Party Activists John Clark, 2004-09-10 The South continues to be the most distinctive region in American politics Over the last half century Democratic dominance in the South has given way to the emergence of a truly competitive two party system that leans Republican in presidential elections In some ways the region is increasingly like the rest of the country yet even the degree of change and the speed with which it occurred give the South a distinctive air The contributors to Southern Political Party Activists examine both the development of American political party organizations and the changing political

character of the South focusing on grassroots party activists those who are involved in party organizations at the county level John A Clark is associate professor of political science at Western Michigan University Charles L Prysby is professor of political science at the University of North Carolina at Greensboro

Institutional Design and Party Government in Post-communist Europe Csaba Nikolenyi, 2014 This book examines the institutional foundations of coalition government in the ten post communist democracies of Eastern and Central Europe for the 1990-2010 period Bulgaria the Czech Republic Estonia Hungary Latvia Lithuania Poland Romania Slovakia and Slovenia Its central argument is that differences in the arrangement of political institutions systematically explain variations in patterns of multi party government across these states The book starts with the premise that electoral systems and constitutional provisions about the powers the structure and the relationship between parliament and the presidency determine the degree to which political power is dispersed or concentrated in the political system On the basis of these institutional features three groups of states are distinguished with regard to their degree of power concentration the substantive chapters of the book demonstrate how these institutional combinations and differences shape three specific facets of party government which capture the main stages of the lifecycle of coalitions governments the formation of electoral coalitions government formation and government duration Specifically three comparative chapters assess the impact of institutional power concentration on the size of electoral coalitions the likelihood that political parties form a minority government and the number of days that a government lasts in office The main finding of the book is that power concentration matters political parties in those democracies where institutions are designed to concentrate political power tend to form large electoral coalitions they tend to form majority rather than undersized governments and they build more durable cabinets In addition the book contains a detailed case study of government formation in Hungary and a previously unstudied comparison of indirect presidential elections in four states the Czech Republic Estonia Hungary and Latvia

The First Primary David W. Moore, Andrew E. Smith, 2015-08-22 Since 1952 the primary election in a small not very diverse New England state has had a disproportionate impact on the U S presidential nomination process and the ensuing general election Although just a handful of delegates are at stake the New Hampshire primary has become a massive media event and a reasonably reliable predictor of a campaign s ultimate success or failure In *The First Primary* Moore and Smith offer a comprehensive history of the state s primary an analysis of its media coverage and impact and a description of the New Hampshire electorate along with a discussion of how that electorate reflects or diverges from national opinions on candidates and issues A book for political scientists and political junkies media and policy professionals and all students of American government *The First Primary* ably fills the gaps in our understanding of New Hampshire s outsize role in the nomination process

The Imperfect Primary Barbara Norrander, 2015-02-11 The complex and ever changing rules governing American presidential nomination contests are continuously up for criticism but there is little to no consensus on exactly what the problems are or on how to fix them The evolving system is hardly rational because it was never carefully planned So how are we to make sense of the myriad

complexities in the primary process how it affects the general election and calls for change In this thoroughly updated second edition of *The Imperfect Primary* political scientist Barbara Norrander explores how presidential candidates are nominated how that process bridges to the general election campaign discusses past and current proposals for reform and examines the possibility for more practical incremental changes to the electoral rules Norrander reminds us to be careful what we wish for reforming the presidential nomination process is as complex as the current system Through the modelling of empirical research to demonstrate how questions of biases can be systematically addressed students can better see the advantages disadvantages and potential for unintended consequences in a whole host of reform proposals The second edition includes an entirely new chapter on the connections between the primary and general election phases of presidential selection The entire book has been revised to reflect the 2012 presidential primaries and election

The Risk of War Vasiliki P. Neofotistos, 2012-03-14 *The Risk of War* focuses on practices and performances of everyday life across ethnonational borders during the six month armed conflict in 2001 between Macedonian government forces and the Albanian National Liberation Army NLA a conflict initiated by the NLA with the proclaimed purpose of securing greater rights for the Albanian community in Macedonia and terminated by the internationally brokered Ohrid Framework Agreement Anthropologist Vasiliki P. Neofotistos provides an ethnographic account of the ways middle and working class Albanian and Macedonian noncombatants in Macedonia's capital city Skopje went about their daily lives during the conflict when fear and uncertainty regarding their existence and the viability of the state were intense and widespread Neofotistos finds that rather than passively observing the international community's efforts to manage the political crisis members of the Macedonian and Albanian communities responded with resilience and wit to disruptive and threatening changes in social structure intensely negotiated relationships of power and promoted indeterminacy on the level of the everyday as a sense of impending war enfolded the capital More broadly *The Risk of War* helps us better understand how postindependence Macedonia has managed to escape civil bloodshed despite high political volatility acute ethno nationalist rivalries and unrelenting external pressures exerted by neighboring countries
