Susan Haack Cornelis De Waal,2011-04-06 The book on Susan Haack s philosophy is a welcome achievement in a grand tradition as in the series of volumes of The Library of Living Philosophers Here too the multifaceted contributions by a distinguished

philosopher are analyzed in turn by nearly a score of feisty scholars each of whom then is answered by Susan Haack's illuminating reply. Altogether a feast. GERALD HOLTON, Mallinckrodt Research Professor of Physics, Research Professor of History of Science, Harvard University, Author of *Thematic Origins of Scientific Thought: Kepler to Einstein* and *Science and Anti-Science*. As is well known, Susan Haack combines the fullest technical professionalism in philosophy with a commitment to vigorous participation in debate on large public issues. Her special gift is her ability to bring the former to bear on the latter. This well-conceived collection brings out the force and energy of her thinking. LORD ANTHONY QUINTON, Former President of Trinity College, Oxford, Former Chairman of the British Library Board and the author of *Hume*. In this critical appraisal of the work of philosopher Susan Haack, editor Cornelis de Waal has assembled sixteen original essays from outstanding international contributors together with responses from Haack on the points raised. The contributors address most of Haack's key publications from her early writings on metaphysics to her most recent work in the philosophy of science and the philosophy of law. Topics include the revisability of logic, the role of emotion in reasoning, scientific integrity, postmodernism and the law, the relation of science to religion, preferential hiring, multiple aspects of Haack's foundationalism and her crossword analogy. The volume also includes an extensive interview with Haack which traces the development of her thought and a complete bibliography of her work. For anyone seeking a better understanding of the work of this important philosopher, this unique collection offers many invaluable insights. Cornelis de Waal, Indianapolis, IN, is associate editor at the Peirce Edition Project and associate professor of philosophy both at Indiana University and Purdue University, Indianapolis. He is the author of *On Pragmatism*, *On Mead* and *On Peirce* in the Wadsworth Philosophers Series, the editor of *American New Realism* (1910-1920) and the assistant editor of *Writings of Charles S. Peirce: A Chronological Edition*, Volume 6 (1886-1890).

Epidemic Cinema Julia Echeverría, 2023-12-08. This book examines the recent trend in global cinema to feature infectious disease. As the global crisis of the COVID-19 pandemic materialised, the anxieties and discourses of world risk that had long been portrayed in popular media, the book provides a novel definition of the epidemic film genre and offers a systematic look into the narrative and stylistic conventions that characterise it. *Epidemic Cinema* traces the evolution of the genre from its early cinematic origins to establish the founding principles of a genre standing at the crossroads between science fiction and horror. It draws on close textual analysis to show how the pandemic reified one of the central predicaments of epidemic narratives: the constant tension existing between free-floating phenomena and the impulse to control and resist such phenomena, ultimately epitomised by the trope of the border. Showing how infectious diseases offer a rich allegorical frame which cinema uses to articulate timely anxieties of growingly invisible and deterritorialised risks, the author presents the prevalence of contagion in popular culture as a symptom of this growingly viral and virus-ridden context, both in its most literal and metaphorical sense. This insightful study will interest students and scholars of film studies, global cinema, science fiction, horror, popular culture and genre theory. *The Chemical News and Journal of Industrial Science*, 1925
