Passport To Poverty:

Migration and Poverty Edmundo Murrugarra, Jennica Larrison, Marcin Sasin, 2010-11-24 This volume uses recent research from the World Bank to document and analyze the bidirectional relationship between poverty and migration in developing countries The case studies chapters compiled in this book from Tanzania Nepal Albania and Nicaragua as well as the last policy oriented chapter illustrate the diversity of migration experience and tackle the complicated nexus between migration and poverty reduction Two main messages emerge Although evidence indicates that migration reduces poverty it also shows that migration opportunities of the poor differ from that of the rest In general the evidence suggests that the poor either migrate less or migrate to low return destinations As a consequence many developing countries are not maximizing the poverty reducing potential of migration The main reason behind this outcome is difficulties in access to remunerative migration opportunities and the high costs associated with migrating It is shown for example that reducing migration costs makes migration more pro poor The volume shows that developing countries governments are not without means to improve this situation Several of the country examples offer a few policy recommendations towards this end

The European Mainstream and the Populist Radical Right Pontus Odmalm, Eve Hepburn, 2017-03-31 Are populist radical

right PRR parties the only alternatives for voters seeking restrictive and assimilationist outcomes Or is a mainstream choice available Popular opinion and social media commentaries often criticize mainstream parties for facing in the same liberal and multicultural direction Literature on parties and elections equally suggests a convergence of policy positions and the disappearance of any significant differences between parties This edited volume is an attempt to challenge such perceptions and conclusions By systematically coding manifestos for seventeen mainstream and six PRR parties in Western Europe the book explores positional differences between mainstream and niche contenders over three key elections between 2002 and 2015 The findings indicate more choice than initially expected but these restrictive and assimilationist options are usually in close proximity to each other and typically less intense than those of the PRR This can help explain the continuous growth of the PRR despite the presence of a mainstream alternative Yet party system dynamics also matter Contributing authors thus investigate a number of arguments in the precarious relationship between mainstream parties the electorate and the PRR as well as between different mainstream parties

No Excuses Stephan Thernstrom, Abigail Thernstrom, 2009-07-14 Black and Hispanic students are not learning enough in our public schools and their typically poor performance is the most important source of ongoing racial inequality in America today thus say Abigail and Stephan Thernstrom the racial gap in school achievement is the nation's most critical civil rights issue and an educational crisis it's no wonder that No Child Left Behind the 2001 revision of the Elementary and Secondary Education Act made closing the racial gap in education its central goal An employer hiring the typical Black high school graduate or the college that admits the average Black student is choosing a youngster who has only an eighth grade education In most subjects the majority of twelfth grade Black students do not have even a partial mastery of the skills and knowledge that the authoritative National Assessment of Educational Progress calls fundamental for proficient work at their grade No Excuses marshals facts to examine the depth of the problem the inadequacy of conventional explanations and the limited impact of Title I Head Start and other familiar reforms Its message however is one of hope Scattered across the country are excellent schools getting terrific results with high needs kids These rare schools share a distinctive vision of what great schooling looks like and are free of many of the constraints that compromise education in traditional public schools In a society that espouses equal opportunity we still have a racially identifiable group of educational have nots young African Americans and Latinos whose opportunities in life will almost inevitably be limited by their inadequate education When students leave high school without high school skills their futures and that of the nation are in jeopardy With successful schools already showing the way no decent society can continue to turn a blind eye to such racial and ethnic inequality

Fourth Revolution and the Bottom Four Billion Nir Kshetri, 2023-04-18

Products and services based on advanced technologies such as artificial intelligence and blockchain are normally considered to be for rich consumers in advanced countries. Fourth Revolution and the Bottom Four Billion demonstrates how marginalized and vulnerable groups with limited resources can also benefit from these technologies. Nir Kshetri suggests that the falling costs and the increased ease of developing and deploying applications based on these technologies are making them more accessible. He illustrates how key emerging technologies are transforming major industries and application areas such as healthcare and pandemic preparedness, agriculture, finance, banking, and insurance. The book also looks at how these transformations are affecting the lives of low income people in low and middle income countries and highlights the areas needing regulatory attention to adequately protect marginalized and vulnerable groups from the abuse and misuse of these technologies. Kshetri discusses how various barriers such as the lack of data, low resource languages, underdeveloped technology infrastructures, lack of computing power, and shortage of skill and talent have hindered the adoption of these technologies among marginalized and vulnerable groups. Fourth Revolution and the Bottom Four Billion suggests that it is the responsibility of diverse stakeholders: governments, NGOs, international development organizations, academic institutions, the private sector, and others to ensure that marginal groups also benefit from these transformative innovations.

Poverty's Stark Truth Amara Darwin, 2025-01-08. *Poverty's Stark Truth* tackles the critical question of survival amid persistent resource scarcity affecting nearly 700 million people worldwide. This comprehensive examination challenges traditional narratives about poverty by demonstrating how systemic barriers and policy decisions rather than individual choices primarily drive resource limitations. Through a blend of macroeconomic analysis and ground level case studies, the book presents a compelling investigation of both the causes of poverty and practical solutions for economic stability. The book's three part structure provides a thorough exploration of resource scarcity, beginning with an analysis of root causes and historical patterns of resource distribution. It then moves to document survival strategies across various global settings, showcasing both successful and unsuccessful approaches to resource management. The final section presents evidence based pathways toward economic security supported by real world case studies of effective interventions and policy reforms. What sets this work apart is its innovative integration of behavioral economics with traditional economic theory, examining how psychological factors influence resource management decisions under stress. The research methodology combines quantitative economic data with qualitative studies featuring insights from individuals, community leaders, and policymakers across both developed and developing nations. This balanced approach provides readers with both a theoretical framework for understanding poverty and practical tools for addressing resource scarcity at individual, community, and policy levels.
