Nursing Process In Later Maturity:

The Nursing Process in Later Maturity Ruth Beckmann Murray, M. Marilyn Wilson Huelskoetter, Dorothy Lueckerath O'Driscoll, 1980 Health and Health Care Utilization in Later Life Jon Hendricks, 2019-04-04 The debate over national health insurance has renewed attention on the health and health care utilization of the elderly Few questions have been more poignant than the health of the United States elderly As a broad ranging critical look Health and Health Care Utilization in Later Life brings the central questions facing the elderly into bold relief It spans the range of health concerns the elderly face daily The debates over health care rage often without having the relevant facts Health and Health Care Utilization in Later Life brings the facts to the fore but just as importantly it brings a sensitive feeling for the realities of health as a driving force in the daily lives of old people

Nursing for Wellness in Older Adults Carol A. Miller, 2018-01-10 Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. This text covers the theory and practice of wellness-oriented gerontological nursing, addressing both physiologic and psychosocial aspects of aging. Organized around the author's unique Functional Consequences Theory, the book explores age-related changes as well as the risk factors that often interfere with optimal health and functioning. Key features include:

- NEW Technology to Promote Wellness in Older Adults: boxes describe examples of technology-based interventions that can be effective for promoting wellness for older adults.
- NEW Interprofessional Collaboration (IPC) material: which is found in boxes or is highlighted with orange bars in the margins, indicates the responsibilities of nurses to collaborate with other professionals and paraprofessionals in health care and community-based settings when caring for older adults.
- NEW Global Perspective: boxes provide examples of the various ways in which health care professionals in other countries provide care for older adults.
- NEW Unfolding Patient Stories: written by the National League for Nursing, are an engaging way to begin meaningful conversations in the classroom. These vignettes, which open each unit, feature patients from Wolters Kluwer's vSim for Nursing Gerontology, co-developed with Laerdal Medical and DocuCare products; however, each Unfolding Patient Story in the book stands alone, not requiring purchase of these products.

For your convenience, a list of these case studies along with their location in the book appears in the Case Studies in This Book section later in this frontmatter.

NEW Transitional Care Unfolding Case Studies, which unfold across Chapters 27 through 29, to illustrate ways in which nurses can provide effective transitional care to an older adult whose progressively worsening condition requires that her needs be met in several settings. For your convenience, a list of these case studies along with their location in the book appears in the Case Studies in This Book section later in this frontmatter.

Updated unfolding case studies illustrate common experiences of older adults as they progress from young old to old old and are affected by combinations of age-related changes and risk factors. Evidence-based information is threaded through the content and summarized in boxes in clinically oriented chapters. Assessment and intervention guidelines help nurses identify and address factors that affect the functioning and quality of life of older adults. Nursing interventions focus on teaching older adults and their caregivers about actions they can take to promote wellness. Case studies include content on transitional care, interprofessional collaboration, and QSEN.
