Malcolm Turvey

Parts Of A Past:

Parts of a Past Mike Robertson, 2005-06-20 Memories of growing up on the West Island of Montreal during the 1950s and early 60 s are the subject of this aptly entitled collection of fourteen short stories Sometimes hopelessly conventional and sometimes strangely surprising each story is a remembrance by a now middle aged man who realizes that his future may now reside mainly in his past Whether looking back on his first girlfriend some of his school day adventures or his relationship with the Almighty Parts of A Past is a whimsical retelling of events that most will recognize if not revere as being similar to their own

Parts of a Past Gilbert A. Harrison, 2009-06 Gilbert Harrison s memoir includes stories of his early family life in Los Angeles in the 1920 s and 30 s an astonishing description of his being the first of two Americans in Nagasaki after the bomb dropped and gripping accounts of his role in starting the American Veterans Committee with its attendant battles with the Communist party There was work for Eleanor Roosevelt a stint as part of an ecumenical religious organization and a brief tenure in the CIA Of primary interest are his years as owner and editor of The New Republic magazine between 1954 and 1976 which put him at the center of a who s who of politics JFK Moe Udall Eugene McCarthy Adlai Stevenson Henry Wallace and many more

Welsch, 1875 **Records of the Past** , 1911 *Doubting Vision* Malcolm Turvey, 2008-07-31 The film theories of Jean

Epstein Dziga Vertov Bela Balazs and Siegfried Kracauer have long been studied separately from each other In *Doubting Vision* film scholar Malcolm Turvey argues that their work constitutes a distinct hitherto neglected tradition which he calls revelationism and which differs in important ways from modernism and realism For these four theorists and filmmakers the cinema is an art of mass enlightenment because it escapes the limits of human sight and reveals the true nature of reality

Turvey provides a detailed exegesis of this tradition pointing to its sources in Romanticism the philosophy of Henri Bergson modern science and other intellectual currents He also shows how profoundly it has influenced contemporary film theory by examining the work of psychoanalytical semiotic theorists of the 1970s Stanley Cavell the modern day followers of Kracauer

and Walter Benjamin and Gilles Deleuze Throughout Turvey offers a trenchant critique of revelationism and its descendants Combining the close analysis of theoretical texts with the philosophical method of conceptual clarification pioneered by the

later Wittgenstein he shows how the arguments theorists and filmmakers have made about human vision and the cinema s revelatory powers often traffic in conceptual confusion Having identified and extricated these confusions Turvey builds on the work of Epstein Vertov Balazs and Kracauer as well as contemporary philosophers of film to clarify some legitimate

senses in which the cinema is a revelatory art using examples from the films of filmmakers such as Alfred Hitchcock and Jacques Tati

Time and Exteriority John Protevi, 1994 Chapter 2 examines the notion of exteriority at work in Aristotle s theory of change The time chapters of the Physics receive special attention in the book anticipating the readings of

evaluates Thomas Bradwardine's view of time as a mathematical philosophical and theological concept within the context of ancient and medieval discussions concerning the problem of time and eternity The book begins with an assessment of his career as a natural philosopher and theologian in order to establish the factors which influenced his treatment of time Two succeeding chapters examine the sources of his temporal theory in classical early medieval and thirteenth century texts Next a series of chapters surveys his view of time as it related to proportionality continuity contingency and predestination The final chapter establishes his place among fourteenth century natural philosophers and theologians Because this study traces the issue of time through several major works it demonstrates how the mathematical philosophical and theological ideas of one prominent scholar converged within a setting of lively academic discourse Thus it illuminates a fascinating dimension of one of the most important debates in late medieval thought
