Stephanie Elenore Granville

Nurses And Doctors At Work:

Nurses and Doctors at Work Deidre Wicks, 1999 A new analysis of the relationship between nurses and doctors which offers a nuanced picture of the sexual division of labour in hospitals

Power and Conflict Between Doctors and Nurses Maureen A. Coombs, 2004-02-24 Through observations in three intensive care units this book draws on the reality of practice to explore how nurses and doctors work in intensive care settings It examines the power held by the competing knowledge bases the roles of the different professions the decision making process the sources of conflict the need for change Drawing together sociological theories and clinical practice **Power and Conflict Between Doctors and Nurses** explores the role of nurses in delivering contemporary health care It makes a strong case for interdisciplinary working and is particularly timely when health care policy is challenging work boundaries in health care

Nurses' Clinical Decision Making Russell Gurbutt, 2018-12-13 This work includes a foreword by Carl Thompson Senior Research Fellow Department of Health Sciences University of York This inspiring text offers guidance and innovative ideas for teaching and learning It explains how nurses make clinical decisions through the development of narratives and how using narratives nurses gain a far more intimate knowledge of the patient than doctors can The book considers service delivery around patients renegotiation of professional roles of medical staff and their boundaries of responsibility and authority **Nurses Clinical Decision Making** will appeal to all undergraduate and postgraduate students of nursing registered nurses and nurse managers Nurse educators hospital managers doctors and healthcare risk managers will also find the information contained here invaluable If nurses are decision makers how can their role and practice be explained Can decision making be taught and are there different levels of decision making skill If so how can expert decision makers be recognised These are just some of the pertinent questions that need to be asked if we are to recognise and understand the centrality of clinical decision making in nursing practice Clinical work is complex and takes place in a complex environment that centres around individuals who themselves are physically socially and spiritually complex Clinical work also involves multiple participants nurses doctors patients physiotherapists occupational therapists pharmacists to name a few who in the course of a days work can make scores of decisions Russell Gurbutt in the Preface

The Changing Shape of Nursing Practice Davina Allen, 2001 Six episodes of cynicism self preservation and bare faced cheek as Fletcher takes on the Slade prison system

Nursing against the Odds Suzanne Gordon, 2012-05-15 In the United States and throughout the industrialized world just as the population of older and sicker patients is about to explode we have a major shortage of nurses Why are so many RNs dropping out of health care s largest profession How will the lack of skilled experienced caregivers affect patients These are some of the questions addressed by Suzanne Gordon s definitive account of the world s nursing crisis In **Nursing against the Odds** one of North America s leading health care journalists draws on in depth interviews research studies and extensive firsthand reporting to help readers better understand the myriad causes of and possible solutions to the current crisis Gordon examines how health care cost cutting

and hospital restructuring undermine the working conditions necessary for quality care She shows how the historically troubled workplace relationships between RNs and physicians become even more dysfunctional in modern hospitals In Gordon s view the public image of nurses continues to suffer from negative media stereotyping in medical shows on television and from shoddy press coverage of the important role RNs play in the delivery of health care Gordon also identifies the class and status divisions within the profession that hinder a much needed defense of bedside nursing She explains why some policy panaceas hiring more temporary workers importing RNs from less developed countries fail to address the forces that drive nurses out of their workplaces To promote better care Gordon calls for a broad agenda that includes safer staffing improved scheduling and other policy changes that would give nurses a greater voice at work She explores how doctors and nurses can collaborate more effectively and what medical and nursing education must do to foster such cooperation Finally Gordon outlines ways in which RNs can successfully take their case to the public while campaigning for health care system reform that actually funds necessary nursing care

The Foundations of Primary Care Joachim P. Sturmberg, 2007
Refocuses on the subjective and social nature of health and illness This book takes a systems approach to primary care incorporating developments social aspects critical discourse international perspectives and the history and philosophy of medicine It is also suitable for general practitioners and other primary healthcare professionals

For Public Service Or Money, 2005 Abstract Geographical imbalances in the health workforce have been a consistent feature of nearly all health systems especially in developing countries The authors investigate the willingness to work in a rural area among final year nursing and medical students in Ethiopia Analyzing data obtained from contingent valuation questions they find that household consumption and the student s motivation to help the poor which is their proxy for intrinsic motivation are the main determinants of willingness to work in a rural area The authors investigate who are willing to help the poor and find that women are significantly more likely to help than men Other variables including a rich set of psycho social characteristics are not significant Finally the authors carry out some simulations on how much it would cost to make the entire cohort of starting nurses and doctors choose to take up a rural post

Nurse Practitioners in Primary Care Naomi Chambers, 2021-04-05 Stroke is the leading cause of disability and the third leading cause of death in the developed world The past decade has witnessed a paradigm shift in the management of stroke with the understanding that care of acute stroke patients by specialists working in dedicated stroke units greatly improves patient outcomes as a consequence stroke units now exist in all major hospitals in the UK and Europe Interventions to treat stroke have also increased in complexity and the discipline of stroke medicine is now recognised as a medical specialty This book is a concise accessible and authoritative source of relevant and focussed information about stroke disease It contains a thorough review of the management of cerebrovascular disease everything you need to function effectively on an acute stroke unit Tables and diagrams aid quick reference and easy comprehension The most up to date and clinically relevant resource on the market

Stroke in Practice equips all medical professionals with evidence based practical knowledge and a comprehensive understanding of treatment of stroke This text is directed at the non specialist and emphasises practicality over academic niceties If it inspires enthusiasm for a fascinating condition and convinces the reader that stroke is preventable treatable and yet potentially devastating for patients and their families it will justify its existence from the foreword by Kennedy R Lees

Cry of A Nurse Stephanie Elenore Granville,2007-12 Cry of A Nurse tells of my life as a nurse and how I coped with the shortage of nurses As you read my book you will see why there is a shortage of nurses what is causing the shortage and how nurses are coping with it I want American s as well as the world to see what nurses are going through because of it and what can be done to end the shortages of nurses I wrote this book to bring out the reality why there is a shortage to help nurses and encourage all those appointed and anointed by God to become nurses do not stay away but join the profession you know who you are Especially if you have a great desire to help the sick We are there but we do not want to be ignored or taken for granted We want to be respected and appreciated Call us and love us that s all we ask The Nurses Changing Practice in Health and Social Care Celia Davies,2000-02-11 New Ways of Working in Health and Social Care explores the range and depth of recent challenges facing professionals in health and social care
