Nutritional Anthropology Contemporary Approaches To Diet And Culture:

Nutritional Anthropology Norge W. Jerome, Randy F. Kandel, Gretel H. Peltó, American Anthropological Association, 1980
Abstract Nutritional states result from both biological and cultural forces The consideration of nutritional problems from a biocultural perspective comprises the field of nutritional anthropology Eleven papers are presented representing the efforts of researchers who have examined nutrition in this social context Their theoretical approach combines the nutritional and social sciences in investigations of the sociocultural cognitive and ecological aspects of food The methodology of nutritional anthropology is applied in a study of women s roles in rural Africa Human dietary adaptations in the evolution of human culture are investigated in a case study of 2 prehistoric populations The food patterns of a contemporary group demonstrates nutritional adaptation and cultural maladaptation Demographic effects of sex specific diets and nutritional correlates of economic microdifferentiation are examined Other topics deal with malnutrition diet and acculturation and health food movement

Human Diet and Nutrition in Biocultural Perspective Tina Moffat, Tracy Prowse, 2010-12-01 There are not many areas that are more rooted in both the biological and social cultural aspects of humankind than diet and nutrition Throughout human history nutrition has been shaped by political economic and cultural forces and in turn access to food and nutrition has altered the course and direction of human societies Using a biocultural approach the contributors to this volume investigate the ways in which food is both an essential resource fundamental to human health and an expression of human culture and society The chapters deal with aspects of diet and human nutrition through space and time and span prehistoric historic and contemporary societies spread over various geographical regions including Europe North America Africa and Asia to highlight how biology and culture are inextricably linked

Research Methods for Anthropological Studies of Food and Nutrition Janet Chrzan, John Brett, 2017-02-01 The dramatic increase in all things food in popular and academic fields during the last two decades has generated a diverse and dynamic set of approaches for understanding the complex relationships and interactions that determine how people eat and how diet affects culture These volumes offer a comprehensive reference for students and established scholars interested in food and nutrition research in Nutritional and Biological Anthropology Archaeology Socio Cultural and Linguistic Anthropology Food Studies and Applied Public Health

Researching Food Habits Helen M. Macbeth, Jeremy MacClancy, 2004 The term Anthropology of Food has become an accepted abbreviation for the study of anthropological perspectives on food diet and nutrition an increasingly important subdivision of anthropology that encompasses a rich variety of perspectives academic approaches theories and methods Its multi disciplinary nature adds to its complexity This is the first publication to offer guidance for researchers working in this diverse and expanding field of anthropology

Cultural Perspectives on Food and Nutrition Cynthia Roberts, 1992

Routledge International Handbook of Food Studies Ken Albala, 2013-05-07 Over the past decade there has been a remarkable flowering of interest in food and nutrition both within the popular media and in academia Scholars are

The Routledge Encyclopedia of Social and Cultural Anthropology Alan Barnard, Jonathan Spencer, 2009-12-04 Written by leading scholars in the field this comprehensive and readable resource gives anthropology students a unique guide to the ideas arguments and history of the discipline Combining anthropological theory and ethnography it includes 275 substantial entries over 300 short biographies of important figures in anthropology and nearly 600 glossary items The fully revised and expanded second edition reflects major changes in anthropology in the past decade

The Handbook of Food Research Anne Murcott, Warren Belasco, Peter Jackson, 2013-08-15 The last 20 years have seen a burgeoning of social scientific and historical research on food The field has drawn in experts to investigate topics such as the way globalisation affects the food supply what cookery books can and cannot tell us changing understandings of famine the social meanings of meals and many

more Now sufficiently extensive to require a critical overview this is the first handbook of specially commissioned essays to provide a tour d horizon of this broad range of topics and disciplines The editors have enlisted eminent researchers across the social sciences to illustrate the debates concepts and analytic approaches of this widely diverse and dynamic field This volume will be essential reading a ready to hand reference book surveying the state of the art for anyone involved in and actively concerned about research on the social political economic psychological geographic and historical aspects of food It will cater for all who need to be informed of research that has been done and that is being done

Evolutionary Aspects of Nutrition and Health A. P. Simopoulos, Berthold Koletzko, 1999-07 The issues treated in this publication are brought together in this way for the first time For many of the chronic diseases familial predispositions are well established and there is good evidence for true genetic predisposition When *Homo erectus* emerged 1.7 million years ago humans existed as non cereal eating hunter gatherers It is on this basis that according to the hypothesis of the carnivore connection an insulin resistant genotype evolved to provide survival and reproductive advantages to populations adapted to a high meat low plant food low carbohydrate nutritional environment Cereal became the major source of calories and protein in the human diet only about 10 000 years ago Humankind has thus had little evolutionary experience to adapt to this new food type maladaptation being the consequence Moreover studies comparing energy expenditure in Western societies and during the Paleolithic period indicate a low level of physical activity not previously encountered in human history a state to which humans are not genetically adapted Together with the dietary changes this has led to a modern environment in which a number of individuals are prone to chronic diseases causing increases in non insulin dependent diabetes mellitus hypertension coronary artery disease cancer and obesity As a consequence the lifestyle approach for the prevention and management of these diseases is essential varying with national dietary patterns and national economy This publication will be of special interest to physicians geneticists nutritionists dieticians anthropologists food technologists food policy makers and individuals interested in personal and family health

The Meal Harlan Walker, 2002 This volume of papers presented at the Oxford Symposium on Food and Cookery follows the pattern of previous collections The Symposium entitled Food and Memory was held in September 2000 at St Antony's College Oxford under the joint chairmanship of Alan Davidson and Theodore Zeldin

The Taste of American Place Barbara G. Shortridge, James R. Shortridge, 1999-09-01 Tracing the intertwined roles of food ethnicity and regionalism in the construction of American identity this textbook examines the central role food plays in our lives Drawing on a range of disciplines including sociology anthropology folklore geography history and nutrition the editors have selected a group of engaging essays to help students explore the idea of food as a window into American culture The editors general introductory essay offers an overview of current scholarship and part introductions contextualize the readings within each section This lively reader will be a valuable supplement for courses on American culture across the social sciences

Decolonizing the Diet Gideon Mailer, Nicola Hale, 2018-03-22 Decolonizing

the Diet challenges the common claim that Native American communities were decimated after 1492 because they lived in Virgin Soils that were biologically distinct from those in the Old World Comparing the European transition from Paleolithic hunting and gathering with Native American subsistence strategies before and after 1492 the book offers a new way of understanding the link between biology ecology and history Synthesizing the latest work in the science of nutrition immunity and evolutionary genetics with cutting edge scholarship on the history of indigenous North America Decolonizing the Diet highlights a fundamental model of human demographic destruction human populations have been able to recover from mass epidemics within a century whatever their genetic heritage They fail to recover from epidemics when their ability to hunt gather and farm nutritionally dense plants and animals is diminished by war colonization and cultural destruction The history of Native America before and after 1492 clearly shows that biological immunity is contingent on historical context not least in relation to the protection or destruction of long evolved nutritional building blocks that underlie human immunity

Research Methods in Human Skeletal Biology Elizabeth A. DiGangi, Megan K. Moore, 2012-11-27 Research Methods in Human Skeletal Biology serves as the one location readers can go to not only learn how to conduct research in general but how research is specifically conducted within human skeletal biology It outlines the current types of research being conducted within each sub specialty of skeletal biology and gives the reader the tools to set up a research project in skeletal biology It also suggests several ideas for potential projects Each chapter has an inclusive bibliography which can serve as a good jumpstart for project references Provides a step by step guide to conducting research in human skeletal biology Covers diverse topics sexing aging stature and ancestry estimation and new technologies histology medical imaging and geometric morphometrics Excellent accompaniment to existing forensic anthropology or osteology works Understanding Economic Behaviour Klaus Günter Grunert, Folke Ölander, 2012-12-06 may be related to another basic assumption in economic psychology that the human capacity to process information from the environment is limited and that the kind of optimal use of that information postulated in many economic theories is therefore not possible The research methods used are mainly geared towards empirical research and there mostly towards survey research and experimentation Experimentation involves most often simulated behaviour in a laboratory which allows the experimental manipulation of possible causes of behaviour which would not be possible in real life Survey research is the most widely used instrument for investigating real world behaviour with all its caveats about establishing causal explanations Several introductory books e g Fumham Lea Tarpy van Raaij van Veldhoven Wiswede 1988 have appeared recently which try to give an overview of the field of economic psychology and which in varying degrees demonstrate the three foundations of economic psychology just mentioned Others have concentrated on certain subtopics such as the psychology of the labour market e g Baxter 1988 Pelzmann 1986 *The Psychology of Nutrition* David Booth, 2016-05-06 This title explores the psychological processes involved in the selection and consumption of foods and drink The exposition is firmly linked to research evidence on the cognitive socio economic and

physiological influences on the desire to eat and drink The basic theory is that appetite is a learned response to a recognized complex of cues from foods the body and the social and physical environment The volume starts with infant care giver interactions in feeding then moves on to consider how physical and social maturation in Western culture affects attitudes to foods concentrating on the phenomena of ordinary dieting and the extremes of disordered eating The concluding chapters deal with the process within the lives of individual consumers which causes the same eating habits to form in different segments of society It also looks at food technology marketing and governmental regulation The Psychology of Nutrition tackles questions about what goes on in eaters and drinkers minds about the foods and beverages they are consuming and about the cultural meaning of the eating occasion in industrialized cultures

Clinical Obesity in Adults and Children Peter G. Kopelman, Ian D. Caterson, William H. Dietz, 2008-04-15 Highly Commended in the 2006 British Medical Association Book Awards Endocrinology This Second Edition brings together more than 20 internationally recognized experts in the field to provide a timely review of current knowledge The text remains an invaluable resource for all healthcare professionals involved in the care of patients who are obese New features of this Second Edition include Addition of two new co editors Professor Bill Dietz USA and Professor Ian Caterson Australia Increased number of contributors from around the globe providing a truly international perspective Includes new information about the causes of obesity its complications and new and novel methods of prevention and treatment Reorganized into sections that address obesity and its social and cultural aspects biology associated diseases life stages pediatric and adult management and environmental and policy approaches

Sociology on the Menu Alan Beardsworth, Teresa Keil, 2002-09-11 Sociology on the Menu is an accessible introduction to the sociology of food Highlighting the social and cultural dimensions of the human food system from production to consumption it encourages us to consider new ways of thinking about the apparently mundane everyday act of eating The main areas covered include The origins of human subsistence and the development of the modern food system Food the family and eating out Diet health and the body image The meanings of meat and vegetarianism Sociology on the Menu provides a comprehensive overview of the literature particularly helpful in this interdisciplinary field It focuses on key texts and studies to help students identify major concerns and themes for further study It urges us to re appraise the taken for granted and familiar experiences of selecting preparing and sharing food and to see our own habits and choices preferences and aversions in their broader cultural context

Food and Culture Carole Counihan, Penny Van Esterik, 2013 This reader reveals how food habits and beliefs both present a microcosm of any culture and contribute to our understanding of human behaviour Particular attention is given to how men and women define themselves differently through food choices

Vegetarianism Donna Maurer, 2010-06-16 Vegetarianism seems to be increasing in popularity and acceptance in the United States and Canada yet quite surprisingly the percentage of the population practicing vegetarian diets has not changed dramatically over the past 30 years People typically view vegetarianism as a personal habit or food choice even though organizations in North America

have been promoting vegetarianism as a movement since the 1850s This book examines the organizational aspects of vegetarianism and tries to explain why the predominant movement strategies have not successfully attracted more people to adopt a vegetarian identity Vegetarianism Movement or Moment is the first book to consider the movement on a broad scale from a social science perspective While this book takes into account the unique history of North American vegetarianism and the various reasons why people adopt vegetarian diets it focuses on how movement leaders beliefs regarding the dynamics of social change contributes to the selection of particular strategies for attracting people to vegetarianism In the context of this focus this book highlights several controversies about vegetarianism that have emerged in nutrition and popular media over the past 30 years
