**Passing on** David Sudnow,1967      Understanding Qualitative Research and Ethnomethodology Paul ten Have,2004-02-28 Understanding Qualitative Research and Ethnomethodology provides a discussion of qualitative research methods from an ethnomethodological perspective Detailed yet concise Paul ten Have s text explores the complex relation between the more traditional methods of qualitative social research and the discipline of ethnomethodology It draws on examples from both ethnomethodological studies and the wider field of qualitative research to discuss critically an array of methods for qualitative data collection and analysis With a student friendly structure this engaging book will be an invaluable resource for both students and researchers across the social sciences      *Passing on* David Sudnow,1973      Encyclopedia of Death and Dying Glennys Howarth,Oliver Leaman,2003-12-16 In recent years there has been a massive upsurge in academic professional and lay interest in mortality This is reflected in academic and professional literature in the popular media and in the proliferation of professional roles and training courses associated with aspects of death and dying Until now the majority of reference material on death and dying has been designed for particular disciplinary audiences and has addressed only specific academic or professional concerns There has been an urgent need for an authoritative but accessible reference work reflecting the multidisciplinary nature of the field This Encyclopedia answers that need The Encyclopedia of Death and Dying consolidates and contextualizes the disparate research that has been carried out to date The phenomena of death and dying and its related concepts are explored and explained in depth from the approaches of varied disciplines and related professions in the arts social sciences humanities medicine and the sciences In addition to scholars and students in the field from anthropologists and sociologists to art and social historians the Encyclopedia will be of interest to other professionals and practitioners whose work brings them into contact with dying dead and bereaved people It will be welcomed as the definitive death and dying reference source and an essential tool for teaching research and independent study      *On Death and Dying* Elisabeth Kübler-Ross,2009 Denial anger bargaining depression and acceptance The five stages of grief first formulated in this hugely influential work forty years ago are now part of our common understanding of bereavement The five stages were first identified by Elisabeth K bler Ross in her work with dying patients at the University of Chicago and were considered phases that all or most people went through when faced with the prospect of their own death They are now often accepted as a response to any major life change However in spite of these terms being in general use the subject of death is still surrounded by conventional attitudes and reticence that offer only fragile comfort because they evade the real issues This groundbreaking book is still relevant giving a voice to dying people and exploring what impending death means to them often in their own words People speak about their experience of dying their relief in expressing their fear and anger and being able to move forward to a state of acceptance and peace Ideal for all those with an interest in bereavement or the five stages of grief this book contains a new extended introduction from Professor Allan Kellehear This additional chapter re
