Wolves at the Door Peter Arnds, 2021-01-14 In view of the current rhetoric surrounding the global migrant crisis with politicians comparing refugees with animals and media reports warning of migrants swarming like insects or trespassing like wolves this timely study explores the cultural origins of the language and imagery of dehumanization Situated at the junction of literature politics and ecocriticism Wolves at the Door traces the history of the wolf metaphor in discussions of race gender colonialism fascism and ecology How have Gypsies Jews Native Americans but also wayward women been wolfed in literature and politics How has the wolf myth been exploited by Hitler Mussolini and Turkish ultra nationalism How do right wing politicians today exploit the reappearance of wolves in Central Europe in the context of the migration discourse And while their reintroduction in places like Yellowstone has fuelled heated debates what is the wolf's role in ecological rewilding and for the restoration of biodiversity In today's fraught political climate Wolves at the Door alerts readers to the links between stereotypical images their cultural history and their political consequences It raises awareness about xenophobia and the dangers of nationalist idolatry but also highlights how literature and the visual arts employ the wolf myth for alternative messages of tolerance and

cultural diversity      German Protestants Remember the Holocaust K. Hannah Holtschneider, 2001 Focusing on the 1980s 90s examines how Protestants in Germany interpret their self understanding as part of the community which is defined by its connection to the Nazi past Analyzes representations of the Holocaust and of the Christian Jewish relationship in three German Protestant theological texts the 1980 statement of the Rhineland synod of the Evangelical Church Zur Erneuerung des Verhältnisses von Christen und Juden Marquardt's theological text Von Elend und Heimsuchung der Theologie Prolegomena zur Dogmatik 1992 and Britta Jüngst's dissertation Auf der Seite des Todes das Leben 1996 The analysis of these texts is informed by the development of narratives of collective memory of the Holocaust in German society in the 1980s 90s from the miniseries Holocaust to the Goldhagen controversy All three texts admit the responsibility of Christianity and Christians for the Holocaust and build theologies that do not reject Jews Contends that contrary to their stated intentions most Holocaust theologians do not truly listen to the Jewish perspective Calls on practitioners of theology after Auschwitz to embrace Jews and Judaism in order to restore the credibility of Christian Churches which abandoned the Jews in Auschwitz

**Time, Temporality, and Imperial Transition** Lynn A. Struve, 2005-01-31 Time is basic to human consciousness and action yet paradoxically historians rarely ask how it is understood manipulated recorded or lived Cataclysmic events in particular disrupt and realign the dynamics of temporality among people For historians the temporal effects of such events on large polities such as empires the power projections of which always involve the dictation of time are especially significant This important and intriguing volume is an investigation of precisely such temporal effects focusing on the northern and eastern regions of the Asian subcontinent in the seventeenth century when the polity at the core of East Asian civilization Ming dynasty China collapsed and was replaced by the Manchu ruled Qing dynasty Contributors Mark C Elliott Roger Des Forges JaHyun Kim Haboush Johan Elverskog Eugenio Menegon Zhao Shiyu      Memory and Power in Post-War Europe Jan-Werner Müller, 2002-08-29 How has memory collective and individual influenced European politics after the Second World War and after 1989 in particular How has the past been used in domestic struggles for power and how have historical lessons been applied in foreign policy While there is now a burgeoning field of social and cultural memory studies mostly focused on commemorations and monuments this volume is the first to examine the connection between memory and politics directly It investigates how memory is officially recast personally reworked and often violently re-instilled after wars and above all the ways memory shapes present power constellations The chapters combine theoretical innovation in their approach to the study of memory with deeply historical empirically based case studies of major European countries The volume concludes with reflections on the ethics of memory and the politics of truth justice and forgetting after 1945 and 1989      *Hitler's Slaves* Alexander von Plato, Almut Leh, Christoph Thonfeld, 2010-10-01 During World War II at least 13.5 million people were employed as forced labourers in Germany and across the territories occupied by the German Reich Most came from Russia Ukraine Belarus Moldavia the Baltic countries France Poland and Italy Among them were 8.4 million

civilians working for private companies and public agencies in industry administration and agriculture In addition there were 4 6 million prisoners of war and 1 7 million concentration camp prisoners who were either subjected to forced labour in concentration or similar camps or were rented out or sold by the SS While there are numerous publications on forced labour in National Socialist Germany during World War II this publication combines a historical account of events with the biographies and memories of former forced labourers from twenty seven countries offering a comparative international perspective

*Beyond the Conceivable* Dan Diner, 2023-12-22 The major essays of Dan Diner who is widely read and quoted in Germany and Israel are finally collected in an English edition They reflect the author's belief that the Holocaust transcends traditional patterns of historical understanding and requires an epistemologically distinct approach One can no longer assume that actors as well as historians are operating in the same conceptual universe sharing the same criteria of rational discourse This is particularly true of victims and perpetrators whose memories shape the distortions of historical narrative in ways often diametrically opposed The essays are divided into three groups The first group talks about anti-Semitism in the context of the 1930s and the ideologies that drove the Nazi regime The second group concentrates on the almost unbelievably different perceptions of the Final Solution with particularly illuminating discussions of the Judenrat or Jewish council The third group considers the Holocaust as the subject of narrative and historical memory Diner focuses above all on perspectives the very notions of rationality and irrationality are seen to be changeable depending on who is applying them And because neither rational nor irrational motives can be universally

assigned to participants in the Holocaust Diner proposes from the perspective of the victims the idea of the counterrational. His work is directed toward developing a theory of Holocaust historiography and offers clearly and coherently the highest level of reflection on these problems. The major essays of Dan Diner, who is widely read and quoted in Germany and Israel, are finally collected in an English edition. They reflect the author's belief that the Holocaust transcends traditional patterns of historical understanding and requires a Symbolic Loss. Peter Homans, 2000. Historically, many world cultures have linked three disparate phenomena: collective loss, mourning, and the construction of monuments and cultural symbols to represent the loss over time and render it memorable, meaningful, and thereby bearable. In a century of great loss, observers of western culture have commented on the decline of mourning practices and the absence of their associated rituals. The ten essays assembled here by Peter Homans represent in a genuinely interdisciplinary way the recent work of scholars attempting to understand this trend. Arranged in sections on cultural studies, architecture, history, and psychology, this accessible collection can serve as an introduction to the uses of mourning in contemporary cultures. Bergen, University of Notre Dame; Mitchell Breitwieser, University of California, Berkeley; Peter Homans, University of Chicago; Patrick H. *From History to Theory* Kerwin Lee Klein, 2011-05-19. This work describes major changes in the conceptual language of the humanities, particularly in the discourse of history. In seven closely related essays, the author traces the development of academic vocabularies through the dynamically shifting cultural, political, and linguistic landscapes of the 20th century.

**The World Hitler Never Made** Gavriel D. Rosenfeld, 2005-05-23. A fascinating 2005 study of the place of alternate histories of Nazism within Western popular culture. *Understanding Nazi Ideology: The Genesis and Impact of a Political Faith - Revised English Edition* Carl Müller Frøland, 2024-02-05. Nazism was deeply rooted in German culture. From the fertile soil of German Romanticism sprang ideas of great significance for the genesis of the Third Reich: ideology, notions of the individual as a mere part of the national collective, and of life as a ceaseless struggle between opposing forces. This book traces the origins of the political religion of Nazism: Ultranationalism and totalitarianism, racial theory and antisemitism, nature mysticism and occultism, eugenics and social Darwinism, adoration of the Führer and glorification of violence—all are explored. The book also depicts the dramatic development of the Nazi movement and the explosive impact of its political faith, racing from its bloody birth in the trenches of World War I to its cataclysmic climax in the Holocaust and World War II.

*Memories and Silences Haunted by Fascism* Daniela Baratieri, 2010. Fascist and colonial legacies have been determinant in shaping how Italian colonialism has been narrated in Italy till the late 1960s. This book deals with the complex problem of public memory and discursive amnesia. The detailed research that underpins this book makes it no longer possible to claim

that after 1945 there was an absolute and traumatic silence concerning Italy's colonial occupation of North and East Africa. However, the abiding public use of this history confirms the existence of an extremely selective and codified memory of that past. The author shows that colonial discourse persisted in historiography, newspapers, newsreels, and film. Popular culture appears intertwined with political and economic interests and the power inscribed in elite and scientific knowledge. While readdressing the often mistaken historical time line that ignores that actual Italian colonial ties did not end with the fall of Fascism but in 1960 with Somalia becoming independent, this book suggests that a new post-Fascist Italian identity was the crucial issue in reappraisals of a national colonial past.

Fantasies of Witnessing Gary Weissman, 2018-07-05

Fantasies of Witnessing explores how and why those deeply interested in the Holocaust yet with no direct familial connection to it endeavor to experience it vicariously through sites or texts designed to make it real for nonwitnesses. Gary Weissman argues that far from overwhelming nonwitnesses with its magnitude of horror, the Holocaust threatens to feel distant and unreal. A prevailing rhetoric of secondary memory and trauma, he contends, and efforts to portray the Holocaust as an immediate and personal experience are responses to an encroaching sense of unreality. In America, we are haunted not by the traumatic impact of the Holocaust but by its absence. When we take an interest in the Holocaust, we are not overcoming a fearful aversion to its horror but endeavoring to actually feel the horror of what otherwise eludes us. Weissman focuses on specific attempts to locate the Holocaust in the person of Elie Wiesel, the most renowned survivor, and his classic memoir *Night*, in videotaped survivor stories, and Lawrence L. Langer's celebrated book *Holocaust Testimonies* and in the films *Shoah* and *Schindler's List*. These representations, he explains, constitute a movement away from the view popularized by Wiesel that those who did not live through the Holocaust will never be able to grasp its horror and toward re-creating the Holocaust as an experience nonwitnesses may put themselves through. It is only by acknowledging the desire that gives shape to such representations and by exploring their place in the ongoing contest over who really knows the Holocaust and feels its horror that we can arrive at a more candid assessment of our current and future relationships to the Holocaust, he says.

**Years of Persecution, Years of Extermination** Christian Wiese, Paul Betts, 2010-06-15

This volume provides an in-depth discussion of Saul Friedländer's landmark two-volume history of the Holocaust: *Nazi Germany and the Jews*. It brings together a range of internationally acclaimed historians to address the manifold conceptual and historiographical issues raised in Friedländer's monumental work. It includes a major essay by Friedländer himself on the challenges of producing an integrated history of the Holocaust. The aim of this book is not simply to evaluate Friedländer's work on its own merits but rather to use his text as a means of exploring the contours and future of Holocaust historiography. The central concern is to situate his work within the broader terrain of Holocaust studies and European history as well as to explore the ways in which his book opens up new directions in the knowledge, study, and understanding of the Shoah in particular and twentieth-century genocide in general.
