Pataphysica 2 Pataphysica E Alchimia:

Pataphysica 2 Faustroll, 2004 In the great tradition of Nicolas Flamel and Fulcanelli the immortal Dr Faustroll returns to introduce this collection of writings on alchemy that secret science no less mystifying and marvelous than our own art and science pataphysics Opening this anthology is Part 1 of Alfred Jarry's delightful last novel *La Dragonne* 1907 translated from the French as *The She Dragon* and annotated to highlight some of Jarry's many alchemical allusions Jarry's comic genius brings to life the inhabitants of a little town in the mountains of Savoy focusing on gaming activities at and around the local tavern and an oddly militaristic expectant father Seven additional writers present their research or reflections on subjects as diverse as Chaucer's Canon's Yeoman's Tale the bizarre Voynich Manuscript Gustave Kahn's Tale of Gold and Silence turn of the 20th century South African statesman Paul Kruger whose portrait bust appears on the Kruggerand and symbolic dismemberment two of these contributors present their work in poetic form one of them seemingly cursed by alchemy however benevolently the other positing seven easy steps to completion of the Great Work Perhaps you will find yourself entwined somewhere in between like Mercury's caduceus For all pataphysicians alchemists and symbolists welcome to the other world

Pataphysica 4 Faustroll, 2007-02 *Pataphysica 4* present the strange conclusion to Alfred Jarry's 1907 Symbolist novel *The She Dragon* Part 1 having appeared in *Pataphysica 2* iUniverse 2004 It also holds the central pivotal chapter of the novel which describes a battle that while entirely modern reads like ancient myth conjuring such texts as the Bhagavad Gita and Homer's *Iliad* Annotations highlight Jarry's alchemical symbolism among other things alchemy being the ancient art and science studied in secret by such modern scientist philosophers as Gottfried Leibniz and Isaac Newton Pataphysics is the science of imaginary solutions and for Jarry although there is no other imagination than the scientific modern science has simply failed to keep up with the scientific imagination Rounding out this otherwise rectangular issue are the works of several returning authors as well as some new ones They provide additional musings on such themes as Jarry's alchemical cosmological play *The Pope's Mustardmaker* an amorous veteran of an internal war microcosm and macrocosm a fugitive writer apparently obsessed with conspiracy theories and baseball a peculiar Grimoire on a new set of Glorious Mysteries and a terrifying invocation of the Thelemic Law of Rabelais Jarry's literary master as adapted by Crowley Strap on suitable eye protection and enjoy

The Metaphysical World of Isaac Newton John Chambers, 2018-02-13 Newton's heretical yet incisive writings on theology spirituality alchemy and prophecy written in secret alongside his *Principia Mathematica* Shows how Newton's brilliance extended far beyond math and science into alchemy spirituality prophecy and the search for lost continents such as Atlantis Explains how he was seeking to rediscover the one true religion that existed prior to the Flood of Noah when science and spirituality were one Examines Newton's alternate timeline of prehistory and his study of prophecy through the Book of Revelations including his prediction of Apocalypse in the year 2060 Isaac Newton 1643-1727 is still regarded by the world as the greatest scientist who ever lived He invented calculus

discovered the binomial theorem explained the rainbow built the first reflecting telescope and explained the force of gravity In his famous masterpiece Principia Mathematica he described the mechanics of the physical universe with unimagined precision proving the cosmos was put together according to laws The perfection of these laws implied a perfect legislator To Newton they were proof that God existed At the same time Newton was writing Principia Mathematica he was writing a twin volume that he might have called had it been completed Principia Theologia Principles of Theology This other masterpiece of Newton kept secret because of the heresies it contained consists of thousands of essays providing incisive answers to the spiritual questions that have plagued mankind through the ages Examining Newton's secret writings John Chambers shows how his brilliance extended into alchemy spirituality the search for lost continents such as Atlantis and a quest to uncover the corrupted texts that were rife in the Bibles of his time Although he was a devout Christian Newton's work on the Bible was focused not on restoring the original Jewish and Christian texts but on rediscovering the one true religion that existed prior to the Flood of Noah when science and spirituality were one The author shows that a single thread runs through Newton's metaphysical explorations He is attempting to chart the descent of man's soul from perfection to the present day The author also examines Newton's alternate timeline of ancient history and his study of prophecy through the Book of Revelations including his prediction of an Apocalypse in the year 2060 followed by a radically transformed world He shows that Newton's great hope was that these writings would provide a moral compass for humanity as it embarked upon the great enterprise that became our technological world
