repetitiveness resulting in unchanging cuisine Thus was born the idea for a new book on pasta the fruit of Academia Barilla s gastronomic experience and of Barilla s centuries old technological competencies to promote 360 knowledge about pasta giving value to the extraordinary variety of the formats produced today in Italy at least 300 combining them in simple and varied preparations each one tested and experimented with by the chefs at Academia Barilla along with text and suggestions for excellence in the final result The volume large in format and with a carefully designed editorial program is structured using the individual formats as the basis It presents their technical and physical characteristics reports origins of their names and brief historical annotations rich with significance suggests ideal combinations with sauces and seasonings and proposes traditional recipes from Italian gastronomy splendidly illustrated using images produced during the preparation A different and original point of view for discovering how much originality and taste is hidden behind a plate of pasta
