Newell, 2023-08-29 Food Faiths Diet Religion and the Science of Spiritual Eating explores how individuals internalize scientific knowledge regarding health and diet and then incorporate that information into their lives as the basis of a personal spiritual practice In this book Catherine L

Newell examines how science is used to justify a dietary lifestyle and investigates the world of spiritual eating which is comprised of practitioners who identify themselves not by a religion but by their diet. These diets are based in diverse sciences such as anthropology, ecology, systems biology, nutritional studies, biomedicine, and physiology. Adherents view their diet as a lifestyle, a path to enlightenment, and a nebulously defined point of health. This in turn enables the practitioner to locate themselves in relation to other members of their community, to older traditions suffused with religious practice, and to understand their praxis in relation to the entire biosphere. While on one level this project explores how food, health, and diet can be a source of spiritual fulfillment, on another level *Food Faiths* illustrates how science and religion are subsumed into a culture and merged to form the basis of an individual's lived spiritual practice.

Preparation and Processing of Religious and Cultural Foods Md. Eaqub Ali, Nina Naquiah Ahmad Nizar, 2018-09-12 *Preparation and Processing of Religious and Cultural Foods* covers the production and processing of foods from major religions focusing on the intersection of religion, science, and cultural perceptions in the production and processing of modern religious and vegetarian foods. Quality control and authentication technologies are looked at in depth while nutrition, antioxidants, aging, hygiene, and other long-term health factors are presented from a scientific standpoint. Bringing together the top scientific researchers on this essential topic of importance to a huge percentage of the world's population, this book is ideal for food company innovation and R&D managers, producers, and processors of religious foods. Religious groups have often been slow in implementing recent science and technology breakthroughs employed in the preparation, processing, and packaging of various foods. This book provides a culturally sensitive coverage of these areas with an aim to encourage advancement. Covers the production and processing of major religious foods, namely Muslim, Christian, Jewish, Hindu, and Buddhist. Presents nutritional, antioxidant, aging, hygiene, and other long-term health factors from a scientific standpoint. Encourages advancement in the preparation, processing, and packaging of religious foods using information cultivated from top scientific researchers in the field.
