Passion For Dna Genes Genomes And Society:

A Passion for DNA James D. Watson, 2001 In 1953 two young and unknown scientists James Watson and Francis Crick sparked a worldwide revolution with their discovery of the molecular composition of DNA In this collection of outspoken and topical essays speeches and reports Watson offers his unique insight into the advance of molecular genetics the prospect of curing cancer over the next decade how human genetic knowledge is likely to be used particularly in relation to cloning and genetically modified food as well as shedding light on his early life and career

A Passion for DNA James Dewey Watson, 2000 **The Road to Stockholm** István Hargittai, 2002 The Nobel Prize is by far the highest recognition a scientist may receive and the only one with which the general public is familiar Its prestige has reached improbable heights At the same time a lot of myth surrounds the Nobel Prize and this is compounded by the fact that people tend to view scientists with some bewilderment This book introduces the process of selection of the laureates discusses the ingredients for scientific discovery and for getting recognition It reviews the decisive moments of scientific careers en route to the Nobel Prize points to characteristic features of the laureates the importance of mentors and venues in scientific careers and other components of success It also covers some discoverers and discoveries for whom and for which the Nobel Prize never materialized Whereas there is no general recipe for receiving the Nobel Prize there are common features of successful scientific careers The book reveals some information about the scientists lives and careers that may guide other scientists in increasing their chances of becoming more effective and better recognized players although it is not expected to help anyone to receive the Nobel Prize For the general reader The Road to Stockholm reveals the human face of scientists and the human side of their endeavours The Nobel Prize has served as inspiration for scientists and the general public for a hundred years this book discusses its problems and celebrates its triumphs

The Annotated and Illustrated Double Helix James D. Watson, Alexander Gann, 2012-11-06 In his 1968 memoir The Double Helix Readers Union 1969 the brash young scientist James Watson chronicled the drama of the race to identify the structure of DNA a discovery that would usher in the era of modern molecular biology After half a century the implications of the double helix keep rippling outward the tools of molecular biology have forever transformed the life sciences and medicine The Annotated and Illustrated Double Helix adds new richness to the account of the momentous events that led the charge

Critical Thinking in Psychology Robert J. Sternberg, Diane F. Halpern, 2020-01-16 Good scientific research depends on critical thinking at least as much as factual knowledge psychology is no exception to this rule And yet despite the importance of critical thinking psychology students are rarely taught how to think critically about the theories methods and concepts they must use This book shows students and researchers how to think critically about key topics such as experimental research statistical inference case studies logical fallacies and ethical judgments Using updated research findings and new insights this volume provides a comprehensive overview of what critical thinking is and how to teach it in psychology Written by leading experts in critical thinking in

psychology each chapter contains useful pedagogical features such as critical thinking questions brief summaries and definitions of key terms It also supplies descriptions of each chapter author s critical thinking experience which evidences how critical thinking has made a difference to facilitating career development **Brilliant Blunders** Mario Livio,2014-05-27

Drawing on the lives of five great scientists Charles Darwin William Thomson Lord Kelvin Linus Pauling Fred Hoyle and Albert Einstein scientist author Mario Livio shows how even the greatest scientists made major mistakes and how science built on these errors to achieve breakthroughs especially into the evolution of life and the universe **The Disability**

Bioethics Reader Joel Michael Reynolds,Christine Wieseler,2022-05-30 The Disability Bioethics Reader is the first introduction to the field of bioethics presented through the lens of critical disability studies and the philosophy of disability Introductory and advanced textbooks in bioethics focus almost entirely on issues that disproportionately affect disabled people and that centrally deal with becoming or being disabled However such textbooks typically omit critical philosophical reflection on disability Directly addressing this omission this volume includes 36 chapters most appearing here for the first time that cover key areas pertaining to disability bioethics such as state of the field analyses of modern medicine bioethics and disability theory health disease and the philosophy of medicine issues at the edge and end of life including physician aid in dying brain death and minimally conscious states enhancement and biomedical technology invisible disabilities chronic pain and chronic illness implicit bias and epistemic injustice in health care disability quality of life and well being race disability and healthcare justice connections between disability theory and aging trans and fat studies prenatal testing abortion and reproductive justice The Disability Bioethics Reader unlike traditional bioethics textbooks also engages with decades of empirical and theoretical scholarship in disability studies scholarship that spans the social sciences and humanities and gives serious consideration to the history of disability activism **Born and Made** Sarah Franklin,Celia

Roberts,2006-11-19 Born and Made examines the case of preimplantation genetic diagnosis PGD the procedure used to prevent serious genetic disease by embryo selection and the so called designer baby method It shows that far from being a runaway technology the regulation of PGD provides an example of precaution and restraint **Color Atlas of Genetics** Eberhard Passarge,2012-12-12 From reviews of previous editions A remarkable achievement concise but informativeNo geneticist or physician interested in genetic diseases should be without a copy American Journal of Medical Genetics Ever since the international Human Genome Project achieved its extraordinary goal of sequencing and mapping the entire human genomewith far reaching implications for understanding the causes and diagnosis of human genetic disordersprogress in the field has been rapid In the fourth edition of the bestselling Color Atlas of Genetics readers will get a full overview of the field today with an emphasis on the interface between fundamental principles and practical applications in medicine The book utilizes the signature Flexibook format designed for easy visual learning and retention and is invaluable for students clinicians and scientists interested in keeping current in this fast moving area New topics in the fully revised fourth edition of

this highly praised atlas Genetic signaling pathways involved in genetic disorders DNA repair systems Genomic disorders and genome wide association studies Cancer genomes Ciliopathies neurocristopathies and other groups of causally related disorders Epigenetic changes in certain disorders Illustrated outline of human evolution With almost 200 stunning color plates concisely explained on facing pages and including useful tables of data a glossary of terms key references and online resources this book makes every concept clear and accessible It is an excellent introduction to genetics and basic genomics for students of medicine and biology as well as an ideal teaching aid and refresher for investigators in any field of medicine or science

Candid Science Ii: Conversations With Famous Biomedical Scientists Istvan Hargittai,2002-03-15 This invaluable book contains 36 interviews including 26 with Nobel laureates It presents a cross section of biomedical science a field that has been dominant in science for the past half century The in depth conversations cover important research areas and discoveries as well as the roads to these discoveries including aspects of the scientists work that never saw publication They also bring out the humanness of the famous scientists the reader learns about their backgrounds aspirations failings and triumphs The book is illustrated with snapshots of the conversations and photos provided by the interviewees It is a follow up to the critically acclaimed Candid Science Conversations with Famous Chemists by the same author a **Ordinary**

Geniuses Gino Segre,2013-11-26 A fascinating tribute to the forefathers of two of today s most exciting scientific fields Thanks to Max Delbruck and George Gamow today we have mapped the human genome and understand the ramifications of the Big Bang In his characteristically inviting and elegant style Gino Segre brings to life the story of these two great scientists and their long friendship and offers an accessible inside look the people behind the scenes of science the collaboration and competition the quirks and failures the role of intuition and luck and the sense of wonder and curiosity that keeps these extraordinary minds going

Disability on Equal Terms John Swain,Sally French,2008-03-17 Disability on Equal Terms is not a Turgid and difficult book despite its accent on complex and challenging themes It is a lively and important read The Skill Journal June 2009 A collection of highly readable and scholarly essays that reflect both the theoretical and practical implications of recent developments in the field This book is essential reading for everyone interested in disability highly recommended Colin Barnes Centre for Disability Studies University of Leeds This authoritative collection of writings examines and challenges traditional notions of disability Edited and written by leading experts in the field it offers a multidisciplinary approach to disability studies incorporating perspectives from a wide range of health and social care services as well as a distinct and unique emphasis on the views experiences work and personal testimonies of disabled people themselves The book is divided into three sections each of which is prefaced by an editorial introduction which brings together the key themes and issues under discussion Each section Examines the dominant assumptions about disability and impairment and their historical and cultural contexts Documents the challenges to such presumptions generated by disabled people themselves Explores the implications of such challenges for professional policy and practice

This ground breaking book will be essential reading for those studying disability studies social work nursing and allied health and social care at all levels It will also be a thought provoking and inspiring read for disabled people and activists professionals and policy makers John Swain is based in the School of Health Community and Education Studies at Northumbria Univeristy Sally French is based at the Open Univeristy Previous publications include the co edited *Disabling Barriers Enabling Environments* Second Edition SAGE 2004 *Critical Dialogues in Latinx Studies* Ana Y.

Ramos-Zayas,Mérida M. Rúa,2021-08-10 WINNER D Scott Palmer Prize for Best Edited Collection given by the New England Council of Latin American Studies Introduces new approaches theoretical trends and understudied topics in Latinx Studies This groundbreaking work offers a multidisciplinary social science oriented perspective on Latinx studies including the social histories and contemporary lives of a diverse range of Latina and Latino populations Editors Ana Y Ramos Zayas and M rida M R a have crafted an anthology that is unique in both form and content The book combines previously published canonical pieces with original cutting edge works created for this volume The sections of the text are arranged thematically as critical dialogues each with a brief preface that provides context and a conceptual direction for the scholarly conversation that ensues The editors frame the volume around the humanistic social sciences using the term to highlight the historical and social contexts under which expressive cultural forms and archival records are created *Critical Dialogues in Latinx Studies* masterfully sheds light on the diversity and complexity of the everyday lives of Latinx populations the political economic structures that shape enduring racialization and cultural stereotyping and the continuing efforts to carve out new lives as diasporic transnational global and colonial subjects *Medicine after the Holocaust* S. Rubenfeld,2010-01-04 Rubenfeld and the contributors to this collection posit that German physicians betrayed the Hippocratic Oath when they chose knowledge over wisdom the state over the individual a f hrer over God and personal gain over professional ethics **Genetic**

Discrimination and Genetic Privacy in a Comparative Perspective Janneke H. Gerards,A. W. Heringa,Heleen L. Janssen,2005 During the last decades a better understanding of the influence of genetic factors on the onset of illness and disease has evolved Unfortunately however the information revealed by genetic tests is not always accurate and reliable and its probabilistic value is often limited Throughout the world the possibility of genetic testing and the availability of individual genetic information have therefore caused increasing social concern especially since many actors outside the medical profession such as health and life insurance companies and employers have shown a growing interest in individual genetic information In many states as well as on the international level there is an ongoing debate about the balance that should be struck between the protection of the individual against misuse of genetic information and the interests of social actors and genetic research institutes and about the policy options that are at hand to reduce the risks that are created by the availability of genetic information This book offers some clarity as to the choices that have been made in various legal systems both national and international with respect to the regulation of genetic information On the basis of an elaborate

analysis of relevant legislation policy approaches and case law in the United States the various European states and on the international level the book aims to provide insight in the issues that must be deemed relevant in considering and eventually introducing regulative measures with respect to genetic information *A Life Decoded* J. Craig Venter,2007-10-18 The triumphant memoir of the man behind one of the greatest feats in scientific history Of all the scientific achievements of the past century perhaps none can match the deciphering of the human genetic code both for its technical brilliance and for its implications for our future In *A Life Decoded* J Craig Venter traces his rise from an uninspired student to one of the most fascinating and controversial figures in science today Here Venter relates the unparalleled drama of the quest to decode the human genome a goal he predicted he could achieve years earlier and more cheaply than the government sponsored Human Genome Project and one that he fulfilled in 2001 A thrilling story of detection *A Life Decoded* is also a revealing and often troubling look at how science is practiced today *Brave New World?* Celia Deane-Drummond,2003-11-01 One of the key issues facing us in the next millennium is the ability to manipulate the genetics of living organisms The possibility of manipulating human genetics raises many theological ethical and socio political issues These include specific decisions about whether the technology will be developed how it will be applied and more general questions about the technical manipulation of natural processes From a theological perspective the human genome project not only challenges particular doctrines such as that of creation eschatology and anthropology but also raises particular issues of social justice and medical ethics The purpose of this book is to bring together the collective expertise of theologians scientists and social scientists in order to provide a forum for critique and public debate focused on the human genome project It is hoped that the results presented in this book offer a sophisticated theological and ethical response *Life Writing* Meg Jensen,Jane Jordan,2009-03-26 In our age self publishing self broadcasting and telling stories about our own lives and the lives of others are all pervasive This is also the age of the witness the age of testimony in which first hand accounts personal experience life change and evolution are valued for good or ill over distanced reflection What are we to make of all this telling of lives The essays collected in *Life Writing* The Spirit of the Age and the State of the Art from writers and academics associated with the Centre for Life Narrative Studies at Kingston University in London begin to address this very question and in doing so demonstrate the fluidity and diversity of life writing itself The remit of the Centre for Life Narratives is to rise to the challenge poised to writers teachers and researchers alike by this very fluidity and diversity in our discipline and is exemplified here with contributions from academics curators editors and biographers including Neal Ascherson Victoria Glendinning Professor Kathryn Hughes Hanif Kureishi Blake Morrison and Lawrence Goldman editor of the Oxford Dictionary of National Biography This collection of essays from CLN offers the reader our founding contribution to the debates that surround this era defining genre and as such presents both the state of the art and the spirit of our age **Opening Doors: Joan Steitz and Jennifer Doudna of the RNA World** Laura L Mays Hoopes,2019-03-08 A dual biography of Joan Steitz and Jennifer Doudna two

women who combined successful home lives with successful careers in science
