoted to the theory of algorithms for a single problem of linear algebra namely for the problem of solving systems of linear equations with non full rank matrix of coefficients The solution of this problem splits into many steps the detailed discussion of which are interest ing problems on their own bidiagonalization of matrices computation of singular values and eigenvalues procedures of deflation of singular values etc Moreover the theory of algorithms for solutions of the symmetric eigenvalues problem is closely related to the theory of solv ing linear systems Householder s algorithms of bidiagonalization and tridiagonalization eigenvalues and singular values etc It should be stressed that in this book we discuss algorithms which to computer programs having the virtue that the accuracy of com lead putations is guaranteed As far as the final program product is con cerned this means that the user always finds an unambiguous solution of his problem This

solution might be of two kinds 1 Solution of the problem with an estimate of errors where also lutely all errors of input data and machine round offs are taken into account 2
