Clarke,2017-03-29 Why do certain groups and individuals seek to do harm in the name of God While studies often claim to hold the key to this frightening phenomenon they seldom account for the crucial role that religious conviction plays not just in radical Islam but also in the fundamentalist branches of the world s two other largest religions Christianity and Hinduism As the first book to examine violent extremism in all three religions together Competing Fundamentalisms draws on studies in sociology psychology culture and economicswhile focusing on the central role of religious ideasto paint a richer portrait of this potent force in modern life Clarke argues that the forces of globalization fuel the aggression of these movements to produce the competing feature of religious fundamentalisms which have more in common with their counterparts across religious lines than they do with the members of their own religions He proposes ways to deescalate religious violence in the service of peacemaking Readers will gain important insights into how violent religious fundamentalism works in the world s three largest religions and learn new strategies for promoting peace in the context of contemporary interreligious conflict

Post-Conflict Rebuilding and International Law Ray Murphy, 2017-03-02. This volume presents the research analysis of a range of scholars and experts on post-conflict peacebuilding and international law from a variety of perspectives and missions. The selected essays show that peacebuilding, like the concept of peacekeeping, is not specifically provided for in the UN Charter. They also demonstrate that the record of peacebuilding, like that of peacekeeping, is varied and while both concepts are intrinsically linked, neither lends itself to precise definition. The essays consider the historical approaches to peacebuilding, such as the role played by the UN in the Congo in the early 1960s and the work of the United States and its allies in rebuilding Germany and Japan in the aftermath of World War II. Finally, essays consider the major challenge for contemporary peacebuilding operations: to make international administrations accountable and to ensure the involvement of the international community in helping rebuild communities and prevent the resurgence of violence. *Cultures of Curriculum* Pamela Bolotin Joseph, 2011-05-20. Using cultures of curriculum as a lens, this clear, compelling text reveals and critically examines the belief systems and classroom practices of curricular orientations in contemporary American society. It is designed to foster awareness, examination, and deliberation about the curricula planned for and carried out in classrooms and schools, to inspire conversations about theory and practice as well as political, social, and moral issues, and to expand critical consciousness about approaches to curriculum and practice. Readers are encouraged to give serious attention to the issues this book raises for them and to join with their colleagues, students, and communities in considering how to create curricula with purpose and congruent practices and to reculture classrooms and schools. A framework of inquiry is presented to facilitate such reflection and to accomplish these goals. *Cultures of Curriculum*, Second Edition, introduces the field of curriculum studies by describing theories and questions pertinent to curriculum inquiry. Describes the process of curriculum leadership, drawing from historical and contemporary research on curriculum change and transformation. Presents the concept of cultures of curriculum as a way of thinking of curriculum as cultural text encompassing histories, norms, beliefs, values, roles, and environments. Connects theory to practice by describing curricular orientations as depicted in practice, providing educators with approaches to instruction planning and assessment for creating intentional practices in classrooms and schools. Uses a heuristic that helps educators to understand
