*Young People's Voice in School Science* Marianne Logan, 2023-11-27 This book highlights young people's changing attitudes toward and interest in science over the course of a five year longitudinal study Utilizing a mixed methods approach the author presents rich data from children and young people as well as their parents and teachers By providing a glimpse of science pedagogy from the perspective of young people and those who work with them the book identifies factors that affect students' interest in science throughout their primary and secondary education The book also examines a posthumanist philosophical approach to science education and emphasizes the interrelationship of all things

within the context of science education      Studying Science Teacher Identity Lucy Avraamidou, 2016-04-11 The overarching goal of this book volume is to illuminate how research on science teacher identity has deepened and complicated our understanding of the role of identity in examining teacher learning and development The collective chapters both theoretical and empirical present an array of conceptual underpinnings that have been used to frame science teacher identity document the various methodological approaches that researchers have implemented in order to study science teacher identity within various contexts and offer empirical evidence about science teacher identity development The findings of the studies presented in this volume support the argument that teacher identity is a dynamic multidimensional and comprehensive construct which provides a powerful lens for studying science teacher learning and development for various reasons First it pushes our boundaries by extending our definitions of science teacher learning and development as it proposes new ways of conceptualizing the processes of becoming a science teacher Second it emphasizes the role of the context on science teacher learning and development and pays attention to the experiences that teachers have as members of various communities Third it allows us to examine the impact of various sub identities personal histories emotions and social markers such as ethnicity race and class on science teachers identity development The book aims at making a unique and deeply critical contribution to notions around science teacher identity by proposing fresh theoretical perspectives providing empirical evidence about identity development offering a set of implications for science teacher preparation and recommending directions for future research      *Love & Science* Stanley Silverman, Richard Foreman, 1991 The acclaimed collaborations of playwright director designer Richard Foreman and composer Stanley Silverman have challenged and entertained adventurous theatregoers internationally for twenty years This selection of texts make these original and inimitable works of music theatre accessible to a wide audience for the first time Includes *Hotel for Criminals* The American Imagination an exploration of the dark sex filled vision of France created by silent film serials *Africanus Instructus* a surrealistic vaudeville journey through the dark continent of our subconscious and *Love and Science* a magical romance with mystical implications Also included are the script of *Yiddisher Teddy Bears* a musical comedy set in New York's Lower East Side at the turn of the century and Richard Foreman's own introduction to his singular world of music theatre      Einstein Barry R. Parker, 2010-10-05 In this unique contribution to the Einstein literature physicist and acclaimed science writer Parker draws on the great scientist's letters and personal papers to explore the intellectual and emotional passions that motivated both his work and his life Illustrations throughout      **Sisters in Science** Diann Jordan, 2006 Author Diann Jordan took a journey to find out what inspired and daunted black women in their desire to become scientists in America Letting 18 prominent black women scientists talk for themselves *Sisters in Science* becomes an oral history stretching across decades and disciplines and desires From Yvonne Clark the first black woman to be awarded a B S in mechanical engineering to Georgia Dunston a microbiologist who is researching the genetic code for her race to Shirley Jackson whose aspiration led to the presidency of Rensselaer Polytechnic

Institute Jordan has created a significant record of women who persevered to become firsts in many of their fields. It all began for Jordan when she was asked to give a presentation on black women scientists. She found little information and little help. After almost nine years of work, the stories of black women scientists can finally be told. Enhancing Learning Opportunities Through Student, Scientist, and Teacher Partnerships Farland-Smith, Donna, 2021-03-05. Student scientist teacher interactions provide students with several advantages. They provide opportunities to interact with experts and professionals in the field, give students a chance at meeting a role model that may impact students' career choices and increase awareness of available career options combined with an understanding of how their skills and interests affect their career decisions. Additionally, it enhances attitudes and interest toward STEM professions for students and grants opportunities to connect with scientists as human beings and see them as real people, replacing stereotypical perceptions of scientists. Moreover, there are many advantages for the teacher or informal educator when these partnerships are established. For these reasons and more, numerous studies are often conducted involving the partnerships of students, scientists, and teachers. Enhancing Learning Opportunities Through Student Scientist and Teacher Partnerships organizes a collection of research on student scientist teacher partnerships and presents the models, benefits, implementation, and learning outcomes of these interactions. This book presents a variety of different scientist student teacher partnerships with research data to support different learning outcomes in settings like schools, after school programs, museums, science centers, zoos, aquariums, children's museums, space centers, nature centers, and more. This book is ideal for in-service and preservice teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in research on beneficial student scientist teacher partnerships models in formal and informal settings.

**Teaching for Mastery in Writing** Mike Cain, 2018-07-12. Teaching for Mastery in Writing provides a practical approach to developing mastery in writing which helps all primary children to develop their skills and inspires a love of writing. This innovative book follows an approach that integrates mastery into existing teaching sequences, an approach which aims to improve the writing ability of all children, not just the more able. Writing is a tough discipline for children in today's primary schools. The number of skills they are expected to learn is a source of amazement to many adults outside education. It is no easier to teach, not least because of the many and varied demands on schools including the National Curriculum, SPaG tests, assessment frameworks, and inspections. Now more than ever, it is crucial that teachers focus on helping children become the most effective communicators they can be through the medium of writing. Throughout the book, Mike Cain promotes the importance of a classroom culture characterised by focused talk and reasoning and provides lots of ideas for challenging children in their writing through the development of key
