

An aerial photograph of a rugged, rocky coastline. The rocks are dark and layered, with numerous cracks and crevices. A large colony of seabirds, likely gulls or terns, is scattered across the upper and middle sections of the rocks. A person wearing a yellow jacket and dark pants is visible on the rocks, looking down at something in their hands. The overall scene is a natural, coastal environment.

Passion For Wildlife The History Of The Canadian Wildlife Service:

A Passion for Wildlife J. Alexander Burnett, 2011-11-01 *A Passion for Wildlife* chronicles the history of the Canadian Wildlife Service and the evolution of Canadian wildlife policy over its first half century. It presents the exploits and accomplishments of a group of men and women whose dedication to the ideals of science conservation and a shared vision of Canada as a country that treasures its natural heritage has earned them the respect of their profession around the world. Drawing on interviews and anecdotes, personal correspondence and the published record, the book addresses topics as varied as game law enforcement, field biology, habitat conservation, environmental education, toxicology, federal-provincial relations and international diplomacy. Accessible to anyone interested in nature, it will appeal particularly to wildlife managers, scientists, naturalists, as well as students of biology, wildlife technology and environmental studies.

The Subjugation of Canadian Wildlife Max Foran, 2018-04-10 Hardly a day goes by without news of the extinction or endangerment of yet another animal species followed by urgent but largely unheeded calls for action. An eloquent denunciation of the failures of Canada's government and society to protect wildlife from human exploitation, Max Foran's *The Subjugation of Canadian Wildlife* argues that a root cause of wildlife depletions and habitat loss is the culturally ingrained beliefs that underpin management practices and policies. Tracing the evolution of the highly contestable assumptions that define the human-wildlife relationship, Foran stresses the price wild animals pay for human self-interest. Using several examples of government oversight at the federal, provincial and territorial levels, from the Species at Risk Act to the Biodiversity Strategy, Protected Areas Network and provincial management plans, this volume shows that wildlife policies are as much or more about human needs, priorities and profit as they are about preservation. Challenging established concepts including ecological integrity, adaptive management, sport hunting as conservation and the flawed belief that wildlife is a renewable resource, the author compels us to recognize animals as sentient individuals and as integral components of complex ecological systems. A passionate critique of contemporary wildlife policy, *The Subjugation of Canadian Wildlife* calls for belief change as the best hope for an ecologically healthy, wildlife-rich Canada.

The North American Model of Wildlife Conservation Shane P. Mahoney, Valerius Geist, 2019-09-10 The foremost experts on the North American Model of Wildlife Conservation come together to discuss its role in the rescue, recovery and future of our wildlife resources. At the end of the nineteenth century, North America suffered a catastrophic loss of wildlife driven by unbridled resource extraction, market hunting and unrelenting subsistence killing. This crisis led powerful political forces in the United States and Canada to collaborate in the hopes of reversing the process, not merely halting the extinctions but returning wildlife to abundance. While there was great understanding of how to manage wildlife in Europe, where wildlife management was an old, mature profession, continental methods depended on social values often unacceptable to North Americans. Even Canada, a loyal colony of England, abandoned wildlife management as practiced

in the mother country and joined forces with like minded Americans to develop a revolutionary system of wildlife conservation. In time and surviving the close scrutiny and hard ongoing debate of open democratic societies this series of conservation practices became known as the North American Model of Wildlife Conservation. In this book editors Shane P Mahoney and Valerius Geist both leading authorities on the North American Model bring together their expert colleagues to provide a comprehensive overview of the origins achievements and shortcomings of this highly successful conservation approach. This volume reviews the emergence of conservation in late nineteenth early twentieth century North America provides detailed explorations of the Model's institutions principles laws and policies places the Model within ecological cultural and socioeconomic contexts describes the many economic social and cultural benefits of wildlife restoration and management addresses the Model's challenges and limitations while pointing to emerging opportunities for increasing inclusivity and optimizing implementation. Studying the North American experience offers insight into how institutionalizing policies and laws while incentivizing citizen engagement can result in a resilient framework for conservation. Written for wildlife professionals researchers and students this book explores the factors that helped fashion an enduring conservation system one that has not only rescued recovered and sustainably utilized wildlife for over a century but that has also advanced a significant economic driver and a greater scientific understanding of wildlife ecology.

Hunters at the Margin John Sandlos, 2011-11-01. *Hunters at the Margin* examines the conflict in the Northwest Territories between Native hunters and conservationists over three big game species: the wood bison, the muskox, and the caribou. John Sandlos argues that the introduction of game regulations, national parks, and game sanctuaries was central to the assertion of state authority over the traditional hunting cultures of the Dene and Inuit. His archival research undermines the assumption that conservationists were motivated solely by enlightened preservationism, revealing instead that commercial interests were integral to wildlife management in Canada.

The Game of Conservation Mark Cioc, 2009-11-15. *The Game of Conservation* is a brilliantly crafted and highly readable examination of nature protection around the world. Twentieth century nature conservation treaties often originated as attempts to regulate the pace of killing rather than as attempts to protect animal habitat. Some were prompted by major breakthroughs in firearm techniques such as the invention of the elephant gun and grenade harpoons, but agricultural development was at least as important as hunting regulations in determining the fate of migratory species. The treaties had many defects yet they also served the goal of conservation to good effect, often saving key species from complete extermination and sometimes keeping the population numbers at viable levels. It is because of these treaties that Africa is dotted with large national parks, that North America has an extensive network of bird refuges, and that there are any whales left in the oceans. All of these treaties are still in effect today and all continue to influence nature protection.

efforts around the globe Drawing on a wide variety of primary and secondary sources Mark Cioc shows that a handful of treaties all designed to protect the world's most commercially important migratory species have largely shaped the contours of global nature conservation over the past century The scope of the book ranges from the African savannahs and the skies of North America to the frigid waters of the Antarctic

The Culture of Hunting in Canada Jean L. Manore,Dale Miner,2011-11-01

The Culture of Hunting in Canada is about a pivotal but little studied aspect of Canadian history culture and society It covers elements of the history of hunting from the pre colonial period until the present in all parts of Canada featuring essays by practitioners and scholars of hunting and by pro and anti hunting lobbyists The result crosses the boundaries between scholarship and personal reflection

and between academia and advocacy The essays collected here address important historical and contemporary issues regarding the culture and practice of hunting Topics include hunting identities conservation and its relationship to hunting tensions between hunters and non hunters and between Aboriginal and non Aboriginal hunting groups hunting ethics debates over hunting practices and regulations animal rights and gun control The discussion involves consideration of the social political and economic context as well as class and racial tensions between sport hunters and subsistence hunters The Culture of Hunting in Canada makes an unprecedented contribution to the study of hunting in Canada and its role in our culture It will appeal to sociologists anthropologists and historians of hunting culture wildlife biologists natural resource managers and environmentalists and not least hunters and anyone interested in the culture of hunting Wildlife, Conservation, and Conflict in Quebec, 1840-1914 Darcy Ingram, 2013-04-29 Despite the popular assumption that wildlife conservation is a recent phenomenon it emerged over a century and a half ago in an era more closely associated with wildlife depletion than preservation In Wildlife Conservation and Conflict in Quebec Darcy Ingram explores the combination of NGOs fish and game clubs and state administered leases that formed the basis of a unique system of wildlife conservation in North America Inspired by a longstanding belief in progress improvement and social order based on European as well as North American models this system effectively privatized Quebec s fish and game resources often to the detriment of commercial and subsistence hunters and fishers *Taking the Air* Paul Kopas, 2007-12-01 Natural resource management is a major area of Canadian policy as recent literature reveals Yet analysts have devoted little attention to the management of parks and protected areas In Taking the Air Paul Kopas takes a comprehensive approach to this aspect of policy debate He scrutinizes the policy making process for national parks since the mid 1950s and interrogates the rationale and policies that have governed their administration Kopas argues that national parks and park policy reflect not only environmental concerns but also the political and social attitudes of bureaucrats citizens interest groups Aboriginal peoples and legal authorities He explores how the goals of each group have been shaped by the historical context of park policy influencing the shape and weight of their contributions When the Caribou Do Not Come Brenda L. Parlee, Ken J. Caine, 2018-05-23 In the 1990s news stories began to circulate about declining caribou populations in the North Were caribou the canary in the coal mine for climate change or did declining numbers reflect overharvesting by Indigenous hunters or failed attempts at scientific wildlife management Grounded in community based research in northern Canada a region in the forefront of co management efforts these collected stories and essays bring to the fore the insights of the Inuvialuit Gwich in and Saht people for whom caribou stewardship has been a way of life for centuries Anthropologists historians political scientists ecologists and sociologists join forces with elders and community leaders to discuss four themes the cultural significance of caribou caribou ecology food security and caribou management Together they bring to light past challenges and explore new opportunities for respecting northern communities cultures and economies and for refocusing caribou management on the knowledge practices and

efforts was a hybrid environment where the distinctions between irrigated farms and wildlife refuges blurred Management of the refuges was fraught with conflicting priorities and practices Farmers and refuge managers harassed birds with shotguns and flares to keep them off private lands and government pilots took to the air dropping hand grenades among flocks of geese and herding the startled birds into nearby refuges Such actions masked the growing connections between refuges and the land around them Seeking Refuge examines the development and management of refuges in the wintering range of migratory birds along the Pacific Flyway Although this is a history of efforts to conserve migratory birds the story Robert Wilson tells has considerable salience today Many of the key places migratory birds use the Klamath Basin California s Central Valley the Salton Sea are sites of recent contentious debates over water use Migratory birds connect and depend on these landscapes and farmers face pressure as water is reallocated from irrigation to other purposes In a time when global warming promises to compound the stresses on water and migratory species Seeking Refuge demonstrates the need to foster landscapes where both wildlife and people can thrive
